- (4) Where the electricity used by consumers is charged at different tariffs, the consumption must be metered separately for each tariff.
- (5) Where sub-metering equipment is installed, accommodation separate from the municipality's metering equipment must be provided where appropriate.

17. General principles

- (1) The municipality adopts, subject to subsection (14), sections 20(3)(d) and (e) and 21(5)(d), a two-part tariff structure consisting of a fixed availability charge coupled with a charge based on consumption.
- (2) In setting its annual tariffs the municipality must at all times take due cognisance of the –
 - (a) tariffs applicable elsewhere in the economic region; and
 - (b) impact which its own tariffs may have on local economic development.
- (3) With the exception of the indigence relief measures approved by the municipality, service tariffs imposed by the municipality should be viewed as user charges and not as taxes, and the ability of the relevant consumer or user of the services to which such tariffs relate, to pay for such services, should not be considered as a relevant criterion.
- (4) The municipality must ensure that its tariffs are uniformly and fairly applied throughout the municipal area.
- (5) Tariffs for the following services rendered by the municipality, must as far as possible recover the expenses associated with the rendering of each service concerned, and, where feasible, generate a surplus as determined in each annual budget:
 - (a) supply of electricity;
 - (b) supply of water;
 - (c) sanitation services, including sewerage and waste water disposal services; and
 - (d) refuse (solids waste) removal services.
- (6) The tariff, which a particular consumer or user pays, must be directly related to the standard of service received and the quantity of the particular service used or consumed.
- (7) The municipality must annually review its indigence relief measures, as contemplated in sections 15 and 16, and must set out the –
 - (a) municipality's cost recovery policy in respect of the tariffs which it levies on registered indigents; and

- (b) the implications of such policy for the tariffs which it imposes on other users and consumers in the municipal region.
- (8) (a) The municipality's tariff policy must be transparent.
(b) The extent to which there is cross-subsidisation between categories of consumers or users must be evident to all consumers or users of the service in question.
- (9) The municipality undertakes to –
 - (a) ensure that its tariffs are explained to and understood by all consumers and users affected by this by-law;
 - (b) render its services cost effectively in order to ensure the best possible cost of service delivery.
- (10) In the case of the directly measurable services, namely electricity and water, the consumption of such services must be properly metered by the municipality, and meters must be read, wherever circumstances reasonably permit, on a monthly basis, and the charges levied on consumers must be proportionate to the quantity of the service which they consume.
- (11) In considering the costing of its water, electricity and sewerage services, the municipality must take due cognisance of the high capital cost of establishing and expanding such services, and of the resultant high fixed costs, as opposed to variable costs of operating these services.
- (12) (a) The municipality's tariffs for electricity services are determined to ensure that those consumers who are mainly responsible for peak demand, and therefore for the incurring by the municipality of the associated demand charges from Eskom, have to bear the costs associated with these charges.
(b) For the purposes of paragraph (a), the municipality must install demand meters to measure the maximum demand of such consumers during certain periods.
(c) Such consumers must pay the relevant demand charge as well as a service charge directly related to their actual consumption of electricity during the relevant metering period.

18. Calculation of tariffs for major services

In order to calculate the tariffs which must be charged for the supply of the services contemplated in section 17(5), the municipality must identify all the costs of operation of the undertakings concerned, including specifically the following:

- (a) cost of bulk purchases in the case of water and electricity;
- (b) distribution costs;
- (c) distribution losses in the case of electricity and water;
- (d) depreciation expenses;
- (e) maintenance of infrastructure and other fixed assets;
- (f) administration and service costs, including –
 - (i) service charges levied by other departments such as finance, human resources and legal services;
 - (ii) reasonable general overheads, such as the costs associated with the office of the municipal manager;
 - (iii) adequate contributions to the provisions for bad debts and obsolescence of stock; and
 - (iv) all other ordinary operating expenses associated with the service concerned including, in the case of the electricity service, the cost of

- (g) providing street lighting in the municipal area; and
the cost of indigence relief measures.

Part 2

Structure of tariffs for major services, minor tariffs

19. Structure of tariffs

- (1) The municipality may—

- (a) determine the kilowatt-hours of electricity per month and the kilolitres of water which will be provided free of charge to a consumer who have registered as an indigent in terms of section 15(1)(b); and
(b) consider relief in respect of the tariffs for sewerage and refuse removal for such registered indigent to the extent that the council deems such relief affordable in terms of each annual budget, however, such relief may not be less than a discount as determined by the municipality.

- (2) The tariff for a pre-paid meter is the same as the ordinary consumption tariffs levied on the category of consumer concerned, and no availability charge is levied on a property where a pre-paid meter has been installed.

20. Electricity

- (1) The various categories of electricity consumers, as set out in subsection (3), are charged at the applicable tariffs, as approved by the municipality in each annual budget.

- (2) Tariff adjustments are effective from 1 July each year.

- (3) Categories of consumers and charges are as follows:

- (a) with the exception of a registered indigent, a consumer must be billed for all the electricity consumed at the tariff applicable to the category in which the particular consumer falls.
(b) the tariff for domestic consumption of electricity may not exceed such percentage, per kilowatt-hours, as determined by the municipality, of the tariff applicable to other consumers, and all other consumers, including businesses, industries and institutional consumers, must pay the same tariff per kilowatt-hour.
(c) A domestic electricity consumer of the municipality who is registered as an indigent with the municipality must receive free the amount of kilowatt-hours of electricity as determined in terms of section 19(1).
(d) a domestic electricity consumer other than a registered indigent and a consumer using a prepaid meter per month must additionally be billed an availability charge per meter installed.
(e) a commercial, industrial and other non-domestic property must additionally be billed a monthly availability charge per meter installed and, where applicable, a demand charge appropriate to its respective levels of consumption.

21. Water

- (1) The categories of water consumers as set out in subsection (5), are charged at the applicable tariffs, as approved by the municipality in each annual budget.

- (2) Tariff adjustments are effective from 1 July each year.

- (3) The tariff levied for domestic consumption of water escalates according to the volume of water consumed, and will be based on a monthly consumption as determined by the municipality.
- (4) The tariff for non-domestic water consumption is based on a single tariff per kilolitre consumed, irrespective of the volume of consumption concerned.
- (5) Categories of consumers and charges are as follows:
 - (a) a domestic water consumer registered as an indigent with the municipality must receive free the first six kilolitre of water consumed per month, thereafter a stepped tariff per kilolitre as determined by the municipality is applicable on metered water consumption.
 - (b) all other domestic consumers are charged for actual water consumption at a stepped tariff per kilolitre as determined by the municipality.
 - (c) the tariff applicable to domestic consumption of water may not exceed such percentage per kilolitre as determined by the municipality, of the tariff applicable to other consumers and all other consumers, including businesses, industries and institutional consumers, must pay the tariff as contemplated in subsection (4).
 - (d) an availability charge per water meter, as determined by the municipality, is charged on a water consumer, except a registered indigent and a consumer using a prepaid meter.

22. Refuse removal

- (1) The categories of refuse removal users as set out in subsection (3) are charged at the applicable tariffs, as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective from 1 July each year.
- (3) A separate fixed monthly refuse removal charge applies to each of the following categories of users, based on the costs of the service concerned:
 - (i) domestic and other users, where refuse is removed by the municipality once weekly; and
 - (ii) business and other users, where refuse is removed by the municipality twice weekly;
 - (iii) business and other users, where refuse is removed by the municipality thrice weekly; and
 - (iv) business and other bulk consumers.
- (4) A registered indigent may receive a discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed as a refuse removal charge.

23. Sewerage

- (1) The categories of sewerage users as set out in subsection (3) are charged per month at the applicable tariff as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective from 1 July each year.
- (3) Categories of users and charges are:
 - (a) an availability charge is charged per month for an undeveloped erf, irrespective of its permitted or intended use.
 - (b) a fixed monthly charge based on the costs of the service, is charged for bucket removal for a domestic user, however, a registered indigent

may receive such discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed for this service.

- (c) a fixed monthly charge based on the costs of the service is charged for a domestic user, however, a registered indigent may receive such discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed for this service.
- (d) a fixed monthly charge based on the costs of the service per sewer point or toilet is charged to all businesses, industries and institutional users.
- (e) an effluent fee is payable by a factory and another industrial user where the wastewater emanating from such user requires special purification measures by the municipality, and the fee is based on the toxic content of the wastewater concerned and the costs of the purification.
- (f) subject to availability of equipment, a charge, based on the costs of the service to empty a septic tank, will be levied for each visit to empty a septic tank on the premises of a person requiring such service.

24. Minor tariffs

- (1) All minor tariffs are standardised within the municipal region.
- (2) All minor tariffs are approved by the municipality in each annual budget and are, when deemed appropriate by the municipality, subsidised by property rates and general revenues, particularly when the –
 - (a) tariffs prove uneconomical when charged to cover the cost of the service concerned;
 - (b) cost cannot accurately be determined; or
 - (c) tariff is designed purely to regulate rather than finance the use of the particular service or amenity.
- (3) Unless there are compelling reasons why such adjustment should not be effected, all minor tariffs over which the municipality has full control, and which are not directly related to the cost of a particular service, are adjusted annually at least in accordance with the prevailing consumer price index.
- (4) The following services are subsidised services, and the tariffs levied cover 50%, or as near as possible to 50%, of the annual operating expenses budgeted for the service concerned:
 - (a) burial services and the provision of cemeteries; and
 - (b) the provision of municipal sports facilities for use against a fee.
- (5) The following services are considered as being community services, and no tariffs are levied for their use:

- (6) The following services are considered as being economic services, and the tariffs levied cover 100%, or as near as possible to 100%, of the budgeted annual operating expenses of the service concerned:
- (a) The maintenance of graves, gardens of remembrance and crematoria against payment of a fee;
 - (b) the availability of a house against payment of a housing rental;

 - (g) the connection of electricity, water and sewerage against payment of a connection fee;
 - (h) the photostating of copies against payment of a fee; and
 - (i) the issuing of a clearance certificate against payment of a fee.
- (7) The following charges and tariffs are considered as regulatory or punitive, and are determined as appropriate in each annual budget:
- (a) fines for lost or overdue library books;
 - (b) advertising sign fees;
 - (c) pound fees;
 - (d) disconnection and reconnection fees of electricity and water;
 - (e) penalty and other charges imposed in terms of Chapters 1 and 2; and
 - (f) penalty charges for the submission of dishonoured, stale, post-dated or otherwise unacceptable cheques.
- (8) The lease of a municipal property must be dealt with in terms of the Municipality's Supply Chain Management Regulations or Policy;
- (9) If the municipal manager is satisfied, in the case of a rental for the use of a municipal hall and premises, that the hall or premises is required for non-profit making purposes and for the provision of a service to the community, the municipal manager may waive the applicable rental.
- (10) The municipal manager must determine whether an indemnity or guarantee is to be lodged, or whether a deposit has to be paid, for the rental of a municipal hall, premises or sports field, and in so determining must be guided by the likelihood of the municipality's sustaining damages as a result of the use of the facilities concerned.
- (11) The costs of the democratic process in the municipality such as, but not limited to, all expenses associated with the political structures of the municipality, form part of the expenses to be financed from property rates and general revenues, and are not included in the costing of the major services of the municipality.

CHAPTER 4 RATES

25. Imposition of rates

- (1) The municipality must impose, as part of each annual operating budget component, a rate in the rand on the market value of all rateable property as recorded in the municipality's valuation roll and supplementary valuation roll.

(2) When imposing the rate for each financial year, the municipality must take proper cognisance of the –

- (a) aggregate burden of rates and service charges on property owners in the various categories of property ownership; and
- (b) extent to which this burden is or remains competitive with the comparable burden in other municipalities within the local economic region.

26. Rebates on rates

(1) The municipality grants rebates in recognition of the following factors:

- (a) the inability of residential property owners to pass on the burden of rates, as opposed to the ability of the owners of business, commercial, industrial and certain other properties to recover such rates as part of the expenses associated with the goods or services which they produce;
- (b) the need to accommodate indigents and less affluent pensioners;
- (c) the services provided to the community by public service organisations;
- (d) the value of agricultural activities to the local economy coupled with the limited municipal services extended to such activities, but also taking into account the municipal services provided to municipal residents who are employed in such activities;
- (e) the need to preserve the cultural heritage of the local community;
- (f) the need to encourage the expansion of public service infrastructure; and
- (g) the indispensable contribution which property developers, especially in regard to commercial and industrial property development, make towards local economic development, and the continuing need to encourage such development.

(2) The municipal manager must, subject to section 15(3) and 15(4) of the Property Rates Act, 2004 (Act 6 of 2004), ensure that rebates are indicated on the rates accounts submitted to each property.

(3) The municipality may categorise properties and grant rebates as determined by it.

(4) In determining whether a property forms part of a particular category contemplated in subsection (3), the municipality must have regard to the actual use to which the relevant property is put, and in the case of vacant land not specifically included in any of the categories, the permitted use of the property determines into which category it falls.

(5) The rebates granted under subsection (3) apply in addition to the provisions of section 17(1)(h) of the Property Rates Act, 2004.

(6) (a) Subject to the provisions of section 9 of the Property Rates Act, 2004, a property, other than one referred to in section 17(1)(h)(i) of that Act, is rated on the value assigned to each component, and receives the rebate applicable to such component.

(b) where one component on average represents a higher percentage than that determined by the municipality, of the property's actual use, such property must be rated as though it were used for that use only.

27. Adjustment of rates

(1) Where the rates levied on a particular property have been incorrectly determined, whether because of –

- (a) an error or omission on the part of the municipality;
- (b) false information provided by the property owner concerned; or
- (c) a contravention of the permitted use to which the property concerned may be put,

the rates payable must be appropriately adjusted for the period extending from the date on which the error or omission is detected back to the date on which rates were first levied in terms of the current valuation roll.

(2) Where the error occurred as contemplated in subsection (1)(b) or (c), interest on the unpaid portion of the adjusted rates payable must be levied at the maximum rate permitted by prevailing legislation.

28. Frequency of valuations

Subject to the provisions of sections 32 and 77 of the Property Rates Act, 2004 (Act 6 of 2004), the municipality must prepare a new valuation roll every three years and supplementary valuation rolls every six months.

CHAPTER 5 ENFORCEMENT

29. Municipality's powers to restrict or disconnect supply of services

The municipality may, over and above the provisions of any other provisions in this by-law restrict or disconnect the supply of water and electricity, or discontinue any other service to any premises if –

and without prior notice to the account holder, and the account holder is liable for all fees and charges levied by the Municipality for such disconnection.

(4) Where an account holder or any person has contravened subsection (2) and such contravention has resulted in the meter recording less than the true consumption, the municipality has the right to recover from the account holder the full cost of his or her estimated consumption.

31. Clearance certificate

To effect the transfer of any immovable property from one registered owner to another, the Registrar of Deeds requires a clearance certificate, which certificate is obtainable from the municipal manager upon payment of the prescribed fee and subject to the conditions of section 118 of the Municipal Systems Act, 2000 (Act 32 of 2000) being met.

32. Tenders and grants-in-aid

(3) The municipality may only consider a tender once the proposed supplier has made satisfactory arrangements to pay the outstanding amount by means of instalments, or has settled all arrear amounts in full.

(4) The municipal manager or a duly authorised officer of the municipality must in the condition of contract, provide for the deduction from moneys owed to the supplier in order to settle any outstanding amount.

33. Power of council to recover costs

(1) Where a bank dishonours any payment made to the municipality, the municipality may levy and recover all related costs and any administration fees against an account of the defaulting account holder and may disconnect or restrict the supplies to the premises of such account holder.

(2) All legal costs, including attorney-and-client costs incurred in the recovery of amounts in arrears and payable in terms of the Magistrates Court Act, 1944 (Act 32 of 1944), must be levied against the arrears account of the account holder.

(3) For any action taken in demanding payment from an account holder or reminding an account holder by means of telephone, fax, electronic mail, letter or otherwise that payments are due, a fee will be levied against the municipal account of the account holder in terms of the municipality's tariff policy.

34. Prima facie evidence

A certificate reflecting the amount due and payable to the municipality, signed by the municipal manager, is upon mere production thereof prima facie evidence of the indebtedness of the person mentioned in it.

35. Abandonment of bad debts, and full and final settlement of account

- (1) Before terminating the debt collection procedure in any individual instance, the municipal manager must –
- (a) ensure that all debt collection mechanisms as provided for in section 11 have been utilised where reasonable;
 - (b) maintain an audit trail; and
 - (c) document the reasons for terminating the debt collection procedure, including the cost of enforcement and necessary financial adjustments.
- (2) The municipal manager may consider an offer for full and final settlement, and must, if in the interests of the municipality, in writing consent to the acceptance of a lesser amount as full and final settlement of the amount due and payable.
- (3) Where the exact amount due and payable to the municipality has not been paid in full, any lesser amount tendered to and accepted by any the municipality employee, except the municipal manager, shall not be deemed to be in full and final settlement of such an amount.

36. Power of entry and inspection

- (1) A duly authorised representative of the municipality may for any reason related to the implementation or enforcement of this by-law at all reasonable times or in emergency at any time, enter premises, request information and carry out such inspection as deemed necessary, and may for purposes of installing or repairing any meter or service connection for reticulation disconnect, stop or restrict the provision of any service.

(9) Any covers of a wire way carrying the supply circuit from the point of supply to the metering equipment must be made to accept the seals of the municipality.

(10) Within the meter box, the service conductor or cable, as the case may be, must terminate in an unobscured position and the conductors must be visible throughout their length when cover plates, if present, are removed.

(11) (a) In the case of blocks of buildings occupied by a number of individual consumers, separate wire ways and conductors or cables must be laid from the common metering room or rooms to each individual consumer in the blocks of buildings.

(b) Alternatively, if trunking is used, the conductors of the individual circuits must be clearly identified (tied together every 1,5m) throughout their length.

Metering accommodation

30. (1) (a) The consumer must, if required by the municipality, provide accommodation in an approved position, to the meter board and adequate conductors for the municipality's metering equipment, service apparatus and protective devices.
- (b) Such accommodation and protection must be provided and maintained at the cost of the consumer or the owner, as the circumstances may demand, and must be situated, in the case of conventional meters, at a point to which free and unrestricted access shall be had at all reasonable hours for the reading of meters, but at all times for purposes connected with the operation and maintenance of the service equipment.
- (c) Access at all reasonable hours shall be afforded for the inspection of prepayment meters.
- (2) Where sub-metering equipment is installed, accommodation separate from the municipality's metering equipment must be provided.
- (3) The consumer or, in the case of a common meter position, the owner of the premises must provide adequate electric lighting in the space set aside for accommodating the metering equipment and service apparatus.
- (4) Where the position of the meter, service connection, protective devices or main distribution board is no longer readily accessible or becomes a course of danger to life or property or in any way becomes unsuitable, the consumer must remove it to a new position, and the cost of such removal, which must be carried out with reasonable dispatch, must be borne by the consumer.
- (5) The accommodation for the municipality's metering equipment and protective devices may, if approved, include the consumer's main switch and main protective devices, and no apparatus other than that used in connection with the supply of electricity and use of electricity may be installed or stored in such accommodation unless approved.

CHAPTER 4: SYSTEMS OF SUPPLY**Load requirements**

31. Alternating current supplies shall be given as prescribed by the Electricity Act, 1987 (Act 41 of 1987), and in the absence of a quality of supply agreement, as set out in applicable standard specification.

32. Load limitations

- (1) Where the estimated load, calculated in terms of the safety standard, does not exceed 15 kVA, the electrical installation must be arranged for a two-wire single-phase supply of electricity, unless otherwise approved by the municipality.
- (2) Where a three-phase four-wire supply of electricity is provided, the load must be approximately balanced over the three phases, but the maximum out-of-balance load may not exceed 15kVA, unless otherwise approved by the municipality.
- (3) No current-consuming appliance, inherently single phase in character, with a rating which exceeds 15kVA may be connected to the electrical installation without the prior approval of the municipality.
- (4) A person who contravenes any provision of this section, commits an offence.

33. Interference with other persons' electrical equipment

- (1) No person may operate electrical equipment having load characteristics which, singly or collectively, give rise to voltage variations, harmonic currents or voltages, or unbalanced phase currents which fall outside the applicable standard specification.

- (2) The assessment of interference with other persons' electrical equipment must be carried out by means of measurements taken at the point of common coupling.
- (3) Should it be established that undue interference is in fact occurring, the consumer must, at his or her own cost, install the necessary equipment to filter out the interference and prevent it reaching the supply mains.
- (4) A person who contravenes section (1) commits an offence.

Supplies to motors

34. Unless otherwise approved by the Municipality, the rating of motors is limited as follows:

- (1) Limited size for low voltage motors:
The rating of a low voltage single-phase motor is limited to 2kW, and the starting current may not exceed 70A, and a motor exceeding these limits must be wound for three phases at low voltage or such higher voltage as may be required.
- (2) Maximum starting and accelerating currents of three-phase alternating current motors.
The starting current of three-phase low voltage motors permitted must be related to the capacity of the consumer's service connection, as follows:

Insulated service cable, size in mm ² , copper equivalent mm ²	Maximum permissible starting current A	Maximum motor rating in kW		
		Direct on line (6x full-load current)	Star/Delta (2,5 x full-load current)	Other means (1,5 x full-load current)
		kW	kW	kW
16	72	6	13,5	23
25	95	7,5	18	30
35	115	9	22	36,5
50	135	10	25	45
70	165	13	31	55
95	200	16	38	67
120	230	18	46	77
150	260	20	52	87

- (3) Consumers supplied at medium voltage:
In an installation supplied at medium voltage, the starting current of a low voltage motor is limited to 1,5 times the rated full-load current of the transformer supplying such a motor, and the starting arrangement for a medium voltage motor is subject to the approval of the municipality.

Power factor

35. (1) If required by the municipality, the power factor of any load must be maintained within the limits 0,85 lagging and 0,9 leading.

(2) Where, for the purpose of complying with sub-section (1), it is necessary to install power factor corrective devices, such corrective devices must be connected to the individual appliance terminals unless the correction of the power factor is automatically controlled.

(3) The consumer must, at his or her own cost, install such corrective devices.

Protection

36. Electrical protective devices for motors must be of such a design as effectively to prevent sustained over current and single phasing, where applicable.

CHAPTER 5: ELECTRICAL CONTRACTORS**Requirements**

37. In addition to the requirements of the Regulations the following requirements apply:

(a) Where an application for a new or increased supply of electricity has been made to the municipality, the municipality may at its discretion accept notification of the completion of any part of an electrical installation, the circuit arrangements of which permit the electrical installation to be divided up into well-defined separate portions, and such part of the electrical installation may, at the discretion of the municipality, be inspected, tested and connected to the supply mains as though it were a complete installation;

(b) the examination, test and inspection that may be carried out at the discretion of the municipality in no way relieves the electrical contractor or accredited person or the user or lessor, as the case may be, from his or her responsibility for any defect in the installation, and such examination, test and inspection shall not be taken under any circumstances (even where the electrical installation has been connected to the supply mains) as indicating or guaranteeing in any way that the electrical installation has been carried out efficiently with the most suitable materials for the purpose or that it is in accordance with this by-law or the safety standard, and the municipality shall not be held responsible for any defect or fault in such electrical installation; and

(c) the municipality shall not be held responsible for the work done by the electrical contractor or accredited person on a consumer's premises and is not in any way responsible for any loss or damage which may be occasioned by fire or by any accident arising from the state of the wiring on the premises.

CHAPTER 6: MISCELLANEOUS PROVISIONS**Repairs and costs of work**
