9. Detailed drawings of all internal services and link services required by the City of Cape Town's Directorate Transport, Roads and Stormwater and Utility Services prepared by a registered Engineering Professional be submitted to the aforementioned departments for their prior approval.
10. The developer, at his cost, shall install the required internal services infrastructure and link services to the satisfaction of City of Cape Town's Directorate Transport, Roads and Stormwater and Utility Services.
11. Servitudes shall be registered over water and sewer services (existing and proposed) which fall outside the road reserve, with a minimum width of 3.0m or 2x the depth whichever is the greatest.
12. The geometric design of the roads shall ensure that no local low points are created with regard to stormwater management. All stormwater to be routed to the nearest formalised municipal system.
13. The vertical alignment of the road design be adjusted in order for the roads to function as overland escape routes.
