**STANDARDS ACT, 2008
STANDARDS MATTERS**

In terms of the Standards Act, 2008 (Act No. 8 of 2008), the Council of the South African Bureau of Standards has acted in regard to standards in the manner set out in the Schedules to this notice.

All South African standards that were previously published by the South African Bureau of Standards with the prefix "SABS" have been redesignated as South African national standards and are now published by the SABS Standards Division (a division of SABS) with the prefix "SANS".

A list of all existing South African national standards was published by Government Notice No. 1373 of 8 November 2002.

In the list of SANS standards below, the equivalent SABS numbers, where applicable, are given below the new SANS numbers for the sake of convenience. Standards that were published with the "SABS" prefix are listed as such.

SCHEDULE 1: ISSUE OF NEW STANDARDS

The standards mentioned have been issued in terms of section 16(3) of the Act.

Standard No. and year	Title, scope and purport
SANS 1254:2012	<i>Fusible interlinings.</i> Covers requirements for three types of fusible interlinings, i.e. woven, non-woven and knitted weft insert fabrics, that are suitable for use in washable or dry-cleanable garments.
SANS 1524-1-2:2012/ NRS 009-1-2:2012	<i>Electricity payment systems - Part 1-2: Surge protective devices for the protection of payment meters.</i> Covers the utility's requirements for low-voltage metal-oxide varistor (MOV) surge protective devices (SPDs) used in payment meters, commonly known as "LV surge arresters". SPDs are applicable in low-voltage (230 V) single-phase supply systems to residential loads. Can only be used in conjunction with SANS 61643-11.
SANS 3001-BT12:2012	<i>Civil engineering test methods - Part BT12: Determination of the in situ permeability of a bituminous surfacing (Marvil test).</i> Describes a procedure to determine the in situ water permeability of a bituminous surfacing using a Marvil permeameter. Not suitable for rough or irregular surfaces where a seal between the base of the permeameter and the surface cannot be achieved.
SANS 13008:2012/ ISO 13008:2012	<i>Information and documentation - Digital records conversion and migration process.</i> Specifies the planning issues, requirements and procedures for the conversion and/or migration of digital records (which includes digital objects plus metadata) in order to preserve the authenticity, reliability, integrity and usability of such records as evidence of business transactions.
SANS 19126:2012/ ISO 19126:2009	<i>Geographic information - Feature concept dictionaries and registers.</i> Specifies a schema for feature concept dictionaries to be established and managed as registers. Because feature catalogues are often derived from feature concept dictionaries, a schema for a hierarchical register of feature concept dictionaries and feature catalogues is specified.
SANS 19129:2012/ ISO/TS 19129:2009	<i>Geographic information - Imagery, gridded and coverage data framework.</i> Defines the framework for imagery, gridded and coverage data. This framework defines a content model for the content type imagery and for other specific content types that can be represented as coverage data. These content models are represented as a set of generic UML patterns for application schemas.
SANS 19131:2012/ ISO 19131:2007	<i>Geographic information - Data product specifications.</i> Describes requirements for the specification of geographic data products, based upon the concepts of other ISO 19100 International Standards. Also provides help in the creation of data product specifications so they are easily understood and fit for their intended purpose.
SANS 19132:2012/ ISO 19132:2007	<i>Geographic information - Location-based services - Reference model.</i> Defines a reference model and a conceptual framework for location-based services (LBS), and describes the basic principles by which LBS applications may interoperate. References or contains an ontology, a taxonomy, a set of design patterns and a core set of LBS service abstract specifications in UML. Specifies the framework's relationship to other frameworks, applications and services for geographic information and to client applications.
SANS 19134:2012/ ISO 19134:2007	<i>Geographic information - Location-based services - Multimodal routing and navigation.</i> Specifies the data types and their associated operations for the implementation of multimodal location-based services for routing and navigation. Designed to specify web services that may be made available to wireless devices through web-resident proxy applications, but is not limited to that environment.
SANS 19144-1:2012/ ISO 19144-1:2009	<i>Geographic information - Classification systems - Part 1: Classification system structure.</i> Establishes the structure of a geographic information classification system, together with the mechanism for defining and registering the classifiers for such a system. Specifies the use of discrete coverages to represent the result of applying the classification system to a particular area and defines the technical structure of a register of classifiers in accordance with ISO 19135 (published in South Africa as an identical adoption under the designation SANS 19135).

Standard No. and year	Title, scope and purport
SANS 30002:2012/ ISO 30002:2010	<i>Ships and marine technology - Ship recycling management systems - Guidelines for selection of ship recyclers (and pro forma contract)</i> . Provides guidance to shipowners in the selection of a ship recycling facility. Applies to the process of selecting a ship recycling facility and the use of a pro forma contract. Does not consider other aspects of ship recycling that are covered by other standards.
SANS 30003:2012/ ISO 30003:2009	<i>Ships and marine technology - Ship recycling management systems - Requirements for bodies providing audit and certification of ship recycling management</i> . Contains principles and requirements for bodies providing the audit and certification of ship recycling management systems in accordance with management system standards.
SANS 30006:2012/ ISO 30006:2010	<i>Ship recycling management systems - Diagrams to show the location of hazardous materials onboard ships</i> . Provides requirements for diagrams to show the location of hazardous materials onboard ships. Such diagrams help ship recyclers understand an inventory of hazardous materials.
SANS 30007:2012/ ISO 30007:2010	<i>Ships and marine technology - Measures to prevent asbestos emission and exposure during ship recycling</i> . Provides effective methods for minimizing the dangers of asbestos during ship recycling, reducing both the release of asbestos into the environment and worker exposure to asbestos.
