It is hereby notified that the State President, under the powers vested in him by section *twelve* of the Mines and Works Act, 1956 (Act No. 27 of 1956), has been pleased to amend the regulations framed under the said Act, and published under Government Notice No. R. 1609, dated the 28th September, 1962, as amended from time to time, by the following amendment of regulation 74:—

Regulation 74.—The following sub-regulation is hereby substituted for sub-regulation (6) of regulation 74:—

(6) (a) Except as provided by paragraphs (b) and (j) of this sub-regulation no person shall take into the workings of the mine, or have in his possession in the workings, any device for the intentional creation of any arc, spark or flame or any match or appliance of any kind for striking a light and no person shall smoke in the workings or take into the workings or have in his possession in the workings any pipe, cigar, cigarette, tobacco other than chewing tobacco and snuff, or any contrivance or material for smoking: Provided that this prohibition shall not apply to the relighting device within an approved flame safety lamp.

(b) Geen sweis-, vlamsny-, slyp-, vulkaniseer-, soldeer- of dergelike uitrusting mag in die werkplekke ingeneem of gebruik word nie, behalwe in 'n werkwinkel ingerig met die toestemming van die Inspekteur van Myne onder voorwaardes wat deur die Staatsmyningenieur goedgekeur is.

(c) Elke aansoek om die inrigting van so 'n werkwinkel moet aan die Inspekteur van Myne gerig word en moet vergesel gaan van—

- (i) drie kopieë van 'n plan wat volgens skaal geteken is en die ligging van die beplande werkwinkel toon, sy toegangswêë en die hoeveelheid en rigting van die ventilasielugstrome, en
- (ii) drie kopieë van 'n tekening wat die ontwerp en konstruksie van die beplande werkwinkel en sy afdelings toon.

(d) Vir elke sodanige werkwinkel moet 'n bevoegde ingelyste persoon verantwoordelik wees wat skriftelik deur die bestuurder aangestel moet word en wat met goeie gevolg 'n kursus in gasse en die toets van gasse gevolg het, soos voorgeskryf by paragraaf (c) van subregulasie (7) van regulasie 321.

(e) Die persoon wat aangestel word om vir die werkwinkel verantwoordelik te wees moet seker maak—

- (i) dat die werkwinkel te alle tye skoon gehou word, en
- (ii) dat enige uitrusting wat gesweis moet word, met 'n vlam gesny of met 'n vlam verhit moet word, behoorlik skoongemaak word en vry van olie is.

(f) Indien die persoon wat aangestel word om vir die werkwinkel verantwoordelik te wees, die werkwinkel om watter rede ook al moet verlaat, moet hy eers seker maak dat alle gas- of elektriese sweis-, sny-, slyp-, vulkaniseer-, soldeer- of dergelike uitrusting buite werking gestel is en veilig toegesluit is in 'n kas of afdeling in die werkwinkel wat sterk gemaak is en waarvan hy die sleutel het.

(g) In elke sodanige werkwinkel moet 'n doeltreffende alarmstelsel geïnstalleer en in werkende orde gehou word om alarm in die werkwinkel te maak sodra die hoofwaaier, wat die werkplekke van lug voorsien waarin die werkwinkel geleë is, ophou om te werk. Wanneer so 'n alarm ontvang word, moet die gebruik van alle uitrusting vir die doeleindes beoog by paragraaf (b) van hierdie subregulasie, onmiddellik stopgesit word.

(h) Elke elektriese kragtoevoerkring in enige sodanige werkwinkel in, moet beheer word deur 'n stroombreker geleë hoogstens tweehonderd voet uitwaarts van die werkwinkel af in 'n intreklugbaan en elke sodanige stroombreker moet ingeboude uitklinkers vir „nulspanning”, „oorbelasting” en „aardlek-kasie” hê.

(i) 'n Waterslang wat lank genoeg is om vanaf 'n voldoende watertoevoer alle punte in die werkwinkel te bereik, moet aangesluit gehou word, gereed vir onmiddellike gebruik.

(j) Vir die doelbewuste voortbrenging van 'n boog of vonk om sweis- of snypype aan te steek in 'n werkwinkel wat kragtens paragraaf (b) van hierdie subregulasie goedgekeur is, mag slegs aanstekers van die wrywingtipe in die werkplekke ingeneem word vir gebruik in die werkwinkel. Aan iedere sodanige aansteker moet daar 'n uitkenningsmerk of -nommer wees en elke sodanige aansteker moet onder die handtekening van die bestuurder uitgereik word aan die bevoegde ingelyste persoon in paragraaf (d) van hierdie subregulasie bedoel. Hierdie aanstekers mag nie na of van die werkwinkel geneem word nie, behalwe persoonlik deur sodanige bevoegde ingelyste persoon.

(b) No welding, flame-cutting, grinding, vulcanising, soldering or similar equipment shall be taken into or used in the workings except in a workshop established with the permission of the Inspector of Mines under conditions approved by the Government Mining Engineer.

(c) Every application for the establishment of such workshop shall be made to the Inspector of Mines and shall be accompanied by—

- (i) three copies of a plan drawn to scale showing the location of the proposed workshop, its access roads and the quantity and direction of the ventilating air currents, and
- (ii) three copies of a drawing showing the design and construction of the proposed workshop and its compartments.

(d) Every such workshop shall be under the charge of a competent scheduled person who shall be appointed, in writing, by the manager and who shall have successfully completed a course on gases and gas-testing similar to that provided for by paragraph (c) of sub-regulation (7) of regulation 321.

(e) The person appointed to be in charge shall ensure that—

- (i) the workshop is kept clean at all times, and
- (ii) any equipment to be welded, flame-cut or flame-heated is properly cleaned and free from oil.

(f) If for any reason the person appointed to be in charge is required to leave the workshop, he shall first satisfy himself that all gas or electrical welding, cutting, grinding, vulcanising, soldering or similar equipment is rendered inoperative and is securely locked in a box or compartment of robust construction in the workshop and of which he has the key.

(g) In each such workshop an effective alarm system shall be installed and maintained in working order to give an alarm in the workshop whenever the main fan, which serves the workings in which the workshop is situate, ceases to operate. When such alarm is received the use of all equipment for the purposes contemplated under paragraph (b) of this sub-regulation shall cease forthwith.

(h) Each electric power-feed circuit into any such workshop shall be controlled by a circuit breaker situated not more than two hundred feet outbye of the workshop in an intake airway and every such circuit breaker shall incorporate effective “no-volt”, “overload” and “earth leakage” trips.

(i) A water hose of sufficient length to reach from an adequate water supply to all points in the workshop shall be kept connected and ready for immediate use.

(j) For the intentional creation of an arc or spark for the lighting of welding or cutting torches in a workshop approved of in terms of paragraph (b) of this sub-regulation, only lighters of the friction type may be taken into the workings for use in the workshop. Each such lighter shall bear a distinctive mark or number and shall be issued under signature of the manager to the competent scheduled person referred to in paragraph (d) of this sub-regulation. Such lighters shall not be taken to or from the workshop except personally by such competent scheduled person.

Hierby word bekend gemaak dat dit die Staatspresident kragtens die bevoegdheid hom verleen by artikel *twaalf* van die Wet op Myne en Bedrywe, 1956 (Wet No. 27 van 1956), behaag het om die regulasies opgestel ingevolge gemelde Wet gepubliseer by Goewermentskennisgewing No. R. 1609 van 28 September 1962, soos van tyd tot tyd gewysig, te wysig soos volg:—

Deur hoofstuk III in sy huidige vorm te skrap en te vervang deur:—

HOOFSTUK III.

BESKERMING IN DELFPLEKKE.

3.1 (1) Waar dit nodig is om verlate delfplekke of delfplekke wat nie meer gebruik word nie of waarin die werk gestaak is, binne te gaan of te verken, mag niemand sodanige delfplekke binnegaan of verplig of toegelaat word om sodanige delfplekke binne te gaan nie tot dat 'n ondersoek met behulp van geskikte middele uitgevoer is en daar gevind is dat die veiligheid van persone nie deur die aanwesigheid van 'n skadelike of ontvlambare gas of 'n atmosfeer waarin daar 'n gebrek aan suurstof is of 'n gevaarlike opgaring van water in gevaar gestel sal word nie.

(2) Alle skagte, strekgange, styggange, daalgange, afbouplekke en ander delfplekke wat vir loop, vervoer, of werk in verband met die werking van 'n myn gebruik word, moet veilig gemaak en gehou word vir die persone in die myn, en niemand mag in enige deel van sodanige delfplek loop, vervoer, of werk of verplig of toegelaat word om daarin te loop, vervoer of te werk nie totdat dit veilig gemaak is, uitgesonderd met die doel om dit te verken, te herstel of veilig te maak.

3.2 (1) Elke ingang tot verlate delfplekke of delfplekke wat nie meer gebruik word nie of waarin die werk gestaak is en wat skadelike of ontvlambare gas bevat of waarskynlik kan bevat of waarin daar 'n suurstofgebrek in die atmosfeer of 'n gevaarlike opgaring van water is of waarskynlik kan wees, moet behoorlik oor die hele wydte daarvan afgekamp gehou word ten einde te verhoed dat persone sodanige delfplekke onopsetlik binnegaan. Die Inspekteur van Myne mag gelas dat enige sodanige ingang verseël word met 'n muur of deur waarvan hy die ontwerp en konstruksie goedgekeur het.

(2) Elke ingang tot elke vertikale of steilhellende skag, daalgang, kuil, rotsstortbaan of ander gevaarlike uitgraving moet behoorlik met 'n omheining, versperring, deur of hek toegemaak gehou word of moet behoorlik bedek gehou word ten einde persone te verhoed om sodanige uitgraving onopsetlik binne te gaan of per ongeluk daarin te gly of daarin te val.

(3) (a) Niemand, uitgesonderd die bestuurder, mynopsigter of skofbaas, mag 'n omheining, versperring, hek, muur, deur of bedekking wat vir beskerming in delfplekke aangebring is, oorstek of oopmaak nie totdat die spanbaas of mynwerker of ander verantwoordelike persoon wat beheer daarvoor voer, hom uitdruklik gelas of toestemming gegee het om dit te doen.

(b) Die spanbaas of mynwerker of ander verantwoordelike persoon wat beheer voer, mag nie om omheining, versperring, hek, muur, deur of bedekking wat vir beskerming in delfplekke aangebring is, oorstek of oopmaak nie, of enigiemand verplig of toelaat om dit oor te steek of oop te maak nie, behalwe met die doel om herstelwerk of ander noodsaaklike werksaamhede te verrig en dan alleen indien doeltreffende voorsorgmaatreëls vir die veiligheid van persone getref is.

AMENDMENT OF REGULATIONS.

MINES AND WORKS ACT, 1956 (ACT No. 27 OF 1956).

It is hereby notified that the State President, under the powers vested in him by section *twelve* of the Mines and Works Act, 1956 (Act No. 27 of 1956), has been pleased to amend the regulations framed under the said Act and published under Government Notice No. R. 1609, dated 28th September, 1962, as amended from time to time, by the following amendment:—

By repealing Chapter III in its present form and substituting the following new Chapter III:—

CHAPTER III.

PROTECTION IN WORKINGS.

3.1 (1) Where it is necessary to enter or explore abandoned, disused or discontinued workings no person shall enter or be caused or permitted to enter such workings or any part thereof until an examination has been carried out by appropriate means and it has been found that the safety of persons will not be endangered by the presence therein of noxious or inflammable gas or an atmosphere deficient in oxygen or a dangerous accumulation of water.

(2) All shafts, drives, raises, winzes, stopes and other workings of any kind which are in use for travel or work in connection with the working of a mine shall be made and kept safe for persons in the mine and no person, except for the purpose of exploring or repairing or making safe, shall travel or work, or be caused or permitted to travel or work, in any part of such workings until it is made safe.

3.2 (1) Every entrance to abandoned, disused or discontinued workings which contain, or are likely to contain, noxious or inflammable gas or an atmosphere deficient in oxygen or a dangerous accumulation of water, shall be kept securely fenced across its whole width so as to prevent unintentional access of persons to such workings. The Inspector of Mines may direct that any such entrance shall be sealed by a wall or door of a design and construction approved by him.

(2) Every entrance to every vertical or steeply inclined shaft, winze, sump, rockpass or other dangerous excavation shall be kept properly closed by a fence, barrier, door or gate, or shall be kept adequately covered, so as to prevent persons having unintentional access to, or accidentally slipping or falling into, such excavation.

(3) (a) No person other than the manager, mine overseer or shiftboss shall cross or open any fence, barrier, gate, wall, door or cover provided for protection in workings until he has received definite instructions or permission so to do from the ganger or miner or other responsible person in charge.

(b) The ganger or miner or other responsible person in charge shall not cross or open, or cause or permit any person to cross or open, any fence, barrier, gate, wall, door or cover provided for protection in workings except for the purpose of conducting repairs or other necessary operations and then only if effective precautions for the safety of persons are taken.

3.3 (1) (a) In die delfplekke van 'n myn of deel van 'n myn waar die dak, dakwal of sywande na die mening van die Inspekteur van Myne van so 'n aard is dat dit stelselmatige bestutting vereis, mag hy te dien effekte aan die bestuurder kennis gee wat, in oorleg met die Inspekteur, die bestutting wat verskaf en die stelsel waarvolgens dit geplaas moet word, moet spesifiseer.

(b) Die bestuurder moet verseker dat alle betrokke persone in kennis gestel word van sodanige stelsel en dat kennisgewings wat die spesifikasies daarvan meld, op geskikte plekke opgeplak word waar dit maklik gelees kan word.

(c) Enigiemand wat versuim om aan die spesifikasies van sodanige stelsel te voldoen, begaan 'n oortreding.

(2) Indien die metode van dak, dakwal- en sywandbestutting in enige myn of deel van 'n myn na die mening van die Inspekteur van Myne onveilig is omrede die afstande tussen die stutte te groot is, of om 'n ander rede, mag hy deur middel van 'n skriftelike kennisgewing van die bestuurder vereis om die metode te verander.

(3) Waar die dak bros is, moet stutte voorsien word van kopplanke of moet 'n ander geskikte middel verskaf word wat 'n doeltreffende dravlak bied.

3.4 (1) Geen hout, rots, gereedskap of ander artikels mag geplaas word of laat bly word waar hulle per ongeluk in 'n vertikale of steilhellende uitgrawing kan af val of laat val word en aldus die veiligheid van persone in gevaar stel nie.

(2) Elke opening van uit 'n vertikale of steilhellende uitgrawing na 'n loopweg of werkplek aan die leer of hellingkant van sodanige uitgrawing, moet verskans gehou word sodat persone wat onderkant of naby sodanige opening loop of werk, doeltreffend beskerm word teen die gevaar van hout, klippe, gereedskap of ander artikels wat daaruit mag val of rol.

3.5 (1) Niemand mag in die ondergrondse delfplekke van 'n myn ingaan of daarin bly of verplig of toegelaat word om daarin te gaan of te bly nie tensy hy 'n harde hoed dra wat in 'n goeie toestand en van 'n tipe is wat deur die Staatsmyningenieur goedgekeur is.

(2) In dagboudelfplekke mag niemand 'n vertikale of steilhellende front of sywand wat vertikaal hoër as tien voet is, binnegaan of daar of in die nabyheid daarvan bly of verplig of toegelaat word om dit binne te gaan of daar of in die nabyheid daarvan te bly nie tensy hy 'n harde hoed dra wat in 'n goeie toestand en van 'n tipe is wat deur die Staatsmyningenieur goedgekeur is.

(3) Die harde hoede wat ingevolge subregulasies (1) en (2) van hierdie regulasie vereis word, moet deur die bestuurder verskaf word. In die geval van 'n nie-ingelyste persoon moet sodanige hoed gratis verskaf word.

3.6 (1) Niemand mag in enige myn in of naby enige deel van die werkplek werk of toegelaat of verplig word om te werk nie waar hy onopsetlik kan gly of sy ewewig verloor en as gevolg daarvan langs 'n skuinste wat 'n hellingshoek van vyf-en-veertig grade of meer met die horisontale vlak vorm kan afgly of val of vertikaal kan afval, tensy hy met 'n reddingstou vasgemaak of op 'n ander manier beveilig is.

(2) Die gebruik van reddingstoue ingevolge subregulasie (1) van hierdie regulasie is nie verpligtend in die geval van persone wat uitrusting in 'n vertikale skag of vertikale daalgang installeer of herstel nie; met dien verstande dat die bestuurder of mynopsigter sy toestemming daartoe verleen het nadat hy homself daarvan oortuig het dat—

(a) die gebruik van reddingstoue deur die betrokke persone hulle sal belemmer by die veilige verrigting van sodanige werk, en

(b) sodanige persone die nodige opleiding en ondervinding gehad het om sodanige werk veilig te verrig, en

(c) enigiemand, wanneer hy sodanige werk verrig en nie met 'n reddingstou vasgemaak is nie, onder die onmiddellike toesig van 'n bevoegde ingelyste persoon staan.

3.3 (1) (a) In the workings of any mine or part of a mine where in the opinion of the Inspector of Mines the roof, hanging or sidewalls are of a nature requiring systematic support he may give notice to that effect to the manager who, in consultation with the Inspector, shall specify the support to be provided and the system according to which it shall be placed.

(b) The manager shall ensure that all persons concerned are made aware of such system and that notices setting out its specifications are posted up at suitable places where they can conveniently be read.

(c) Any person who fails to comply with the specifications of such system shall be guilty of an offence.

(2) If, in the opinion of the Inspector of Mines, the method of supporting the roof, hanging and sidewalls in the workings of any mine or part of a mine is unsafe either by reason of the distances between supports being excessive or otherwise, he may by notice in writing require the manager to modify the method.

(3) Where the roof or hanging is friable, props shall be provided with head boards, or other suitable means shall be provided to present an adequate bearing surface.

3.4 (1) No timber, rock, tools or other articles shall be placed or allowed to remain where they accidentally can fall or be caused to fall down any vertical or steeply inclined excavation and thereby endanger the safety of persons.

(2) Every opening from a vertical or steeply inclined excavation into a travelling way or working place situated on the lower or dip side of such excavation shall be kept barricaded so that persons travelling or working below or near such opening are effectively protected against danger from the falling or rolling of timber, stones, tools or other articles.

3.5 (1) No persons shall enter or remain in, or be caused or permitted to enter or remain in, the underground workings of a mine unless he wears a hard hat in good condition and of a type approved by the Government Mining Engineer.

(2) In opencast workings no person shall enter or remain at or near, or be caused or permitted to enter or remain at or near, any vertical or steeply inclined face or sidewall which exceeds a vertical height of ten feet unless he wears a hard hat in good condition and of a type approved by the Government Mining Engineer.

(3) Hard hats required in terms of sub-regulations (1) and (2) of this regulation shall be supplied by the manager. In the case of a non-scheduled person such hat shall be provided free of cost.

3.6 (1) At any mine no person shall work or be caused or permitted to work in or near any part of the workings where inadvertent slipping or overbalancing may result in his sliding or falling down any slope that has an inclination from the horizontal of forty-five degrees or more, or in his falling vertically, unless he is secured by a life-line or otherwise safeguarded.

(2) The use of life-lines in terms of sub-regulation (1) of this regulation shall not be compulsory in the case of persons who are engaged in installing or repairing equipment in a vertical shaft or in a vertical winze provided the manager or mine overseer has given permission thereto after having satisfied himself that—

(a) the use of life-lines by the persons concerned would impede such persons in the safe performance of such work, and

(b) such persons have had the training and experience necessary to carry out such work safely, and

(c) any such person when engaged in such work and not secured by a life-line is under the immediate supervision of a competent scheduled person.

(3) Niemand mag 'n opgaring van water in die delfplekke van 'n myn, uitgesonderd 'n opgaring bekend as onbeduidend, binnegaan of verplig of toegelaat word om dit binne te gaan nie tensy hy aan 'n reddingstou vasgemaak is of 'n reddingsgordel dra.

3.7 (1) By dagboufront werkplekke en wanneer slote, putte of uitgrawings in sand, grond, gruis, klei, uitskot, slyk, as, puin of dergelike grond of afsetting gegrawe word en wanneer sodanige grond of afsetting van enige hoop of uit enige dam verwyder word—

- (a) mag geen persoon die front of sywand of enige gedeelte van 'n hoop of dam wat uit sodanige grond of afsetting bestaan, ondergrawe nie tensy die Inspekteur van Myne hom toelaat om dit te doen op voorwaardes wat hy mag voorskryf;
- (b) moet die front of sywand bokant die vlak waar persone moontlik mag werk of loop, behoudens die toelating in paragraaf (a) van hierdie subregulasie, met 'n veilige hoek afgeskuins of van terrasse voorsien word of voldoende gesteun word waar die vertikale hoogte van sodanige front of sywand—
 - (i) tien voet hoër is, of
 - (ii) laer as tien voet maar hoër as vyf voet is indien die wydte van die aangrensende oop werk- of loopplek minder is as die vertikale hoogte van die front of sywand.

(2) In enige dagboufrontdelfplek of groef moet alle puin of ander los materiaal en klippe op die oppervlakte tot 'n afstand van minstens tien voet van die rand van sodanige dagboufrontdelfplek of groef verwyder word.

3.8 (1) (a) Die bestuurder moet verseker dat die opmeter te alle tye kennis dra van die werkfronte wat vooruitgedryf word.

(b) Die opmeter moet die bestuurder skriftelik daarvan verwittig wanneer die werkfront van 'n delfplek tot binne eenhonderd voet van—

- (i) enige delfplek waar werk gestaak is; of
 - (ii) enige plek aan die oppervlakte waar daar 'n opgaring van water mag wees,
- vooruitgedryf word of vooruitgedryf word sodat dit binne eenhonderd voet daarvan kom.

(c) Waar sodanige delfplek of uitgrawing verlaat is, nie gebruik word nie of die werk daarin gestaak is, en 'n gevaarlike opgaring van water of skadelike of ontvlambare gas bevat of waarskynlik kan bevat, of waar daar 'n gevaarlike opgaring van oppervlaktewater by sodanige plek is, moet die bestuurder die opmeter skriftelik daarvan verwittig.

(d) Voordat die werkfront van 'n delfplek wat vooruitgedryf word, 'n afstand van vyftig voet bereik van enige plek af waar daar 'n gevaarlike opgaring van water of skadelike of ontvlambare gas is of waarskynlik kan wees, moet die opmeter die bestuurder skriftelik van die ligging van die werkfront met betrekking tot sodanige plek in kennis stel.

(2) Waar die werkfront van die delfplek 'n afstand van vyftig voet van enige plek af bereik waar daar 'n gevaarlike opgaring van water of skadelike of ontvlambare gas is of waarskynlik kan wees—

- (a) moet die bestuurder—
 - (i) die afmetings van sodanige delfplek laat beperk tot hoogstens agt voet in breedte en agt voet in hoogte of sodanige groter afmetings wat die Inspekteur van Myne mag toelaat;
 - (ii) behoorlik gerigte boorgate, voldoende in getal en lengte, van sodanige delfplek af laat boor ten einde genoegsame waarskuwing van die aanwesigheid van die water of gas te gee;
 - (iii) sodanige bykomende voorsorgmaatreëls laat tref as wat, na gelang van omstandighede, nodig mag wees om die veiligheid van persone te verseker;
- (b) is die opmeter verantwoordelik vir die korrekte aanbring van die opmeetpenne wat nodig is vir die opmeting van die rigting en helling van sodanige delfplek en moet hy die bestuurder skriftelik van die juiste betrokke opmetingsgegevens voorsien.

(3) No person shall enter or be caused or permitted to enter an accumulation of water in the workings of a mine, other than an accumulation known to be insignificant, unless he is secured by a life-line or wears a life-jacket.

3.7 (1) In open face working and when digging trenches, pits or excavations in sand, soil, gravel, clay, tailings, slimes, ash, debris or similar ground or deposit and when removing any such ground or deposit from any dump, dam or heap—

- (a) no person shall undercut the face or sidewall or any portion of a dump, dam or heap consisting of such ground or deposit unless permitted by the Inspector of Mines and under such conditions as he may prescribe;
- (b) except as permitted in paragraph (a) of this sub-regulation, the face or sidewall above the level where persons may work or travel shall be sloped or terraced back at a safe angle or adequately supported where the vertical height of such face or sidewall is—
 - (i) ten feet or more, or
 - (ii) less than ten feet but more than five feet if the width of the adjacent working or travelling space is less than the vertical height of the face or sidewall.

(2) At any open face working or quarry all debris and other loose material and stones on the surface shall be cleared to a distance of at least ten feet from the edge of such open face working or quarry.

3.8 (1) (a) The manager shall ensure that the surveyor is at all times aware of the faces which are being advanced.

(b) The surveyor shall inform the manager in writing when the face of a working is being advanced within, or is being advanced so as to come within one hundred feet of—

- (i) any abandoned, disused or discontinued working or excavation, or
- (ii) any place on the surface where there may be an accumulation of water.

(c) Where such abandoned, disused or discontinued working or excavation contains or is likely to contain a dangerous accumulation of water or noxious or inflammable gas, or where there is a dangerous accumulation of water at such place on the surface, the manager shall by notice in writing inform the surveyor to that effect.

(d) Before the face of the working being advanced reaches a distance of fifty feet from any place where there is or is likely to be a dangerous accumulation of water or noxious or inflammable gas, the surveyor shall give the manager written notification of the position of the working relative to such place.

(2) Where the face of the working reaches a distance of fifty feet from any place where there is or is likely to be a dangerous accumulation of water or noxious or inflammable gas—

- (a) the manager shall cause—
 - (i) the dimensions of such working to be restricted to not more than eight feet in width and eight feet in height or to such greater dimensions as the Inspector of Mines may permit;
 - (ii) suitably directed boreholes to be drilled from such working sufficient in number and length to give ample warning of the water or gas;
 - (iii) such additional precautions to be taken as circumstances may indicate to be necessary to ensure the safety of persons;

(b) the surveyor shall be responsible for the correct establishment of the survey pegs necessary for the measurement, direction and inclination of such working and shall provide the manager with the correct relevant survey data in writing.

(3) Die voorsorgmaatreëls en verantwoordelikhede in subregulasie (2) van hierdie regulasie genoem, bly van toepassing totdat 'n deurbraak bewerkstellig is of totdat die werkfront van die delfplek buite 'n afstand van vyftig voet van sodanige plek af gevorder het.

(4) Vir die toepassing van hierdie regulasie beteken „opmeter” 'n persoon wat ooreenkomstig regulasie 108 aangestel is. In die geval van 'n myn waarvoor geen opmeter ooreenkomstig regulasie 108 aangestel is nie, aanvaar die bestuurder die verantwoordelikhede van die opmeter ingevolge hierdie regulasie.

(5) Wanneer skagte gesink word of onsluitingstonnels vooruitgedryf word deur grond wat opgarings water, wat 'n gevaar kan wees, bevat of waarskynlik kan bevat, moet die bestuurder behoorlik gerigte boorgate, voldoende in getal en lengte, vanaf sodanige skag of onsluitingstonnel laat boor ten einde genoegsame waarskuwing van die aanwesigheid van water te gee en moet hy dié bykomende voorsorgmaatreëls laat tref wat, na gelang van omstandighede, nodig mag wees om die veiligheid van persone te verseker.

3.9 (1) Aan die binnekant van die grenslyne van elke myn moet onafgebroke pilare staande gelaat word, waarvan die breedte in steenkoolmyne minstens vyftig voet en in metaalhoudende en diamantmyne minstens dertig voet moet wees, reghoekig vanaf die grenslyn gemeet op die vlak van die rif of ander formasie: Met dien verstande dat, in die geval van dagbouwerkplekke in enige myn, die wydte van sodanige pilaar minstens dertig voet moet wees, horisontaal en reghoekig van die grenslyn af gemeet.

(2) Niemand mag sodanige grenspilare myn of verplig of toegelaat word om hulle te myn nie tensy hy ooreenkomstig subregulasie (3) of (4) van hierdie regulasie toestemming daartoe verkry het.

(3) Indien die eienaars van aangrensende myne gesamentlik daarom aansoek doen, mag die Inspekteur van Myne toestemming verleen om die betrokke grenspilare deur te sny of te delf op dié voorwaardes wat hy skriftelik mag stel.

(4) Indien sodanige gesamentlike aansoek ontbreek, mag die Staatsmyningenieur toestemming verleen om sodanige pilare te delf of deur te sny op dié voorwaardes wat hy skriftelik mag stel.

(3) The precautions and responsibilities set out in sub-regulation (2) of this regulation shall continue until a holing is effected or until the face of the working passes beyond a distance of fifty feet from such place.

(4) For the purpose of this regulation the term surveyor shall mean a person appointed in terms of regulation 108. In the case of a mine for which no surveyor has been appointed in terms of regulation 108, the manager shall assume the responsibilities of the surveyor under this regulation.

(5) Whenever, shafts are being sunk or headings advanced through ground which contains or is likely to contain accumulations of water which may constitute a danger, the manager shall cause suitably directed boreholes to be drilled from such shaft or heading, sufficient in number and length to give ample warning of the presence of the water, and shall cause such additional precautions to be taken as circumstances may indicate to be necessary to ensure the safety of persons.
