DEPARTMENT OF PUBLIC HEALTH.

The following Government Notices are published for general information:—

✱ No. 244.] [21 February 1936.

COUNCIL OF PUBLIC HEALTH.

A meeting of the Council of Public Health, established under section *four* of the Public Health Act, No. 36 of 1919, was held at Capetown on the 10th and 11th January, 1936, the following being present:—

Sir E. N. Thornton, Secretary for Public Health and Chief Health Officer for the Union (Acting Chairman); Mrs. S. B. Broers; Sir Spencer Lister; Dr. K. Bremer, M.P.; Mr. L. C. Serrurier; Dr. A. J. Orenstein, C.M.G.; Dr. C. P. Theron; Dr. P. J. du Toit and Mr. A. Stuart, Secretary.

Dr. F. C. Wilmot, Senior Assistant Health Officer, Capetown, was present on the invitation of the Minister.

INTERNATIONAL HEALTH MATTERS.

At the previous meeting the Council noted with approval the Government's intention to hold a further International Health Conference in the Union towards the end of 1935 to be convened by the Health Committee of the League of Nations, to discuss various matters relating to public health administration and protection against epidemic diseases. The Conference duly took place at Johannesburg from the 19th to 30th November, 1935, and certain resolutions in regard to yellow fever, plague, malaria, typhus, the typhoid carrier problem in Africa, the danger of locust campaigns, animal diseases communicable to man, etc., and also resolutions in regard to hygiene and medical services in rural areas which were of general application throughout Africa were passed. They also passed certain proposals for the better co-ordination of health services in Africa. The resolutions and the final report will be published in Geneva in the League of Nations Quarterly Journal.

NATIONAL HEALTH MATTERS.

Bilharzia.

The results of the Anti-bilharzia campaign were discussed and *inter alia* correspondence between a private medical practitioner on the subject of the medical treatment of this disease was considered.

The Council passed the following resolutions:—

(1) " This Council recommends that investigation of the treatment of bilharzia, carried out by independent medical practitioners in hospital, where such cases are available, with STIBILOSE and TRYSTIBINE, be undertaken, but it desires to point out that the eradication of bilharzia by wholesale treatment is an impracticable proposition,"

(2) „ Dit is die mening van hierdie Raad dat die uitroeiing van bilharzia afhanklik is van die voorbehoedmaatreëls wat reeds in sommige dele bekend en in gebruik is, maar verder ondersoek in hierdie rigting is gerade om seker te maak dat die beste resultate by die behandeling van lyers verkry word, en dat die mediese professie in die aangetaste streke op die hoogte gehou moet word ten opsigte van alle vordering in verband met die behandeling van die siekte."

Runder-tuberkulose.

'n Memorandum bevattende 'n skema vir die uitroeiing van tuberkulose by vee, wat deur die Veeartsenyafdeling, Departement van Landbou, aan die Regering voorgelê is, is bespreek en die volgende resolusie goedgekeur:—

„ Terwyl erken word dat runder-tuberkulose moontlik vereers nie 'n ernstige gevaar vir die mens in Suid-Afrika vorm nie, steun hierdie Raad die voorstel van die Veeartsenyafdeling, met inagneming van die moontlikheid van 'n dergelike besmetting en in die oortuiging dat die uitroeiing van tuberkulose by vee uit die standpunt van die landbou noodsaaklik is."

Distriksverpleging en Beskikbare Verpleegsters.

Die oorsake van die bestaande tekort aan verpleegsters is bespreek en die volgende besluit is geneem:—

" Met die oog op die erkende tekort aan verpleegsters oor die hele Unie, is hierdie Raad van mening dat, waar nodig en waar daar geen verpleegsters wat in Suid-Afrika gebore is beskikbaar is nie, hospitaalbesture, as tydelike maatreël, die beleid moet volg van verpleegsters van oorsee te kry om in die tekort te voorsien."

Anestetiek.

Die sterfgevalle onder die verskillende verdowingsmiddels soos gepubliseer in die Jaarverslag van die Departement van Volksgesondheid vir 1934-35, is ontleed en die Raad het die sienswyse aanvaar dat die ernstigheid van die toestand nie besef word nie en dat iets behoort gedoen te word om die huidige toestand van sake te verbeter. Die volgende resolusie is aangeneem:—

„ Met die oog op die ernstigheid van die toestand is hierdie Raad van mening dat sonder versuim 'n deskundige ondersoek deur 'n klein komitee ingestel moet word."

Liggaamsoefening.

Die hele onderwerp van liggaamsoefeninge in skole en elders in Suid-Afrika is bespreek en die volgende besluit is geneem:—

„ Hierdie Raad meen dat gedurende die hele skoolperiode instruksie in liggaamsoefeninge soveel moontlik algemeen behoort gemaak te word."

Onder andere is ook die volgende sake bespreek:—

Geelkoors.

Die toestand betreffende geelkoors is oorweeg. Die Unie het geen onmiddellike rede vir vrees nie, alhoewel die toestand blykbaar aandui dat die siekte verder ooswaarts op die vasteland van Afrika bestaan as wat voorheen vermoed, is aangesien 'n geval voorgekom het naby Wau, nie ver van Juba, een van die lughawens van Imperial Airways, nie. Verder is ook opgemerk dat 'n onlangse ontdekking van geelkoors in Brasilië deur die Rockefeller Foundation, getoon het dat die siekte deur 'n vektor in die boswêreld oorgedra kan word en nie alleen deur die huismuskiet nie, waarvan in die verlede gedink is dat dit feitlik die enigste vektor van belang was. Vir sover dit die Unie betref, is daar op die oomblik geen werkelike gevaar nie, alhoewel die moontlikheid dat boswêreldgeelkoors (indien dit in Afrika bestaan) deur Oeganda en Kenia na die suide uitbrei, in gedagte gehou moet word.

Die Lugvaartgesondheidswet.

Regulasies ingevolge die Wet is uitgevaardig en die Randse Lughawe en die Vliegveld te Walvisbaai is, ingevolge Wet No. 7 van 1935, tot gesondheids-vliegvelde vir die Unie geproklameer ooreenkomstig die bedoeling van die Internasionale Konvensie vir die Gesondheidskontrole van die Lugvaart, wat deur die Unie van Suid-Afrika onderteken is.

Pes.

Die pestoestand is bespreek en die maatreëls deur die departement getref vir die bestryding van die siekte, is ten volle oorweeg. Daar is op gewys dat ingevolge die regulasies wat uitgevaardig is, boere en andere verplig is om hul eiendomme vry van knaagdiere te hou en dat alle onkoste daaraan verbonde deur die betrokkenes self gedra moet word. Na volledige oorweging was die Raad nie bereid om aan te beveel dat deur die Departement meer as die reeds verstrekte hulp verskaf moet word nie. Enige boer kan teen baie geringe koste sy gesin beveilig deur 'n stelselmatige beroking van sy buitegeboue en van die gate van springhaasrotte in die onmiddellike omgewing van sy huis.

Tuberkulose.

Die Jubileumfonds is bespreek. Die totale bedrag ontvang, met inbegrip van die bydrae van die Regering van £10,000, was ongeveer £100,000. Verskillende lede het die mening geuit dat meer gedoen moes word om die Fonds uit te brei.

(2) " This Council is of opinion that the eradication of bilharzia must rest on measures of prevention already known and used in some parts, but further investigation in this direction is advisable in order to ensure that the best results in the treatment of sufferers are obtained and that the medical profession in the affected areas should be kept informed of all advances in the treatment of the disease."

Bovine Tuberculosis.

A memorandum containing a scheme for the eradication of tuberculosis in cattle submitted to the Government by the Veterinary Division, Department of Agriculture, was considered and the following resolution was agreed to:—

" While recognising that bovine tuberculosis is perhaps not a serious menace at present to man in South Africa, this Council, bearing in mind the possibility of such infection, and satisfied that the eradication of tuberculosis in cattle is essential from the standpoint of the agricultural industry supports the proposals put forward by the Veterinary Division."

District Nursing—Supply of Nurses.

The causes of the existing shortage of nurses were discussed and the following resolution was passed:—

" In view of the undoubted shortage of nurses throughout the Union, this Council is of opinion that where necessary and where no suitable South African born nurses are available hospital authorities should adopt as a temporary measure the policy of obtaining overseas nurses in order to combat this shortage."

Anaesthetics.

The deaths under the different anaesthetics as published in the Annual Report of the Public Health Department for 1934-35 were analysed and the Council took the view that the seriousness of the position was not appreciatel and that something should be done to remedy the existing state of affairs. The following resolution was agreed to:—

" In view of the seriousness of the position this Council is of opinion that an expert investigation by a small committee be undertaken without delay."

Physical Culture.

The whole subject of physical culture in schools and elsewhere in South Africa was discussed and the following resolution was passed:—

" This Council is of opinion that instruction throughout school life by competent teachers in physical fitness should be made general as far as possible."

Amongst other matters discussed were the following:—

Yellow Fever.

The yellow fever position was considered. The Union had no immediate cause for alarm although the position appeared to be that the disease had been proved to exist further eastwards on the African Continent than had formerly been believed, a case having been found near Wau, not far from Juba, one of the airports on the Imperial airways route. It was also noted that a recent discovery in regard to yellow fever by the Rockefeller Foundation in Brazil had shown that the disease can be carried by a vector in the jungle and not only by the house mosquito which was believed in the past to have been practically the sole vector of importance. As far as the Union is concerned there was no real peril at present although the possibility of jungle yellow fever (if it existed in Africa) extending southwards through Uganda and Kenya had to be borne in mind.

The Aviation Health Act.

Regulations under the Act were promulgated and the Rand Airport and the Aerodrome at Walvis Bay were duly proclaimed under Act No. 7 of 1935 to be sanitary aerodromes for the Union within the meaning of the International Convention for the Sanitary Control of Aviation to which the Union of South Africa was a party.

Plague.

The plague position was discussed and the measures taken by the Department to combat the disease were fully considered. It was pointed out that under the regulations promulgated it is the duty of farmers and others to keep their premises free from rodents and that all expenditure incurred in connection therewith must be borne by the parties concerned. After full consideration the Council was not prepared to recommend that assistance further than that actually given should be rendered by the Department. Any farmer could at a very small expenditure render his household safe by systematically gassing his outhouses and gerbille burrows immediately around his house.

Tuberculosis.

The Jubilee Fund was discussed. The total amount received, including the Government's contribution of £10,000, was some £100,000. The opinion was expressed by several members that further efforts should be made to augment the Fund.

Die volgende verdere sake het onder die aandag van die Raad gekom:—

MARICO BOSVELD IRRIGATION SCHEME.

REGULATIONS.

Regulations framed under section nine *sub-section* (a) *of Act No.* 10 *of* 1932, *providing for the manner of regulating the flow of water into, the distribution from, and the use of water in, or from any part of the works; and for the proper control of the works and the functioning of the scheme.*

1. *Definitions.*

(*a*) In the regulations the term " Director " shall mean the Director of Irrigation or any person delegated by him to act as his representative.

(*b*) The Act shall mean the Marico Bosveld Irrigation Scheme Act, No. 10 of 1932.

(*c*) A community or community block shall be an area defined by the Director in which all the irrigable ground will be fed by one furrow or one furrow system known as a community furrow or community furrow system, and in which a single leading stream may be fed to the various pieces of ground on a time-rotation basis.

(*d*) A community furrow or community furrow system shall be a furrow or system of furrows within a community the function of which is to convey a leading stream to the various defined pieces of ground in the community apart from private leading furrows.

(*e*) A Feeder or Feeder Furrow shall mean a furrow subsidiary to the Main Canal the function of which is to convey water to more than one community or defined piece of ground.

2. *Division of Area into Communities or Defined Areas and the fixing of Community Furrow Systems.*

(*a*) The Director shall divide the land finally ascertained as the irrigable area as provided by section *five* (*a*) and (*b*) of the Act into communities and/or defined blocks.

(*b*) Within the communities and/or defined blocks referred to in the preceding paragraph (*a*) the Director shall decide upon and fix the furrow system which is necessary to carry irrigation water to the separate properties within the community or block; he shall further decide the course and sizes of community furrows.

In cases of dispute the Director shall have the right to decide what road crossings and other works shall form an integral part of the system.

3. *Responsibility for Construction, Maintenance and Operation.*

(*a*) The responsibility for the cost of construction and maintenance of authorized community furrow systems as described in 2 (*b*) or portion thereof, shall rest in the owners of the land in the community or block in the proportion of their ascertained irrigable area, and this liability shall similarly devolve upon their successors in title.

(*b*) Die Direkteur het die reg om die lewering van water aan enige gemeenskap of bepaalde stuk grond te weier, waarvan die vore nie in 'n toestand is om die stroom waarvoor hulle bestem is, behoorlik en sonder verspilling af te voer nie.

(*c*) Die Direkteur is nie verantwoordelik vir enige skade wat direk of indirek veroorsaak word deur enige gemeenskaplike voor, of voor wat 'n bepaalde stuk grond voed nie.

4. *Lewering van Water.*

(*a*) Besproeiingswater word gelewer in die hoofkanale en takvore, of gedeelte daarvan, gedurende periodes wat besproeiingsperiodes genoem word.

(*b*) Die tye en duur van die besproeiingsperiodes vir bepaalde oppervlaktes, word deur die Direkteur vasgestel, en hy moet van tyd tot tyd, op 'n wyse deur hom bepaal, die tydperke deur hom vasgestel, laat afkondig.

(*c*) 'n Skriftelike applikasie vir water wat gedurende 'n besproeiingsperiode benodig is ten opsigte van enige ingelyste oppervlakte moet aan die Direkteur, op so 'n wyse as deur hom voorgeskryf word, gerig word, en met 'n periode van kennisgewing d.w.s. die tyd tussen die aflewering van die applikasie en die aanvang van die besproeiingstydperk, soos deur die Direkteur vasgestel word. Die applikasie moet op die voorgeskrewe vorm gemaak word wat die vereiste besonderhede moet bevat, soos daarin aangegee is.

(*d*) Die Direkteur het die reg om applikasies met of sonder wysigings, toe te staan en ten einde binne die voorgeskrewe limietes te bly, doeltreffende en ekonomiese verdeling te bewerkstellig en reëlings te tref dat 'n voortdurende stroom in gemeenskaplike vore loop of na bepaalde stukke grond gedurende 'n tydtafelperiode ooreenkomstig die basis soos in die volgende paragraaf vasgestel.

(*e*) 'n Gemeenskap of 'n omskrewe stuk grond, sal dag en nag voorsien word van 'n min of meer konstante leistroom, soos deur die Direkteur redelik geag word, vir 'n tydsduur, genoem 'n tydtafelperiode, vir daardie gemeenskap of blok, en die verdeling aan eienaars geskied strik in volgorde. In spesiale gevalle kan die Direkteur die verdeling deur onderverdeling uit die leistroom laat geskied.

(*f*) Die tye en duur van die tydtafelperiodes vir gemeenskaplike en bepaalde stukke grond word deur die Direkteur vasgestel, en hy moet op 'n wyse soos deur hom bepaal, die aantal ure met vermelding van hoe laat tot hoe laat binne 'n tydtafelperiode, waarvoor die leistroom of 'n gedeelte daarvan toegeken is aan elke applikant ten opsigte van die verskillende gedeeltes grond binne die gemeenskap of blok, laat afkondig.

(*g*) Die hoeveelheid water toegeken aan enige ingelyste oppervlakte is soos dit gemeet of geskat word by die plek van lewering aan die gemeenskaplike voor of sisteem.

(*h*) Water binne 'n gemeenskaplike voor of sisteem, is vir die uitsluitlike gebruik van die besproeier of besproeiers volgens die toekenning uiteengesit in die geoutoriseerde tydtafel en enige onveroorloofde inbreuk op die stroom is 'n misdryf ingevolge artikel *tien* van die Wet.

(*i*) Op versoek van enig eienaar, stel die Direkteur hom in kennis van die hoeveelheid water wat aan sy ingelyste grond, gedurende enige bepaalde periode, toegeken word, met inagneming van die geskatte water wat beskikbaar is en die moontlikheid om in die waarskynlike aanvraag van die hele oppervlakte op 'n billike basis te voorsien.

(*j*) Elke besproeier is gedurende die periode wat water aan hom toegeken word, verantwoordelik vir die water aan hom toegeken; hy moet die water, sonder onnodige verspilling, gebruik, en is verantwoordelik vir die behoorlike beskikking oor die water wat van sy lande terugloop. Niemand mag 'n stroom in 'n Goewermensvoor terugkeer nie sonder die uitdruklike skriftelike toestemming van die Direkteur.

Elke besproeier in 'n gemeenskap moet by afloop van sy periode van toekenning dadelik ophou om water uit die gemeenskaplike voor te lei; hy moet alle uitlope van die gemeenskaplike voor na sy grond behoorlik toemaak, en hy moet alle sluise of ander versperrings, wat in die gemeenskaplike voor geplaas is om water na sy grond af te keer, verwyder. Versuim om die regulasies na te kom is 'n misdryf ingevolge artikel *tien* van die Wet.

(*k*) As 'n besproeier versuim om die water wat aan hom toegeken is ten opsigte van enige ingelyste oppervlakte gedurende 'n besproeiingsperiode, te gebruik, word dit, by oorweging van 'n billike verdeling tussen al die besproeiers en van sy totale jaarlikse gebruik, beskou dat hy die water gebruik het.

(*l*) As enige besproeier, deur sy eie handelwyse of die van enige ongeoutoriseerde persoon, ten opsigte van 'n ingelyste oppervlakte meer water verkry het as die hoeveelheid aan daardie oppervlakte toegeken, kan daardie hoeveelheid afgetrek word van enige hoeveelheid wat later aan daardie oppervlakte of enige ander ingelyste oppervlakte van hom, toegeken mag word.

(*m*) Die datum van aanvang van die besproeiingsjaar is 1 April, en die hoeveelheid wat per jaar verbruik word, word vanaf daardie datum bereken, afgesien van die hoeveelhede wat voor daardie datum verbruik is.

9. *Inlysting soos deur Onderverdeling en Verdeling van Water Geraak.*

(*a*) Eienaars wat hul grond wil onderverdeel moet die voorgestelde onderverdeling aan die Direkteur vir insae voorlê sodat gesorg kan word dat geen verlies van besproeibare grond ontstaan deur verlies van beheer weens gebrek aan servituutsbepalings.

(*b*) The Director shall have the right to refuse delivery of water to any community or defined block of land, the furrows of which are not in a condition to carry safely and without waste the flow for which they have been designed.

(*c*) The Director shall not be responsible for any damage resulting directly or indirectly from any community furrow, or furrow feeding a defined block of land.

4. *The Supply of Water.*

(*a*) Irrigation water shall be supplied into the Main Canals and Feeders, or portions thereof, during periods of time to be known as Irrigation Periods.

(*b*) The incidence and duration of the irrigation periods for specified areas shall be decided by the Director, and he will cause notification of the periods to be published from time to time in manner laid down by him.

(*c*) Application in writing for water required during an irrigation period in respect of any scheduled area shall be made to the Director in a manner prescribed by him, and with an amount of notice, i.e., a period of time between the delivery of the application and the commencement of the irrigation period, to be decided by him. That application shall be made on the prescribed form which must contain all the necessary particulars outlined thereon.

(*d*) The Director shall have the right to grant application with or without modifications in order to keep within prescribed limits, obtain efficient and economical distribution and to arrange for a continuous flow in community furrows, or to define blocks of land during a rotation period in accordance with the principle laid down in the following paragraph.

(*e*) In a community or to a defined block of land a more or less constant leading stream which the Director considers reasonable will be provided throughout day and night for a period of time, to be known as a rotation period, for that community or block, and the distribution to owners shall be on a true rotation basis.

In special cases the Director may cause distribution by subdivision of the leading stream.

(*f*) The Director shall decide upon the incidence and duration of rotation periods for communities and defined blocks of land and he shall cause notification to be published in a manner decided upon by him, of the number of hours and the actual hours within a rotation period for which the leading stream or a portion thereof is allotted to each applicant in respect of the various portions of land within the community or block.

(*g*) The quantity of water allotted to any scheduled area shall be as measured or estimated at the point of delivery to the community furrow or system.

(*h*) Water in a community furrow or system is for the sole use of the irrigator or irrigators according to the allotment on the authorized time table and any unauthorized interference with the flow shall constitute an offence under section *ten* of the Act.

(*i*) Any owner, at his request, will be advised by the Director as to the quantity of water allotted to his scheduled area during any particular period, considering the estimated water available and the possibility of meeting the probable demands of the whole area on an equitable basis.

(*j*) Each irrigator during the period of allotment shall be responsible for the water allotted to him. He shall use the water without undue waste, and shall be held responsible for the proper disposal of water returning from his lands.

No person shall divert a flow back into a Government Furrow without the express permission in writing of the Director. Each irrigator in a community shall on completion of his allotted period immediately cease leading water from the community furrow, shall cause all outlets from the community furrow on to his lands to be properly closed, and shall remove all gates or other obstructions which may have been placed in the community furrow for the purpose of turning water out on to his lands. Failure to comply with the regulations shall be deemed an offence under section *ten* of the Act.

(*k*) An irrigator who fails to use his allotment of water during an irrigation period in respect of any scheduled area shall be regarded as having used that water in considering an equitable destribution amongst all irrigators, and his total annual use.

(*l*) If any owner through his own or any unauthorized person's act shall have obtained more water in respect of a scheduled area than the quantity allotted to that area, that quantity may be deducted from any quantity which might subsequently be allotted to that area or any other scheduled area of his.

(*m*) The commencement date of the irrigation year shall be the 1st April and the quantity used per annum shall be reckoned from that date irrespective of quantities used previous to that date.

9. *Scheduling as affected by Subdivisions and Water Distribution.*

(*a*) Owners requiring to subdivide their area must submit the proposed subdivision to the Director for inspection so that it can be seen that no loss of irrigable land occurs by loss of command due to lack of servitude provisions.

(*b*) As 'n eienaar ten opsigte van enige bepaalde stuk grond, slegs 'n gedeelte van die hele oppervlakte wat onder beheer is, ingelys het, moet hy, wanneer hy daartoe van die Direkteur 'n kennisgewing ontvang, die posisie van die ingelyste oppervlakte, binne 'n tydperk wat deur die Direkteur vasgestel word, duidelik opgee en omskryf; by versuim van die eienaar om dit te doen, is die Direkteur geregtig om die posisie van die ingelyste oppervlakte te bepaal, en die posisies aldus bepaal moet vir alle latere doeleindes aanvaar word.

(*c*) Indien die vasgestelde besproeibare oppervlakte van 'n bepaalde stuk grond binne meer as een gemeenskap of bepaalde blok val, en slegs 'n gedeelte van die vasgestelde besproeibare oppervlakte ingelys is, moet die eienaar, wanneer hy dartoe van die Direkteur 'n kennisgewing ontvang, die juiste oppervlaktes wat in elke afsonderlike gemeenskap of blok ingelys moet word, binne 'n tydperk wat deur die Direkteur vasgestel word, duidelik opgee; by versuim van die eienaar om dit te doen, is die Direkteur geregtig om daaromtrent te beslis en die oppervlakte wat in elke gemeenskap of blok ingelys moet word, vas te stel, en die posisie aldus bepaal moet vir alle latere doeleindes aanvaar word.

(*d*) Waterregte word afsonderlik behandel ten opsigte van elke oppervlakte, ingelys ooreenkomstig die voorgaande paragraaf, wat in een gemeenskap of blok omvat is, en alle applikasies vir, en toekennings van water word gemaak ten opsigte van sodanige afsonderlik ingelyste oppervlaktes. Geen waterreg, wat aan enige bepaalde stuk grond of aan enige ingelyste oppervlakte binne 'n gemeenskap of blok, soos in paragraaf 9 (*c*) bepaal, toekom, mag aan enige ander bepaalde stuk grond of ingelyste oppervlakte binne enige ander gemeenskap, oorgedra word nie.

11. *Gebruik van Water.*

(*a*) Die water uit die kanale gelewer, mag vir primêre doeleindes en vir besproeiing gebruik word.

Die stroom in die kanale word egter voor alles vir die doel van besproeiing gereël.

Tussen besproeiingsperiodes kan die Direkteur met tussenpose, wat hy redelik ag, 'n stroom vir primêre doeleindes toelaat, maar aangesien dit onmoontlik is om 'n voortdurende stroom te waarborg, en aangesien daardeur verspilling ontstaan, word besproeiers aangeraai om vir minstens drie weke vir die bewaring van water vir primêre doeleindes, voorsiening te maak.

Die gebruik van water vir enige ander doel as dié hierin vermeld, word nie toegelaat nie, behalwe met spesiale skriftelike toestemming van die Direkteur en onder sodanige voorwaardes as wat voorgeskryf mag word.

(*b*) Baai of was in die kanale, of die besoedeling van water op enige wyse, is verbode, en is 'n misdryf ingevolge artikel *honderd drie-en-dertig* (1) (*b*) van die Besproeiings en Waterbewarings Wet No. 8 van 1912.

(*c*) Niemand mag sy diere in die hoofkanale of in takvore, of in enige gemeenskaplike voor laat suip nie op 'n plek waar die water na ander partye gelei word.

Op plekke, en onder voorwaardes deur die Direkteur goedgekeur, mag 'n ingelyste eienaar toegelaat word om water vir primêre doeleindes tot 500 gellings per dag, op ander tye as dié wat hom vir besproeiing toegeken is, uit die vore te onttrek.

12. *Dreinering.*

Die Direkteur het die reg om enige dreineringswerke wat hy nodig mag ag vir beskikking oor syferwater, ens., te maak, of om te voorkom dat die grond versuip, en hy kan enige eienaar oor wie se grond die drein mag loop, gelas om so 'n drein in goeie en doeltreffende orde te hou, by versuim waarvan die werk deur die Departement gedoen en die koste op die eienaar verhaal kan word.

(*b*) When an owner in respect of any defined piece of ground has scheduled a portion only of the total area commanded he shall if required by and on notification by the Director, declare and define exactly the position of the scheduled area within a period decided upon by the Director, and failing such definition by the owner, the Director shall have the right to define the position of the scheduled area, and the positions thus defined shall be accepted for all future purposes.

(*c*) Where the ascertained irrigable area of a defined piece of ground falls in more than one community or defined block, and a portion only of the ascertained irrigable area is scheduled, the owner shall if required by, and on notification by the Director declare the exact areas to be scheduled in each separate community or block within a period decided upon by the Director, and failing such declaration by the owner, the Director shall have the right to decide upon and fix the areas to be scheduled under each community or block and the position thus defined shall be accepted for all future purposes.

(*d*) Water rights will be treated separately in respect of each area scheduled in accordance with the preceding paragraph and contained in one community or block only, and all applications for and allotments of water shall be made in respect of such individually scheduled areas. No water right which is due to any defined piece of ground or to any scheduled area within a community or block as defined in paragraph 9 (*c*) shall be transferable to any other defined piece of ground or area scheduled in any other community.

11. *Uses of Water.*

(*a*) The water delivered from the canals may be used for primary purposes and for irrigation.

The flow of the canals will, however, be arranged primarily to meet irrigation requirements.

Between irrigation periods the Director may at intervals which he considers reasonable allow a flow for primary purposes, but as it is impossible to guarantee a continuous flow, and as it is wasteful to do so, irrigators are advised to provide for at least three weeks storage for primary purposes.

The use of water for any purpose other than mentioned herein is not permitted except on special permission in writing from the Director and under such conditions as may be prescribed.

(*b*) Bathing or washing in the canals or the pollution of the water in any manner is prohibited and will be deemed an offence in terms of section *one hundred and thirty-three* (1) (*b*) of the Irrigation and Conservation of Waters Act, No. 8 of 1912.

(*c*) No person shall be allowed to water his animals in the main canals or feeders or any community furrow at a point where its function is to carry water to other parties. At places and under conditions approved by the Director a scheduled owner may be allowed to abstract from furrows up to 500 gallons per day for primary purposes at times other than those allotted to him for irrigation.

12. *Drainage.*

The Director shall have the right to construct any drains which he may deem necessary for dealing with seepage water, etc., or for the prevention of water-logging of land, and shall have the right to call upon any owner, through whose land the drain may run, to maintain the drain in good and and efficient order failing which the work may be done by the department and the costs recovered from the owner.

MALARIA.

Natal en Zoeloeland.—Warm en vogtige weerstoestande is algemeen oor die hele Natalprovinsie en Zoeloeland. Die onlangse swaar reëns het baie sypelings en poele veroorsaak wat die uitbroeiing van *A. gambiae* bevorder.

Alhoewel die heersing van muskiet-vektors nog steeds tot sekere gunstige plekke beperk is, moet die toestand oor die algemeen skerp dop gehou, en die maatreëls deur die departement aanbeveel vir die bestryding van larwe en muskiete, uitgevoer word. Geen nuwe gevalle van malaria is gerapporteer nie.

Transvaal.—As gevolg van toestande in alle malaria-streke van Transvaal wat vir die uitbroeiing van muskiete gunstig is, maak *A. gambiae* (die soort wat in modderpoele uitbroei) in klein getalle sy verskyning. Flinke reëns duur voort en die verspoelende uitwerking op die uitbroeiing van *A. funestus* in riviere en strome is nog merkbaar.

Enige gevalle van nuwe besmetting het voorgekom.

EPIDEMIESE SIEKTES IN ANDER LANDE.

Volgens die jongste berigte is daar:—

Outbreaks are being dealt with in the Districts of Cathcart, Queenstown, Tsolo (Cape); Bothaville, Harrismith, Heilbron (Orange Free State); Johannesburg, Wakkerstroom (Transvaal).

MALARIA.

Natal and Zululand.—Warm and humid weather conditions are prevailing generally throughout the Province of Natal and Zululand. The recent heavy rains have created numerous seepages and puddles favouring the breeding of *A. gambiae*. Although the prevalence of mosquito vectors is still confined to certain favourable localities it is necessary to keep a close watch on the position generally and to carry out the anti-larval and anti-adult measures recommended by the Department. No fresh cases of malaria have been reported.

Transvaal.—Due to conditions favourable to mosquito breeding throughout the malarial areas of the Transvaal the puddle breeder, *A. gambiae*, is making its appearance in small numbers. Good rains continue and the flushing effects on *A. funestus* breeding in rivers and streams are still apparent. A few cases of new infection have occurred.
