4. The Administration shall not be liable for any failure to supply water or any defect in the quality of the water supplied.

5. The inspector or any authorised person may at any reasonable time, or in the case of emergency at any time, enter upon any premises for the purpose of inspecting the service, connection pipe, main or meter, or making any investigation or asking any reasonable questions, and any person who wilfully resists or otherwise obstructs any such officer in the execution of his duty or who refuses to give any information shall be guilty of a breach of these regulations.

7. The local authority or any authorised person may cut off the water supply of any consumer whose account for water is overdue or who has infringed or broken any of these regulations, without prejudice to any penalties which may be recoverable under these regulations, and the Administration may recover the expenses incurred in cutting off such water, and in recovering any sum due to it.

8. In the event of the Administration at any time resuming the supply to such consumer, he shall pay the Administration the whole cost of reconnection and resumption of supply.

9. No person shall sell any water supplied to him by the Administration, nor shall any person take away or suffer to be taken away from his premises any such water.

10. Any person who shall fail to comply with any notice or order duly given or made under these regulations shall be deemed to have committed a breach of these regulations.

11. Any owner or occupier having or using upon his premises, and any person providing, fixing, causing or suffering to be fixed upon any premises any service or part thereof or any meter or any apparatus which fails to comply with the requirements of these regulations shall be deemed to have committed a breach thereof.

12. No person shall allow waste, undue consumption, or misuse of water supplied by the Administration, and no person shall wilfully or negligently allow any pipe or apparatus to be out of order or repair which is likely to waste water.

13. No person shall use any water for any other purpose than that for which he has contracted with the Administration.

14. Any breach of these regulations committed on any premises shall be deemed to be a breach by the consumer.

15. Books shall be kept in the office of the local authority showing the revenue derived from the sale of water, rentals, penalties, etc., and the expenditure incurred in maintenance, wages, etc., from and including the day on which these regulations and the tariff prescribed in Schedule I hereto shall come into force.

16. Any person wishing to be supplied with water by the Administration shall send in to the local authority a signed application upon the form prescribed in Schedule II hereto and obtainable at the office of the local authority.

17. No person who has not applied on the prescribed form for a supply of water and otherwise complied with the requirements of these regulations shall take any water from or make any connection with any main, reservoir, conduit pipe, cistern or other place containing water belonging to the Administration other than at such public standpipes as the Administration may from time to time erect.

18. The local authority may at any time limit the supply of water to such hours as he may decide and may prohibit water supplied by the Administration being used for any purpose other than domestic.

19. Any person using water during prohibited hours or for purposes other than domestic, after public notification of prohibition by the local authority, shall be deemed to have committed a breach of these regulations.

20. All premises supplied with water by the Administration shall have their own separate communication pipe, and no premises shall have more than one such pipe except by special arrangement with the local authority: Provided always that the owner or occupier of any group or block of houses who undertakes to pay for the water supplied to each consumer comprising such group or block may, with the written permission of the local authority, have one communication pipe for the supply of such group or block. Where more than one house is supplied from a communication pipe, a stopcock shall be placed on each branch pipe leading therefrom to each such house for the purpose of turning off the supply of water to such premises.

21. The Administration will provide and lay down a communication pipe from the main to the boundary of a consumer's premises on payment, in advance, of the sum laid down in the tariff of charges.

22. Failing any agreement to the contrary, the internal diameter of any communication pipe shall not exceed three quarters of an inch.

23. In cases where supplies for building purposes are laid on upon the application of any owner or contractor the cost of providing and fixing the communication pipe shall be borne by such owner or

contractor and a meter shall be fixed to a connection pipe, and such owner or contractor shall pay for water so supplied according to the tariff as in force from time to time, and such communication pipe, if in the opinion of the local authority it is suitable for the purpose, may be used for the permanent supply of the premises when completed, but no connection shall be made with the service until all the provisions of these regulations have been complied with.

24. Every consumer shall, at his own cost, provide, lay down and maintain his own service: Provided always that the Administration may, at its discretion upon the request and at the expense of the consumer, itself provide, instal, and fix such service at a price to be agreed upon, and the consumer shall pay the Administration such sum for such work and service as the Administration may in each case carry out in pursuance of any such agreement. It is further provided that such service shall remain the property of the Administration until payment of the said sum by the consumer.

25. All pipes, whether used in connection with a consumer's service or in laying a communication pipe, shall be of galvanized iron of a quality approved by the local authority.

26. No joints other than "union" or plain couplings shall be used.

27. All pipes to be laid in the ground shall be at least 12 inches below ground level.

28. No person, for the purpose of conveying, delivering, or receiving water from the Administration, shall make use of any pipe which is laid or fixed through, in or into any sewer, drain, ashpit or manure hole, or through, in or into any place where, in the event of the pipe becoming unsound, the water conveyed through such pipe would be liable to pollution or to escape without being observed.

29. No person shall cause or suffer any pipe, tap, or fitting to leak, and no tap or fitting shall be fixed in such a position that any leakage cannot easily be detected.

30. No person shall effect any connection with the main without the written permission of the local authority, or injure any main, communication pipe, fitting, stopcock or meter.

31. No person shall cause or suffer any newly-laid service pipe to be covered in the course of installation, or alteration of a service, until such pipe has been examined and approved of by the inspector or some authorised official.

32. No service shall be connected to the main and no alteration shall be made, and no additional pipes or fittings shall be connected with an existing service which is already connected with the main, until such proposed alteration or addition has been submitted to the inspector and a certificate of approval obtained from him.

33. Should any person make any connection with the main or lay down any service or additional service or make any additional connection to any existing service without the permission of the inspector, the local authority may order, in writing, the person so contravening the regulations to have the unauthorised connection, additional service or alteration removed, and should he fail to comply with this notice within a specified time, the Administration may have the work carried out at his expense in addition to any further action that may be taken against him for the contravention of these regulations.

34. No person shall fix, fit or suffer to be fixed, fitted or used upon any premises a cistern for the reception or storage of water unless such cistern is constructed of slate, galvanized iron, or wood lined with zinc or lead, of sufficient strength and thickness and is otherwise of such a kind as to satisfy the following requirements:—

(a) such cistern shall be water-tight, and properly covered and ventilated and shall be placed in such a position that the interior thereof may be readily inspected and cleansed;

(b) the inlet pipe of such cistern shall be provided with an approved ball-tap or check valve.

35. On all premises where a cold water cistern is used, such cistern shall be capable of containing not less than 100 gallons. If such cistern is used to supply a hot water apparatus and a bath, the cold water supply for the bath shall not be connected to the cistern at a point lower than one half of the depth of the cistern.

36. No person shall cause or allow an overflow or waste pipe to be attached to the cistern other than as a warning pipe, the situation of which will admit of the discharge of water from such warning pipe being readily observed by the inspector.

37. No person shall cause or allow rain water or any water other than that supplied by the Administration to flow into any cistern supplied with water by the Administration: Provided always that the local authority may, under special circumstances, for trade purposes give written permission for rain water to be admitted into a cistern.

38. No person shall cause or allow any description of closed boiler to be supplied direct from the service pipe, but in every case a cistern shall be provided and the supply taken therefrom.

39. The feed cistern (or supply tank) to a hot water circulating cistern or apparatus shall be fed from the bottom of such cistern: Provided always that when the hot water apparatus is carried out on the cylinder system the bottom of the said cistern may be connected directly to the hot water cylinder, but all hot water draw-off pipes must be connected at or above the top of the hot water cylinder.

40. Hot water circulating cisterns not under pressure shall be of at least one-sixteenth inch wrought iron galvanized.

41. No cistern buried or excavated in the ground shall be used for the storage or reception of water supplied by the Administration, unless the use of such cistern shall be approved by the local authority in writing.

42. A stopcock shall be placed on the outlet of each cistern so as to prevent the necessity of emptying the cistern during any repairs.

43. No taps intended for the domestic supplies of cold water in dwelling-houses or for drinking purposes in any other premises shall be supplied from a cistern, but shall be fixed on the service pipe before it enters the cistern.

44. There shall be paid by the owner of every erf or plot of land having a street boundary along which passes one of the mains a fee of twelve shillings per annum for every such erf or plot.

Such fee shall be payable in advance on the first day of January in every year: Provided that a proportionate part of such fee shall be payable in respect of the year 1939 on the first day of the month subsequent to the water being available in the mains. Such fee may be recoverable in the same manner and under the same conditions as provided for in section *six* of the Goedgegun Township Proclamation, 1923, as amended by Proclamation No. 13 of 1925, for the recovery of unpaid quitrent.

45. The supply of water for industrial, domestic, or any other purpose shall be by meter.

46. The Administration will provide the necessary meters at its own expense, and will at its own cost and expense maintain and repair any meter provided by it to the extent of ordinary wear and tear, but if in any case any repairs to the said meter have, in the opinion of the local authority, become necessary in consequence of such meter having been wilfully or accidentally damaged, the consumer shall be liable for the cost of such repairs, and such cost shall be paid by the consumer on demand.

47. Any meter provided and fixed on the communication pipe, together with the fittings connected therewith, shall be and remain the absolute property of the Administration, and such meter shall be under the sole control of the Administration, but the consumer shall be responsible to the Administration for the

safe keeping and condition of any such meter and shall be answerable to the Administration for any damage or injury which may be done to or sustained by it.

48. No consumer shall disconnect, interfere with, or cause or permit any other person to disconnect or interfere with any meter or fittings connected therewith for any purpose whatsoever, and in the event of any repairs to any meter being found necessary the consumer shall immediately give notice thereof to the local authority, and the Administration will effect such repairs as shall be found necessary to such meter at its earliest convenience.

49. The Administration may at any time at its own expense disconnect and remove any meter and affix any other meter at its discretion.

50. The quantity of water which shall be registered by the meter as having been supplied to any consumer shall be deemed to be the quantity actually so supplied.

The quantity of water so registered shall be paid for by the consumer at the rate or charge for the time being fixed by the tariff of the Administration for water supplied by measure, and such payment shall be made at such times and in such manner as shall be prescribed by the said tariff.

51. Every consumer shall be bound by the books of the Administration showing such meter reading in the absence of evidence showing either that such entry has been incorrectly made or that the meter was at the time of such reading in default, and it shall not be necessary to produce the person who read the meter or the person who made any particular entry in order to prove such reading or entry.

52. If any consumer shall be at any time dissatisfied with any particular reading of a meter supplied by the Administration and shall be desirous of having the same tested, he shall give written notice to the local authority within seven days of such reading and therewith deposit the sum of ten shillings for the testing of such meter. Should the meter after test be found correct the ten shillings deposit shall be forfeited to the Administration, but should the meter be found incorrect the money deposited will be returned and a correct meter refixed without charge to the consumer.

53. The meter shall be considered correct if no error shall be shown of more than $2\frac{1}{2}$ per cent. either way.

54. Should the meter at any time be out of order and register incorrectly, the Administration shall repair or replace the same as soon as possible and the quantity of water to be paid for by the consumer from the date of the meter ceasing to register correctly up to the time of its repair or replacement shall be estimated by the local authority upon the basis of the previous consumption of water upon such premises, or in the event of such estimate being impossible upon the basis of the subsequent consumption after such repair or replacement has been effected. The consumer shall pay the amount of such estimate within seven days of receiving the same, unless such estimate is received by him more than seven days before the date of which such account would have been payable under his contract with the Administration in the ordinary course, in which case the said amount shall be payable on or before such last-mentioned date.

55. The consumer shall, if required, provide a suitable and safe place within his premises in which to fix the meter. At the side of the meter next to the main a shut-off or stopcock shall be fixed by the Administration at its own expense for its own exclusive use.

56. These regulations and the tariff appended hereto shall come into force on the first day of the month subsequent to the water being available in the mains.
