COMMENT

Trading profits during the period under review were higher than those of a comparable period of the previous year as a result of improved sales volumes and gross profit which in turn were the result of price increases which became effective in March 1972. However, finance charges increased considerably following the reduction of the period in which excise duties are to be paid, and an increase in working capital which was partly the result of increased raw material prices.

In the statement by the Chairman which accompanied the last financial accounts a growth in earnings was predicted for the current year. However, the decline in growth in sales coupled with the present economic climate, leads us to the prediction that earnings for the current year will be approximately the same as those for the previous financial year.
