Trading.—During the period under review, national new car sales were 29 per cent below last year's equivalent period, whilst in the Western Cape area in which your Group operates, there was a drop of 35 per cent. Turnover was therefore lower for the period, and the highly competitive trading conditions resulted in a sharp fall in operating income.

Future prospects.—Despite the benefit of lower expenses and interest in the second half of the financial year, the directors do not predict any improvement in the results for that period, in view of the prolonged and continuing down-turn in the economy.

When the present economic decline runs its course and normal trading conditions are re-established, the group will be soundly placed to benefit from the increased market activity that will follow.

Dividends.—A preference dividend of 5,5c per share (1975: 5,5c), amounting to R8 937,50 was declared during the half year.

The Directors consider that the results for the past six months do not warrant the declaration of an interim ordinary dividend. This was foreshadowed in the chairman's supplementary statement at the Annual General Meeting held in December last.
