## 2. PREAMBLE

- 2.1 M-Net has provided a national pay-television broadcasting service in South Africa since 1985.
- 2.2 These conditions, made under section 52(1)(d) of the Act, constitute an amendment to M-Net's licence conditions described as *Consolidated Licence Conditions of M-Net : Radio Act, 1952* which came into effect on 1 January 1991 and which was grandfathered in terms of Section 46(2)(a) of the Act.

- 2.3 This amended licence replaces the grandfathered licence and any permission previously granted on any broadcasting matter is hereby revoked. This licence is binding on M-Net as of the effective date and this licence terminates on 31 March 2002.
- 2.4 This licence is issued with due regard to:
- 2.4.1 The Objects of the Act and the regulatory framework as set out in the Triple Inquiry Report of the Authority on the viability and protection of public broadcasting services, cross media control, South African music and local television content, as approved by Parliament.
- 2.4.2 The precepts of section 2 of the Act, which require that the Authority, *inter alia*:
- 2.4.2.1 "promote the most efficient use of the broadcasting services frequency bands;
- 2.4.2.2 encourage investment in the broadcasting industry;
- 2.4.2.3 promote the stability of the broadcasting industry; and,
- 2.4.2.4 ensure fair competition between broadcasting licensees".
- 2.5 The points of reference in drafting these amended conditions are the Act, the Triple Inquiry Report and the Position Paper on Private Television. The Authority recognises the absence of broadcast policy for pay television.
- 2.6 In considering this amendment, the Authority did not investigate issues related to the efficient use of frequencies given that this is a grandfathered licence and the frequency plan has not yet been completed.
- 2.7 Issues related to sports rights are subject to the outcome of a national policy which is being formulated in this regard.
- 2.8 In further considering this amendment, the Authority did not investigate cross-media ownership given that this is a grandfathered pay television licence.
- 2.9 In granting this amended licence the Authority has taken account of public representations.

**NOTICE 989 OF 1997****INDEPENDENT BROADCASTING AUTHORITY****COMMUNITY SOUND BROADCASTING LICENCES  
AMENDMENT TO INVITATION TO APPLY**

The Independent Broadcasting Authority, acting in terms of section 44 of the Independent Broadcasting Authority Act, Act 153 of 1993, gives notice that the closing date for applications for community sound broadcasting licences in the free state, which was published in government gazette no 17998 on 9 May, has been postponed from 11 July 1997 to 14 August 1997. The frequency plan published in the above gazette has also been amended as per the schedule.

**SCHEDULE*****Background on Frequency Plan***

During the two years of Community Sound broadcasting various areas have been identified in which a shortage of frequencies exists. The IBA then decided to produce a community frequency plan on a province by province basis. This plan contains all FM and MW frequencies that are available for community broadcasting in all nine provinces. Frequencies occupied by the current community broadcasters are not specified separately as new applicants can also apply for these.

The plan was aimed at providing the maximum number of frequencies at the lowest possible interference levels. The compilation of the plan was informed by the locations of the current community broadcasters, so called schedule 2 areas and expression of interest received for community radio stations in the nine provinces. Technical limitations and population figures guided us in making low power frequencies available in urban areas and high power frequencies available in rural areas.

The community frequency plan contains 281 FM and 17 MW frequencies and the breakdown is as follow:

Northern Province	26	1
North West Province	20	0
Northern Cape	38	0
Mpumalanga	30	1
Eastern Cape	34	0
Free State	35	2
Kwazulu Natal	23	2
Western Cape	44	1
Gauteng Province	31	10

The ERP of the frequencies in the plan differ between 10 Watt and 10 kilowatt. Each frequency has an associated effective antenna height, ERP and service contour restriction. The Provincial frequency plans do not distinguish between frequencies for community of interest and geographical communities.
