NOTICE 431 OF 1999**BOARD ON TARIFFS AND TRADE****MID TERM REVIEW PROPOSALS FOR THE MOTOR INDUSTRY DEVELOPMENT PROGRAMME****1. INTRODUCTION**

At the time of the implementation of the Motor Industry Development Programme (MIDP) in September 1995, the government stated that the programme would be subject to a Mid Term Review. The objective of the Mid Term Review was to review the MIDP and to make appropriate adjustments to current policies. It was later decided to extend the ambit of the Review to provide clarity on policy beyond 2002. This document covers the proposals for the MIDP for light vehicles only. The review of the heavy and medium vehicle programme is currently underway.

Interested parties are invited to comment on these proposals within six weeks of the date of the publication of this notice and comments should be submitted to the Chairman, Board on Tariffs and Trade, Private Bag X753, Pretoria, 000 and should reference to BTT Ref.: T5/2/17/3/1(990028) [Investigating officer Mrs I Metz]. Comments may also be faxed to (012) 320 5004 or e-mailed to imetz@dti.pwv.gov.za.

2. OBJECTIVES OF THE MIDP

The objective of the MIDP is to improve the competitiveness of the light motor industry, thereby maintaining and improving the motor industry's contribution to the economy with regard to employment, investment and consumer interest. The improvement in competitiveness should have positive spin-offs for exports, and ultimately for the foreign currency usage of the light motor vehicle industry. The viability of manufacturing components for the replacement market should similarly improve and the affordability of motor vehicles be addressed to a certain extent.

The development of an internationally competitive and growing motor industry should :

- Provide sustainable employment
- Provide affordable vehicles
- Make a greater contribution to the economic growth through increased production and exports, and achieving an improved trade balance.

The attainment of the objectives entail encouraging a phased integration into the global economy, economies of scale, rationalisation, productivity and upgrading production processes and equipment.

The major measures by which these objectives are to be pursued are:

A gradual reduction in tariff protection and the abolition of local content requirements so as to expose the industry to greater international competition.

The encouragement of higher volumes and a greater degree of specialisation by allowing exporting firms to earn rebates on import duties

The introduction of a range of incentives which are designed to upgrade the capacity of the industry in all spheres

The Motor Industry Development Programme is an important component of the overall policies which impact on the automotive industry. The government views the impact of the MIDP to date as being generally positive. Prices of vehicles have been reduced in real terms, exports are growing rapidly, investment (including foreign investment) has increased and positive structural changes are occurring. For this reason and in order to maintain long term policy stability as well as to achieve a balance between international competitiveness and local manufacture, the emphasis in the proposals contained below is on the continuity of policy until and beyond 2002. However, certain problem areas are emerging which require adjustments to policy.

3. FACTS AND TRENDS

The proposals which follow in 4 below are based on the following information and take into account the objectives of the MIDP:

Projected figures

A model was developed by the stakeholders of the motor industry, based on parameters agreed to by the industry. In terms of the model and the various scenarios, the indications are that, although there is a scaling down of the duties, the proposals as formulated below will broadly improve the export performance of the motor industry with regard to components and CBU light motor vehicles with a concomitant spin-off for employment and investment.

4. PROPOSALS

A. DURATION OF PROGRAMME

As stated in 1 and 2 above, it is the intention to maintain long term policy stability as well as to achieve a balance between international competitiveness and local manufacture. Therefore the proposal is for the programme to continue until the end of 2007.

B. DUTY

It is proposed that there be no change to the tariff phase down on light motor vehicles and original equipment components as set out until 2002. Tariffs will decline to 40% for completely built up light motor vehicles and 30% for original equipment components complying with the CKD definition by 2002.

Post 2002, the proposals set out to achieve a balance which limits import growth to acceptable levels while at the same time encouraging further competition.

Proposed duties: 2002-2007

Year	Customs duty on completely built up light motor vehicles %	Original equipment components %
2002	40	30
2003	38	29
2004	36	28
2005	34	27
2006	32	26
2007	30	25

C. REBATES**(a) Duty free allowance (DFA)**

The total value of locally sourced original equipment components purchased has not increased since the implementation of the MIDP. In the light hereof, it appears that the level of the DFA has not impacted negatively on the protection afforded to local component manufacturers. It is therefore proposed that the DFA be maintained at its current level of 27% until 2001. For those models attaining the volume requirement set out in (b) below, the DFA is proposed to remain at 27% until 2007. The DFA is set at this level to allow light motor vehicle assemblers the freedom to purchase those components, which are not economically viable to obtain from local sources, at world prices to reduce input costs.

(b) Volume based duty free allowance

There has been little progress in increasing the very low volumes per model which are produced in South African assembly plants although a number of vehicle manufacturers have indicated that they plan to reduce the number of models being locally assembled.

Higher model volumes and a degree of rationalisation are important both to achieve greater efficiencies in assembly and to maintain or increase economic levels of local content in domestically produced vehicles.

While the scale economies achieved in developed country markets will, in the medium term, only be attained through exporting, an increase in domestic volumes will make it easier to attract export oriented component investments which are producing part of their output for the domestic market. A domestic base with growing volume is, therefore, extremely important.

The major factor leading to low production volumes is the relatively high

degree of protection for assembly that still exists. Falling protection will inevitably lead to rationalisation. It is proposed that this process should be accelerated through the introduction of a DFA based volume incentive.

Proposed DFA based volume incentive

Year	Model percentage of total domestic market*
2000	No minimum volume requirement
2001	1.0%
2002	2.0%
2003	2.5%
2004	3.0%
2005	3.75%
2006	4.5%
2007	5.0%

*Achievement of model volume targets is based on total production, including exports.

All models attaining the volume target receive the full DFA. All models below the threshold (model percentage of total domestic market) in 2001 will receive a 23% DFA and in 2002 a 20% DFA.

From 2003 onwards (provided a registered motor vehicle manufacturer has at least one model above the threshold) one model below the threshold will qualify for a DFA of 20%.

It should be noted that neither a model nor a platform has not been defined as yet. Although a definition of a model has been formulated for purposes of this publication, it should by no means be considered to be the final version. As an unsatisfactory definition may have unforeseen consequences for the motor industry, participants in the MIDP are urged to assist with the formulation of a workable definition of a model.

(c) Affordable (small) vehicle rebate (SVI)

Lower priced vehicles (in real terms) have been one of the main achievements of the MIDP. This has been achieved through increased production efficiencies, reduced margins and growing import competition and has been further encouraged, in the case of lower priced vehicles, by the Small Vehicle Incentive (SVI), which is an additional duty free allowance.

The SVI has helped bring down vehicle prices by allowing motor vehicle manufacturers to source at world competitive prices. It has, however, had

the negative effect of increasing proliferation in the small vehicle segment which has impacted on the number of vehicle models produced.

As tariffs decline competitive pricing is likely to be maintained by a combination of lower protection and competition between both domestically assembled and imported vehicles. This will be to the benefit of the consumer.

An *ad valorem* (or fiscal) duty was imposed in 1995 by the South African Revenue Services which favours cheaper vehicles, whether they be imported or locally manufactured. This duty, in addition to the SVI is perceived to excessively favour cheaper cars, creating distortions in certain price brackets. Since the implementation of the MIDP, government has refrained from recommending and implementing any changes to the MIDP. Hence only a select few light vehicles currently qualify for the SVI compared to when the MIDP was implemented. This situation should be rectified, but as manufacturers of affordable light vehicles have taken the SVI into account in their costing and a sudden deletion thereof would be cost raising, an upward adjustment of the price of vehicles qualifying for the SVI is regarded as necessary, but the SVI should be phased out over time in view of the structure of the *ad valorem* (fiscal) duty on light motor vehicles.

It is therefore proposed that the SVI be phased out by the year 2003. The current R40 000 cut off point should increase at the beginning of each calendar year by a percentage equal to the rise in the Producer Price Index for the previous year. For 1999 it is proposed that the SVI cut off point be increased by 4 per cent points to R41 600.

Proposed phase out of the Small Vehicle Incentive

Year	Percentage additional DFA per R1 000 below cut off point
Jan - June 1999	3%
July - Dec 1999	2,5%
2000	2.0%
2001	1.5%
2002	1.0%
2003	0.0%

(d) Import rebate credits

In view of the small domestic market, improved international competitiveness can only be attained by exporting, thereby encouraging higher volumes and a degree of specialisation in the production of vehicles and components. Rapid export growth has been a major success of the MIDP.

It is therefore proposed that the concept of import rebate credits be maintained until 2002 with minor adjustments.

In making adjustments consideration needs to be taken of:

The impact of the growing level of rebated imports of components and vehicles into the South Africa.

Ensuring the long term sustainability of export growth as assistance declines.

The prime objective of encouraging a higher level of specialisation and thereby reducing domestic production costs and establishing a more viable industry.

In order to allow firms to adjust it is further proposed that import rebate credits be continued beyond 2002 on a phasing down basis.

It is proposed that tooling exports remain eligible as MIDP exports in view thereof that the continued future viability of manufacturing and exporting components is largely dependent on having a local tooling manufacturing base.

A summary of the proposals for the phasing down of the import rebate credits is contained in the following table:

Summary of proposals regarding export complementation

Year	A			B				
	Qualifying value of eligible export performance			Ratio of exports against imports of:				
	CBU Light motor vehicles	Components excluding tooling	Tooling	CBU light motor vehicles exported: CBU light motor vehicles or components imported	Components exported : CBU light motor vehicles imported	Components exported: Components imported	Tooling exported: components imported	Tooling exported: CBU light vehicles imported

2001	100%	93%	80%	100:100	100:70	100:100	100:100	100:70
2002	100%	90%	70%	100:100	100:65	100:100	100:100	100:65
2003	94%	86%	60%	100:100	100:60	100:100	100:100	100:60
2004	88%	82%	50%	100:100	100:60	100:100	100:100	100:60
2005	82%	78%	40%	100:100	100:60	100:100	100:100	100:60
2006	76%	74%	40%	100:100	100:60	100:100	100:100	100:60
2007	70%	70%	40%	100:100	100:60	100:100	100:100	100:60

The proposals contained in the above schedule are elucidated below:

- (i) The eligible export performance (i.e. local content exported) of completely built up light vehicles remains unchanged until 2002. From 2003 the eligible export performance is reduced to 96%, with further annual reductions of 4 percentage points until 80% in 2007 is reached. Eg. in the year 2003, should the actual eligible export performance be R1000 000, the eligible export value will be reduced to R960 000.
- (ii) The eligible export performance (i.e. local content exported) of component exports is reduced from 100% currently to 96% in 2000, 93% in 2001, 90% in 2002, etc. Eg. in the year 2000, should the actual eligible export performance of components be R1 000 000, the eligible export value will be reduced to R960 000.

Should this eligible export credit be used to import light motor vehicles, Customs and Excise will apply the ratio applicable to exporting components against importing light motor vehicles. Hence, light motor vehicles to the value of R672 000 may be imported under rebate of the ordinary customs duty.

- (iii) The eligible export performance of tooling is reduced from 100% currently to 90% in 2000, 80% in 2001, 80% in 2002, etc., eg. In the year 2000, should the actual eligible export performance of tooling be R 1 000 000,, the eligible export value will be reduced to R900 000.

Should this eligible export credit be used to import light motor

vehicles in the year 2000, Customs and Excise will apply the ratio applicable to exporting tooling against importing light motor vehicles. Hence, light motor vehicles to the value of R630 000 may be imported under rebate of the ordinary customs duty.

Platinum group metals

Consideration has been given to the further phasing down of the value of precious metals eligible as exports in catalytic converters. This question is the subject of a "special initiative" involving the Department of Trade and Industry and firms within the catalytic converter industry. A decision on this issue will depend on the outcome of this initiative.
