No. 480

12 July 2013

NATIONAL RESEARCH FOUNDATION ACT, 1998

DECLARATION OF RESEARCH INSTITUTIONS

I, Derek Hanekom, Minister of Science and Technology, hereby declare the institutions indicated in the Schedule hereto as research institutions, for purposes of the definition of "research institution" in section 1 of the National Research Foundation Act, 1998 (Act No.5 of 1998) as amended by the Science and Technology Laws Amendment Act, 2011 (Act No.16 of 2011). As such, the declaration refers to the declassification of certain institutions only in the context of direct funding by the Foundation, and not in general.

D Hanekom, MP
Minister of Science and Technology

1. Definitions

In this schedule, unless the context indicates otherwise, any word or expression to which a meaning has been assigned in the Act has the same meaning, and –

“Free-standing bursaries” refers to bursaries awarded directly to students undertaking full-time study at higher education institutions. Students apply for these bursaries themselves, and remain responsible for the submission of all required documentation;

“global infrastructure” refers to international large research infrastructures, both single-sited and distributed, linked by high-speed networks for optimal sharing of data and resources, which provide research and development capability beyond the resources available at regional or national levels;

“interested party” means any researcher or research institution that may apply to utilise a national facility for research or instruction in terms of section 5 (2) of the Act;

“public higher education institution” means any institution which has been established, is deemed to have been established or is declared to be a public higher education institution in terms of the Higher Education Act, 1997 (Act No. 101 of 1997);

“research infrastructure” includes scientific equipment, specialised facilities, and global infrastructure;

“scientific equipment” means a discrete or networked, free-standing or mounted, desk-top to large, dedicated or multi-purpose usage research tool including all necessary ancillary items;

“specialised facility” refers to a physical and/or organisational structure of a capital nature which provides a controlled environment for specialised experiments and is required to ensure the optimal performance of research equipment, particularly in the advanced scientific equipment category; and

“the Act” means the National Research Foundation Act, 1998 (Act No.5 of 1998).

2. Application

The scope of this declaration excludes the South African Agency for Science and Technology Advancement (SAASTA), a component of the NRF whose mandate is not research.

This declaration applies to the following funding categories of the National Research Foundation (NRF):

- Free-standing postgraduate bursaries for studies at Honours, Masters and Doctoral levels;
- Postdoctoral fellowships;
- Research equipment; and
- Grants (e.g., research grants, travel grants, capacity development grants, block grants etc).

3. Declaration of research institutions

- 3.1 With reference to qualification-offering research-performing institutions offering postgraduate studies at honours, masters and doctoral levels, and eligible to receive support for free-standing postgraduate bursaries contemplated in sub-paragraph 2.1, only public higher education institutions are declared as research institutions.
- 3.2 With reference to research-performing institutions offering postdoctoral fellowships contemplated in sub-paragraph 2.2, or eligible for support in the acquisition of research equipment contemplated in sub-paragraph 2.3, or whose researchers are eligible for support through various forms of grants contemplated in sub-paragraph 2.4, the following types of public institutions are declared research institutions:
 - (a) Public Higher Education Institutions;
 - (b) The NRF and its National Facilities as declared by the Minister in terms of section 5(1) of the Act;
 - (c) Research-performing museums declared as such under the Cultural Institutions Act, 1998 (Act No. 119 of 1998), and those which house national collections relevant in conducting research;

- (d) The following science councils, whose legislative mandates generally centre around promotion of research development, and technology innovation and transfer in their various fields of operation:
- (i) The Human Sciences Research Council, established by the Human Sciences Research Act, 1968 (Act No. 23 of 1968), and retained by the Human Sciences Research Act, 2008 (Act No. 17 of 2008);
 - (ii) The Council for Scientific and Industrial Research, established by the Scientific Research Council Act, 1945 (Act No. 33 of 1945) and retained by the Scientific Research Act, 1988 (Act No. 46 of 1988);
 - (iii) The Agricultural Research Council, established by the Agricultural Research Act, 1990 (Act No. 86 of 1990);
 - (iv) The South African Medical Research Council, established by the South African Medical Research Council Act, 1969 (Act No. 19 of 1969), and retained by the South African Medical Research Act, 1991 (Act No. 58 of 1991);
 - (v) The Council for Geoscience, established by the Geoscience Act, 1993 (Act No. 100 of 1993);
 - (vi) The Council for Mineral Technology (Mintek), established by the Mineral Technology Act, 1981 (Act No. 84 of 1981), and retained by the Mineral Technology Act, 1989 (Act No. 30 of 1989);
 - (vii) The South African National Space Agency, established by the South African National Space Agency Act, 2008 (Act No. 36 of 2008); and
 - (viii) The South African Nuclear Energy Corporation, established by the Nuclear Energy Act, 1999 (Act No. 46 of 1999). Also;
- (e) Units performing research within the provincial and national government departments, as well as other research performing

public institutions and entities supporting these departments in fulfilling their mandates, like the South African National Parks, South African National Biodiversity Institute, South African Weather Services, etc.

3.3 With reference to private and non-governmental research-performing institutions offering postdoctoral fellowships contemplated in sub-paragraph 2.2, whose researchers are eligible for support through various forms of grants contemplated in sub-paragraph 2.4, the following institutions which perform research that addresses the strategic needs and/or priority areas of the Department, are declared:

- (a) The South African Sugarcane Research Institute;
- (b) The International Centre for Genetic Engineering and Biotechnology;
- (c) The Oceanographic Research Institute;
- (d) Other private or non-governmental research-performing institutions working in close partnerships with public research institutions as defined in paragraph 3.2 above, applying through those research institutions; and
- (e) The African Institute for Mathematical Sciences, which in addition will have its postgraduate diploma students eligible for free-standing bursaries support.

3.4 Exclusion of other institutions is based on one or more of the following reasons:

- (a) Them being private or non-governmental institutions, and their core activity not being research or their research not addressing strategic priorities of the Department; and/or
- (b) Their legislative mandates falling outside the scope of research and technology development.

4. Application to be declared as a research institution

The Science and Technology Amendment Act, 2011 (Act No. 16 of 2011), gives powers to recognise research institutions to the Minister of Science and Technology, with the primary emphasis being on institutions in the public higher education sector.

Institutions that would like to be recognised or declared as research institutions are requested to send their requests with motivation to the Minister through the office of the Director-General at the following address;

ANNEXURE

The labeling of ROOIBOS and the Rules of Use of ROOIBOS

The name ROOIBOS can only be used to refer to the dry product, infusion or extract that is 100% pure Rooibos – derived from *Aspalathus linearis* and that has been cultivated or wild-harvested in the geographic area as described in this application.

Rooibos may be blended with teas, infusions and other products, whether or not for human consumption. The labeling of such products must conform with the rules applicable to labeling of products in the territory where the product is marketed.

As a guide, the following are considered by the South African Rooibos Council as compatible with use of the name ROOIBOS:

- To carry as product designation "Rooibos", the final product must contain 100% *Aspalathus linearis* or at least adhere to the statutory standard.
- If it is a Rooibos blended tea or infusion, Rooibos can be used as the main descriptor ("Rooibos <>") provided that:
 - Rooibos is the main ingredient
 - The exact percentages appear on the label/packaging
 - The final product must still be recognizable as Rooibos, as characterized in the description of the product.
- If it is a blended tea or infusion, it can be called "<> and Rooibos blend" as descriptor only if it contains Rooibos, and on conditions that:
 - Rooibos provides a distinctive character to the product.
 - The exact percentage of the Rooibos content appears on the label/packaging.
 - The product with the highest percentage appears first on the label.
- Rooibos flavoured tea or infusions with liquid flavourants ("flavoured Rooibos") can be called "Rooibos <>" on the conditions that:
 - Rooibos is the main ingredient (after water).
 - The exact percentage of Rooibos content appears on the label/packaging.
 - The final product must still be recognizable as Rooibos, as characterized in the description of the product.
- Following guidance from the SA Rooibos Council, other products (for instance extracts, soaps, cream, yoghurts, liquor, etc.) may be called "Rooibos <>" only if it contains Rooibos, and on the conditions that:
 - "Rooibos" (or "*Aspalathus linearis*") appears on the list of ingredients.
 - It can be proven that Rooibos adds to the characteristics of the product.
