GOVERNMENT NOTICE

DEPARTMENT OF ENVIRONMENTAL AFFAIRS

No. 331

2 May 2014

NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008 (ACT NO. 59 OF 2008)

NATIONAL NORMS AND STANDARDS FOR THE REMEDIATION OF CONTAMINATED LAND AND SOIL QUALITY

I, Bomo Edith Edna Molewa, Minister of Water and Environmental Affairs, hereby publish national norms and standards for the remediation of contaminated land and soil quality, under section 7(2)(d)) of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008), for implementation as set out in the Schedule hereto.

BOMO EDITH EDNA MOLEWA
MINISTER OF WATER AND ENVIRONMENTAL AFFAIRS

SCHEDULE

1. Definitions

In these norms and standards, unless the context indicates otherwise, word or expression that is defined in the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) and the National Environmental Management Act, 1998, has the same meaning—

“Contaminant” means any substance present in an environmental medium at concentrations in excess of natural background concentrations that has a potential to cause harm to human health or the environment;

“Informal Residential” means an unplanned settlement on land which has not been zoned as a residential consisting mainly of makeshift structure not erected according to approved architectural plans;

“Remediation” means the management of a contaminated site to prevent, minimise, or mitigate harm to human health or the environment;

“Soil Screening Value 1” means soil quality values that are protective of both human health and ecotoxicological risk for multi-exposure pathways, inclusive of contaminant migration to the water resource;

“Soil Screening Value 2” means soil quality values that are protective of risk to human health in the absence of a water resource;

“Standard Residential” means settlement that is formally zoned and serviced, and generally developed according to approved building plans, including land parcels such as plots or erven.

2. Purpose

The purpose of these norms and standards is to—

- (a) provide a uniform national approach to determine the contamination status of an investigation area;
- (b) limit uncertainties about the most appropriate criteria and method to apply in the assessment of contaminated land; and
- (c) provide minimum standards for assessing necessary environmental protection measures for remediation activities.

3. Application

The requirements set out in these norms and standards apply to an owner of land or any person who undertakes site assessment and remediation activity in terms of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008).

4. Scope of this Norms and Standards

- (1) These norms and standards must be used for the screening of a site after a site assessment report is required as a result of declaration of an investigation area as contemplated in section 36 of the National Environmental Management Act, 2008 (Act No. 59 of 2008).
- (2) Where a contaminant is not listed in Table 1 or Table 2, values which are scientifically validated for the contaminants of interest may be used.
- (3) The Soil Screening Values in Table 1 and Table 2 must not be seen as—
 - (i) absolute minimum values; or
 - (ii) default remediation values.

5. Soil Screening Values

(1) The Soil Screening Values in Table 1 and Table 2 below are for screening purpose.

Table 1: Soil Screening Values for Metals and Organics

Parameter	Units	SSV1 All Land-Uses Protective of the Water Resource	SSV2 Informal Residential	SSV2 Standard Residential	SSV2 Commercial/ Industrial

Anions	Soil Screening Level (mg/kg)
Chlorides	12 000
Fluorides	30
Nitrates-nitrite	120
Sulphates	4 000

6. Transitional Arrangements

- (1) Any person who is remediating contaminated land in compliance with a directive or compliance notice issued in terms of any legislation applicable to land remediation before coming into effect of these norms and standards, must comply with the conditions set out in the directive or compliance notice.
- (2) Any person who is remediating contaminated land in terms of a waste management licence issued in terms of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008), before coming into effect of these norms and standards, must comply with the conditions set out in the waste management licence.

7. Short Title

These norms and standards are called the National Norms and Standards for the Remediation of Contaminated Land and Soil Quality in the Republic of South Africa.
