- (a) Depending on the nature and scope of the project, determine the significance level using Table 2: Description of Significance Levels.
- (b) Determine the project complexity variable by using the sum of number of disciplines, the number of life cycle phases and the duration. Table 4 must be used to determine the applicable life cycle phases and railway disciplines.
- (c) Use the complexity variable and applicable significance level determined in (a) and (b) above respectively to determine the applicable fee using Table 2 – Schedule matrix.

- 2(2) All fees charged by the RSR for services rendered are payable before implementation of the intended life cycle changes for new works and technology.
- 2(3) Section B is only applicable to non-railway operators (non-Railway Safety Permit Holders) who intend to undertake activities that could impact on railway safety and includes consultants, contractors, municipalities, human settlement developers and other entities requiring the services of the RSR on any matter incidental thereto.

The application thereof, inclusive of the scope and expertise level, must be agreed upon with the RSR before commencement of services. Any consequential material purchase and travel costs are not included in the rates listed in Table 5.
