2.3 NOTES FOR APPLICANTS

- (a) The 2018 SEPA is not obligatory. Applicants must note that they are not compelled to compile and lodge 2018 SEPA submissions.
- (b) The 2018 SEPA concerns SEPs that are applicable as on 22nd December 2017, regardless of how these SEPs were arrived at. This includes approved SEP's following a submission of a Non-Permanent SEP reduction. These non-permanent SEP's shall be regarded as permanent at the point of lodging the 2018 SEPA submission. In terms of the medicines pricing regulations, there shall only be one SEP at any given time. The schedule of 22nd December 2017 is found on www.mpr.gov.za under "Published Documents", click database of medicine prices. Click on the excel spreadsheet titled "database of medicine prices 22nd December 2017".
- (c) There can only be one SEP submission launched at any given point in time. The applicant must not request for an update on the SEP or lodge a Regulation 9 application, whilst the submission for SEPA is still in process. Similarly, the applicant cannot submit a SEPA or Regulation 9 application whilst the submission for an SEP update is still in process. In an event where the applicant has made a SEPA submission and any other SEP submissions and/or a Regulation 9 application the SEPA will not be considered. Should the applicant wish to re-submit, a new submission may be made once the other outstanding SEP submissions and/or Regulation 9 applications have been concluded.
- (d) Each submission should include all the applicant's scheduled medicines, including discontinued medicines. Discontinued medicines should be indicated as such, as per the DoP under the status column. SEPA will not be allowed on officially declared discontinued medicines. **The row order of all the applicant's medicines, as they appear on the DoP of 22nd December 2017 must be maintained.** Any medicines not

appearing on the 22nd December 2017 list should appear at the bottom of the 2018 SEPA template in an alphabetical order.

- (e) All medicines presented on the template for 2018 SEPA **must** be unit priced. When computing the unit prices, the resulting SEPs should not exceed the maximum allowable SEP after the adjustment on the SEP that existed on 22nd December 2017 (i.e. SEP applicable as of 22nd December 2017 + maximum allowable SEPA % as per the notice).
- (f) All medicines including those with multiple pack sizes are required by law to be unit priced i.e. all same ingredient and dosage form medicines with related pack sizes must have the same unit price. Non-compliance with unit pricing will result in the entire submission not being considered.
- (g) Where a new pack size is introduced after 22nd December 2017, it is expected that this will result in a unit price that is no greater than the unit price that existed on pack sizes on 22nd December 2017. (Note that the newly launched medicines and/or pack sizes should be included in the portfolio of medicines in the submission for SEPA and should also be unit priced with their related pack sizes).
- (h) All submissions for SEPA will be processed within 32 working days (excluding weekends and holidays) upon receipt of the submission by the PEE Directorate of the Department.
- (i) The outcome of each processed submission will be communicated to the applicant within 32 working days of the date of your submission. Applicants must take note of this time frame prior to following up on a submission status.
- (j) All processed SEPs will be communicated to price file managers and published on the website (www.mpr.gov.za) by the PEE Directorate.
- (k) All correspondence(s) concerning a submission will only be communicated to the applicant of the medicines applied for.
- (l) The electronic version of the submitted 2018 SEPA template (Annexure D) must be in excel. The SEPA template must not be password-protected or in a version that the PEE Directorate is unable to access. 2018 SEPA can only be **submitted** on the published latest SEPA template for 2018 including both Tab 1 and 2. **ANY** modification to the template will result in the entire submission not being considered. This also applies to resubmissions.
- (m) The final dates for all 2018 SEPA submissions and resubmissions will be the dates determined as per the Minister's notice.
- (n) An applicant may only submit once in the 2018 SEPA cycle. This does not apply to resubmissions (see point (o) below)

- (i) Where no adjustment is requested, the existing SEP will be applicable for the 2018 SEPA cycle. The SEPA cycle is the period between two consecutive SEPA announcements by the Minister of Health. The applicant may not at a later stage resubmit a different SEPA request for the same medicine. The submission of a SEPA and the approval thereof for the 2018 cycle implies any non permanent reduction is concluded.
 - (ii) An applicant's portfolio may not be divided into multiple submissions.
 - (iii) The maximum allowable adjustment may not be divided into multiple submissions. Should an applicant request less than the maximum published adjustment, the balance will be forfeited for the 2018 cycle.
- (o) Resubmissions;
- i. Will only be reviewed for medicines who's SEPs were previously not adjusted in terms of the 2018 SEPA quantum, as a result of discrepancies identified in the first submission
 - ii. All the requirements for the SEP submissions as stated in this document shall be applicable to resubmissions.
 - iii. **MUST** contain **ALL** medicines listed in the Not-Approved sheet of Annexure E communicated to the applicant in response to the initial submission.
 - iv. A resubmission of the not-approved items may not be split into multiple resubmissions.

 - vi. Must be submitted by the close off date as specified by the Minister of Health and reflected in the SEPA notice.

29 DECEMBER 2017

MEDICINES AND RELATED SUBSTANCES ACT, (101 OF 1965 AS AMENDED)**REGULATIONS RELATING TO A TRANSPARENT PRICING SYSTEM FOR
MEDICINES AND SCHEDULED SUBSTANCES: DISPENSING FEE FOR
PHARMACISTS**

The Minister of Health has, on recommendation of the Pricing Committee, in terms of Section 22G (2) (b) of the Medicines and Related Substances Act, (No. 101 of 1965 as amended), made the regulations in the Schedule.

SCHEDULE**Definitions**

1. In this schedule, "the Act" means the Medicines and Related Substances Act, 1965 (Act No. 101 of 1965) and any word or expression to which a meaning has been assigned in the Act shall have such meaning, unless the context indicates otherwise-

"dispense" means the supply of medicines based on a prescription to a patient or someone on behalf of the patient by a health professional authorized by law to supply medicines and includes-

- (a) the interpretation and evaluation of the prescription;
- (b) the selection, reconstitution, dilution, labelling, recording and the actual supply of the medicine;

- (c) the provision of information and instructions to ensure safe and effective use of a medicine by a patient; and
- (d) the provision of information as contemplated in section 22F (1)(a) of the Act.

“dispensing fee” means a fee determined in terms of these regulations, exclusive of Value Added Tax, that may be charged to dispense a medicine; and

“the Regulations” means the Regulations Relating to the Transparent Pricing System for Medicine and Scheduled Substances published in terms of Government Notice No. R1102 of November 2005, as amended.

Amendment of Regulation 10

2. The following regulation is hereby substituted for Regulation 10 of the Regulations:

“10. (1) The appropriate dispensing fee as contemplated in Section 22G (2) (b) of the Act to be charged by a pharmacist, must be calculated as follows:

- (a) where the single exit price of a medicine or scheduled substance is less than one hundred and seven rand and fifteen cents (R107.15), the dispensing fee shall not exceed R11.25 plus 46% of the single exit price in respect of that medicine or scheduled substance;
- (b) where the single exit price of a medicine or scheduled substance is greater than or equal to one hundred and four rand and thirty one hundred and seven rand and fifteen cents (R107.15), but less than two hundred and eighty five rand and eighty cents (R285.80), the dispensing fee shall not exceed

R24.00 plus 33% of the single exit price in respect of that medicine or scheduled substance;

- (c) where the single exit price of a medicine or scheduled substance is greater than or equal to two hundred and eighty five rand and eighty cents (R285.80), but less than one thousand rand and thirty three cents (R1000.33), the dispensing fee shall not exceed R73.50 plus 15% of the Single Exit Price in respect of that medicine or scheduled substance;
- (d) where the single exit price of a medicine or scheduled substance is greater than or equal to one thousand rand and thirty three cents (R1000.33), the dispensing fee shall not exceed R172.00 plus 5% of the Single Exit Price in respect of that medicine or scheduled substance.

This fee which is exclusive of VAT represents a maximum dispensing fee and doesn't preclude dispensers from charging a lower fee to be added to the SEP of a medicine or scheduled substance thus resulting in a final price to be paid by the consumer.

- (2) The provision of sub-regulation (1) must be reviewed annually by the Minister after taking into account-
 - (a) the need to ensure the availability and affordability of quality medicines and scheduled substances in the Republic;
 - (b) annual inflation rates published periodically by Statistics South Africa;
 - (c) information supplied by pharmacists in accordance with guidelines determined by the Minister from time to time by Notice in the Gazette; and

- (d) any other information the Minister may deem necessary to consider.
- (3) A pharmacist dispensing a medicine must-
- (a) by means of a clearly displayed notice in the pharmacy, inform members of the public of the maximum fee structure used by such pharmacist to determine the dispensing fee; and
 - (b) provide an invoice in respect of each medicine which clearly indicates the-
 - (i) dispensing fee charged; and
 - (ii) single exit price.

Loops are 3 000 mm x 1 000 mm x 50 mm (nominal dimensions) with one or more turns of cross-linked polyvinylchloride (PVC) wires and are installed over the full width of a roadway on new and existing roads. The axle, S/D tyre and off-scale sensors are piezo sensors and are installed in the prescribed manner. The off-scale sensors are installed in the same manner as the piezo sensor and are shorter than the piezo sensors and are typically 20 mm. Site requirements are as specified in Chapter 10 of the **TMH3**.
- The system was assessed for use on roads and is classified as Type A1 traffic monitoring system, which means that the system is valid for:

Subject: Seaqual F-Box WetFloor Drainage System

Certificate holder: Seaqual (Pty) Ltd

Description: This certificate covers the use of Seaqual F-Box WetFloor Sanitation Drainage System as an effective drainage and discharge system for grey water, domestic foul water or effluent for showers, bathrooms, kitchens (excluding for industrial use), laundries, balconies and patios.

Seaqual F-Box WetFloor Drainage System is an integrated floor drainage system that consists of a number of components. These components comprise F-Boxes, waterproofing flange and round dust covers which form part of the 1st Fix Pack (components for installation during construction / WetFloor phase). The 2nd Fix Pack (components for installation during the final / finishing phase) comprises M-sert, well, well cap, O-ring, grate and square protection cover.

The F-box is manufactured from ABS (Acrylonitrile Butadiene Styrene) plastic. It forms the main body of the drain and is available in different sizes and configurations. This includes 50 mm and 75 mm diameter side outlets (available in high and low profile configurations) and 50 mm or 75 mm bottom outlets. The F-Box is usually cast into the concrete slab or floor during construction phase. A waterproofing flange, also made from ABS, is inserted with the F-Box. The flange has weep holes to allow drainage of any water seeping through the tile grouting.

The Well-trap consists of two components made from polypropylene. The "Well" forms the base of either 75 mm or 51 mm installation and the "Well Cap" fits over the "Well" to make a complete trap. The Well-Trap prevents gasses from escaping.

The M-sert is manufactured from ABS plastic and it houses the grate. The M-sert is available in 110 mm x 110 mm or 200 mm x 200 mm dimensions.

Grates are available in different options and sizes depending on the M-sert size and desired finish material. There are three options available for the 110 mm x 110 mm M-sert. 110 mm ABS grate which allow water to flow from the sides and 110 mm square or round holes grates manufactured using 316 graded stainless steel. There are two options available for the 200 mm x 200 mm M-sert. One is a 200 mm square hole grate manufactured using 316 graded stainless steel and the other is a 200 mm tile grate manufactured from ABS plastic.

Subject: Atlas Plastics Water and Liquid Storage Tanks

Certificate holder: Atlas Plastics (Pty) Ltd

Description: Atlas Plastics Water and Liquid Storage Tanks are moulded from linear low density polyethylene (LLDPE) and a hexene co-polymer powder through a rotational moulding process. The production method is well known and is suitable and reliable for manufacturing plastic tanks for water and liquid storage. The raw materials used in the manufacture are the HR 486 grade of LLDPE polymer as well as H359 polymer supplied by ACD Rotoflo and SASOL Polymers. This material is a compounded food grade material which is safe to harvest and store the drinking water.

The roto-moulding manufactured tanks from these polymers are expected to be physically strong and the drinking water stored in such tanks has no adverse effects on humans or animals when consumed. All the tanks are vertical and available in different liquid capacities in a green colour up to 5000 litres. Each plastic tank is supplied with a manhole lid as per the sizes including 3 self-tapping screws.

Atlas Plastics Water and Liquid Storage Tanks are manufactured from UV resistant virgin material. The additives in the material include antioxidant, UV stabilizer and internal mould release and the tanks are designed to withstand the hydrostatic pressure. The tanks are lined internally with a black layer of UV resistant polyethylene. The black internal layer helps to prevent algae growth.

Subject: Polymer Modified Bitumen Stabilising Material Soil Stabilizer

Certificate holder: New Age Road Solutions (Pty) Ltd

Description: PMBSM soil stabiliser, is a poly modified bitumen emulsion. It is used for stabilising road base construction materials for non-paved gravel roads.

PMBSM is constituted through a chemical reaction by combining polymers and bitumen emulsion. Depending on the moisture content of the soil, PMBSM can be diluted with water to obtain the required optimum moisture content. The resultant mixture is added to natural gravels to form a water resistant, elastic and robust layer. The addition of PMBSM produces a Bitumen Stabilising Material design that results in increased strength and durability of the base course while repelling the ingress of water.

The mix design and application rate depend on the site specific material and the required road design specifications.

PMBSM is applied at ambient temperature by use of calibrated recyclers or Bitumen distributors. It is applied as a form of bitumen stabilizing material and the standard design methods detailed in SANRAL's manual South African Pavement Engineering Manual (SAPEM) 2013 and South African Bitumen Association (SABITA)'s TG2 are applicable. Alternatively New Age Road Solutions' guideline documents offer application methods.

Subject: Geotex 500 and 600 Series Macro-Synthetic Fibres

Certificate holder: Plusnet/Geotex (a division of Caroline Investments (Pty) Ltd)

Description: Geotex 500 and 600 series Macro-Synthetic Fibres are crimped, macro-synthetic fibers which are manufactured from a natural polypropylene homo polymer. The fibres are manufactured in a continuous process of heated polypropylene and then stretched to improve tensile strength. The 500 series fibres, which are black or white in colour, are 30 mm, 40 mm and 50 mm in length with a diameter of 0.9 mm. The 600 series fibres, which are grey in colour, are 30 mm, 40 mm and 50 mm in length with a diameter of 0.8 mm. Geotex 500 and 600 series fibres have a density ranging between 0.88 – 0.9 kg/m³.

When used in accordance with the manufacturer's guidelines, the fibres will help to reduce plastic shrinkage cracking in both reinforced as well as unreinforced concrete. The fibres will also impart toughness and impact resistance to concrete. These fibres should be regarded as an additive to be used in addition with any specified reinforcement and movement joints rather than as an alternative to reinforcement and movement joints.

They are typically used:

- in industrial, commercial and residential slabs, beams, columns and pavements and
- in thin-section pre-cast concrete components such as wall panels

Unless a competent design professional specifies otherwise, Geotex 500 and 600 Series Macro-Synthetic Fibres shall be added at the dosage rate of 1 bag of Geotex fibres per cubic metre of concrete (i.e. 3 kg/m³).

4. Cost components

4.1 Charges consist of the following cost components:

- (a) A variable cost component (VC);
- (b) a business sustaining cost component (BSC); and
- (c) a fixed cost component (FC).

4.2 VCs are treated as follows:

5. Independent variables

For purposes of charging, the independent variables of the tariff formulas set out in the Appendix are the following:

- (a) Published MCM expressed in kilograms;

- (b) “d”, measured on the basis of the great circle distance in nautical miles (rounded to the nearest nautical mile) along that portion of the flight path of an aircraft, which is within the boundaries of the South African flight information region, from the take-off airport or gateway to the landing airport or gateway. It excludes distance flown in the ACSA TMA airspace above the take-off or landing airport or the TMA airspace above FAKN or FARB, which TMA airspace is for charging purposes a radius of 35 nautical miles around the airport, irrespective of the actual radius.

6. Mass categories

6.1 Subject to the exceptions described in rules 6.2 and 6.3 below, the following aircraft mass categories apply:

- (a) Aircraft with a MCM of 15 000 kilograms or less are charged as follows:

 - (iii) FC based on MCM, and for Area Charge, also based on d, but no Area Charge is levied if d equals zero;
- (b) aircraft with a MCM of more than 15 000 kilograms are charged as follows:
 - (i) VC per movement;
 - (ii) BSC based on the square root of MCM; and
 - (iii) FC based on the square root of MCM, and for Area Charge, also based on d, but no Area Charge is levied if d equals zero.

6.2 Charges for aircraft with a MCM of 5 000 kilograms or less are zero-rated with respect to –

- (a) Area Charges; and
- (b) Aerodrome Charges or TMA Access Charges at ACSA airports or ACSA TMA airspace other than FAOR subject to the operators of such aircraft adhering to operating procedures around non-FAOR airports as the Company may establish from time to time.

6.3 For aircraft with a MCM of 5 000 kilograms or less at FAOR, the FC components that would otherwise have applied, are replaced with –

- (a) a minimum FC in the calculation of the Aerodrome Charge; and
- (b) a minimum FC in the calculation of the TMA Access Charge.

7. Formulas and coefficients

Subject to these Rules, the tariff formulas and tariff coefficients are set out in the Appendix attached.

- 8.5 The Company may annually revise and an operator may annually apply for a revision of the amount in section 8.3, with reference to actual or expected invoicing.
- 8.6 No interest is payable by the Company on any deposit or letter of guarantee held by it in terms of these Rules.

- 9.12 Extended air traffic service charges at a rate of **R3,083.73** per hour or part thereof, are payable by an operator for the extension of existing air traffic services beyond the normal negotiated and planned service amendments as documented in the Integrated Aeronautical Information Package (IAIP).
- 9.13 No Area Charge is payable in respect of any aircraft engaged in a flight that takes off and lands at the same airport.
- 9.14 The Company reserves the right to exempt the operator of an aircraft from payment of, or discount, any of the air traffic service charges if the Company is satisfied that the application of these Rules would amount to an unfair repetition of the same charge.

10. Withholding of services

The Company may withhold services –

- (a) until such time that the operator provides evidence to the Company that the deposit or guarantee referred to in section 8.3 has been provided, or
- (b) if the operator has failed to settle an invoice as per the Standard Terms and Conditions.

APPENDIX

TARIFF FORMULAS AND COEFFICIENTS

1. An air traffic service charge is composed of the sum of VC, BSC and FC for each discrete Aerodrome, TMA Access and Area movement undertaken, according to the following mass categories and locations:

Main Mass Category	Cost Component	Formulas & Coefficients		
		Aerodrome Charge	TMA Access Charge	Area Charge
FAOR \leq 5 000 kg	VC	R30.41	R30.41	
	BSC	R123.56 /10 000.MCM	R123.56 /10 000.MCM	
	FC	R65.19	R120.43	
5 000 kg < MCM \leq 15 000 kg	VC	R30.41	R30.41	R30.41
	BSC	R123.56/10 000.MCM	R123.56/10 000.MCM	R123.56/10 000.MCM
	FC	R130.40/10 000.MCM	R24.09/1 000.MCM	R17.28/100 000.MCM.d
> 15 000 kg	VC	R30.41	R30.41	R30.41
	BSC	R151.30/100. $\sqrt{\text{MCM}}$	R151.30/100. $\sqrt{\text{MCM}}$	R151.30/100. $\sqrt{\text{MCM}}$
	FC	R159.72/100. $\sqrt{\text{MCM}}$	R295.01/100. $\sqrt{\text{MCM}}$	R211.78/10 000. $\sqrt{\text{MCM}}$.d

2. Each Rand-value coefficient in the table above is multiplied by –
- (a) 100% for a domestic flight;
 - (b) 100% for a regional flight: and
 - (c) 100% for an international flight,

except in the case of FCs for Aerodrome and TMA Access Charges at FAOR for aircraft with $\text{MCM} \leq 5\,000\text{ kg}$ where the coefficient as stated in the table applies.

3. As an illustration, assume the following flights:

Example 1

Domestic flight from FAOR to FACT, with aircraft with $\text{MCM} = 100\,000\text{ kg}$ and $d = 686$ miles

$$\begin{aligned}
 \text{Charge} &= [\text{Aerodrome Charge at FAOR} + \text{TMA Access Charge at FAOR} + \text{Area Charge} + \text{TMA} \\
 &\quad \text{Access Charge at FACT} + \text{Aerodrome Charge at FACT}] \times 100\% \\
 &= [[\text{VC}_{\text{Aero}} + \text{BSC}_{\text{Aero}} + \text{FC}_{\text{Aero}}] + [\text{VC}_{\text{TMA}} + \text{BSC}_{\text{TMA}} + \text{FC}_{\text{TMA}}] + [\text{VC}_{\text{Area}} + \text{BSC}_{\text{Area}} + \text{FC}_{\text{Area}}] \\
 &\quad + [\text{VC}_{\text{TMA}} + \text{BSC}_{\text{TMA}} + \text{FC}_{\text{TMA}}] + [\text{VC}_{\text{Aero}} + \text{BSC}_{\text{Aero}} + \text{FC}_{\text{Aero}}]] \times 100\%
 \end{aligned}$$

$$\begin{aligned}
&= [[R30.41 + (R151.30/100 \times \sqrt{100\,000}) + (R159.72/100 \times \sqrt{100\,000})] + [R30.41 + \\
&\quad (R151.30/100 \times \sqrt{100\,000}) + (R295.01/100 \times \sqrt{100\,000})] + [R30.41 + (R151.30/100 \times \\
&\quad \sqrt{100\,000}) + (R211.78/10\,000 \times \sqrt{100\,000} \times (686-35-35))] + [R30.41 + (R151.30/100 \times \\
&\quad \sqrt{100\,000}) + (R295.01/100 \times \sqrt{100\,000})] + [R30.41 + (R151.30/100 \times \sqrt{100\,000}) + \\
&\quad (R159.72/100 \times \sqrt{100\,000})]] \times 100\% \\
&= [(R30.41 \times 5) + (R151.30/100 \times \sqrt{100\,000} \times 5) + (R151.30/100 \times \sqrt{100\,000} \times 2) + \\
&\quad (R295.01/100 \times \sqrt{100\,000} \times 2) + (R211.78/10\,000 \times \sqrt{100\,000} \times 616)] \times 100\% \\
&= R9,545.65
\end{aligned}$$

Example 2

International flight from FAOR to international gateway, with aircraft with MCM = 4 500 kg and d = 211 miles

$$\begin{aligned}
\text{Charge} &= [\text{Aerodrome Charge at FAOR} + \text{TMA Access Charge at FAOR}] \times 100\% \\
&= [[VC_{\text{Aero}} + BSC_{\text{Aero}}] \times 100\% + FC_{\text{Aero}}] + [[VC_{\text{TMA}} + BSC_{\text{TMA}}] \times 100\% + FC_{\text{TMA}}] \\
&= [[R30.41 + (R123.56/10\,000 \times 4\,500)] \times 100\% + R65.19] + [[R30.41 + (R123.56/10\,000 \times \\
&\quad 4\,500)] \times 100\% + R120.43] \\
&= [(R30.41 \times 2) + (R123.56/10\,000 \times 4\,500 \times 2)] \times 100\% + R65.19 + R120.43 \\
&= R357.65
\end{aligned}$$
