4.2.3.3 Tenderers shall be informed of the competitive negotiation process and notified of the evaluation criteria and associated weightings in the tender data. The evaluation criteria associated with each successive round of negotiations shall not be varied. Tenderers shall be notified in advance of the weighting attached to each category or subcategory of evaluation criteria whenever another round of offers is called for.

#### 4.3 Evaluation of Tenders on Functionality

Generally, tender submissions are evaluated in terms of "Financial offer and preference". In the event of "functionality" being introduced as part of an evaluation criteria, such a requirement must be stated in the tender documents.

### 4.3.1 Process for Evaluation of Tenders on Functionality

4.3.1.1 The evaluation criteria for measuring functionality must be objective.

4.3.1.2 The tender documents must specify-

- a) the evaluation criteria for measuring functionality;
- b) the points for each criteria and, if any, each sub-criterion; and
- c) the minimum qualifying score for functionality.

4.3.1.3 The minimum qualifying score for functionality for a tender to be considered further-

- a) must be determined separately for each tender; and
- b) may not be so-
  - i. low that it may jeopardize the quality of the required engineering and construction works; or
  - ii. high that it is unreasonably restrictive.

4.3.1.4 Points scored for functionality must be rounded off to the nearest two decimal places.

4.3.1.5 A tender that fails to obtain the minimum qualifying score for functionality, as indicated in the tender documents is not an acceptable tender.

4.3.1.6 Each tender that obtained the minimum qualifying score for functionality must be evaluated further in terms of price and the preference point system and any objective criteria envisaged in regulation 11 of the Preferential Procurement Regulations, 2017 (as amended).

### 4.3.2 Functionality in different Contracting Strategies

To apply the different contracting strategies, works shall be classified as follows:

- **Simple/straightforward/routine work** - where the tasks or activities are of a straightforward nature in terms of which inputs are relatively well known and outputs can be readily defined.
- **Complex work** - characterised by requirements for higher levels of skills, greater resources or not well defined inputs and outputs.
- **Specialist work** - requiring considerable innovation, creativity, and expertise or skill (or both) or work that has a high downstream impact.

*Note: The value of the project or quantities shall not be used to determine whether the project is of a complex or specialist nature.*

#### 4.3.2.1 Design by an employer

- a) If the construction works contract is deemed to be simple or straightforward or routine. No functionality criteria shall be specified in the tender data.
- b) If the construction works contract is deemed to be of a complex or specialist works, the employer may, in the tender data, specify functionality criteria and such criteria shall include:
  - i. Relevant applicable trades or skills in accordance with the scope of works; or
  - ii. Suitably qualified professional person in the built environment; or
  - iii. Any other legislated requirements as per the scope of works.

*Note: The following contracting strategies are deemed to be deployed in circumstances where construction works contracts are of a complex or specialist works.*

#### 4.3.2.2 Develop and Construct

The employer must, in the tender data, specify functionality criteria and such criteria shall include:

- i. Professionals registered with relevant built environment professions councils.
- ii. Demonstrated experience of key personnel in relation to the scope of works.
- iii. Any other legislated requirements as per the scope of work.

#### 4.3.2.3 Design and Build/Construct

The employer must, in the tender data, specify functionality criteria and such criteria shall include:

- i. Professionals registered with relevant built environment professions councils.
- ii. Demonstrated experience of key personnel in relation to the scope of works.

- i. Professionals registered with relevant built environment professions councils.
- ii. Demonstrated experience of key personnel in relation to the scope of works.
- iii. Any other legislated requirements as per the scope of work.

**4.3.3** Where functionality is evaluated, at least three persons who are fully conversant with the technical aspects of the scope of works shall undertake such evaluation.

C.3.1.2 Consider any request to make a material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used to prequalify a tenderer to submit a tender offer in terms of a previous procurement process and deny any such request if as a consequence:

- a) an individual firm, or a joint venture as a whole, or any individual member of the joint venture fails to meet any of the collective or individual qualifying requirements;

C.3.8.2 A responsive tender is one that conforms to all the terms, conditions, and specifications of the tender documents without material deviation or qualification. A material deviation or qualification is one which, in the Employer's opinion, would:

- a) detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Scope of Work,
- b) significantly change the Employer's or the tenderer's risks and responsibilities under the contract, or
- c) affect the competitive position of other tenderers presenting responsive tenders, if it were to be rectified.

Reject a non-responsive tender offer, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.

### C.3.9 Arithmetical errors, omissions and discrepancies

C.3.9.1 Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.

  - (ii) the summation of the prices.

C.3.9.3 Notify the tenderer of all errors or omissions that are identified in the tender offer and either confirm the tender offer as tendered or accept the corrected total of prices.

C.3.9.4 Where the tenderer elects to confirm the tender offer as tendered, correct the errors as follows:

- a) If bills of quantities or pricing schedules apply and there is an error in the line item total resulting from the product of the unit rate and the quantity, the line item total shall govern and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line item total as quoted shall govern, and the unit rate shall be corrected.
- b) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if bills of quantities apply) to achieve the tendered total of the prices.

### C.3.10 Clarification of a tender offer

Obtain clarification from a tenderer on any matter that could give rise to ambiguity in a contract arising from the tender offer.

### C.3.11 Evaluation of tender offers

The Standard Conditions of Tender standardize the procurement processes, methods and procedures from the time that tenders are invited to the time that a contract is awarded. They are generic in nature and are made project specific through choices that are made in developing the Tender Data associated with a specific project.

Conditions of tender are by definition the document that establishes a tenderer's obligations in submitting a tender and the employer's undertakings in soliciting and evaluating tender offers. Such conditions establish the rules from the time a tender is advertised to the time that a contract is awarded and require employers to conduct the process of offer and acceptance in terms of a set of standard procedures.

The CIDB Standard Conditions of Tender are based on a procurement system that satisfies the following system requirements:	
Requirement	Qualitative interpretation of goal
Fair	The process of offer and acceptance is conducted impartially without bias, providing simultaneous and timely access to participating parties to the same information.
Equitable	Terms and conditions for performing the work do not unfairly prejudice the interests of the parties.
Transparent	The only grounds for not awarding a contract to a tenderer who satisfies all requirements are restrictions from doing business with the employer, lack of capability or capacity, legal impediments and conflicts of interest.
Competitive	The system provides for appropriate levels of competition to ensure cost effective and best value outcomes.

Cost effective	The processes, procedures and methods are standardized with sufficient flexibility to attain best value outcomes in respect of quality, timing and price, and least resources to effectively manage and control procurement processes.
