HIGH ALERT: SCAM WARNING!!!

TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works (GPW)*.

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

PROCUREMENT@GPW-GOV.ORG

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

GPW has an official email with the domain as [@gpw.gov.za](mailto:GPW@gpw.gov.za)

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

GPW will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

Government Printing Works gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at www.gpwonline.co.za
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

BOARD NOTICES • RAADSKENNISGEWINGS

BOARD NOTICE 125 OF 2021**Draft Guideline Professional Fees issued for consultation with Voluntary Associations in terms of Section 34 (2) of the Architectural Profession Act, 2000 Act 44 of 2000**

The guideline professional fees indicated in table 1, 2, 3 and 4 below must be read in the context of the Framework Guideline Professional Fees. The guidelines professionals' fees repeal Board Notice 21 of 2020. Guidelines professional fees describe the two methods of fee calculation: project cost based and time based. Both methods use the definitions of complexity of the project type derived from the SACAP Identification of Work (IDOW) as set out below:

- 1) **"Low complexity projects"** means simple buildings or groups of buildings in an uncomplicated grouping with low impact on the environment:

These are structures with low performance requirements. Structures of simple utilitarian character, design and detail. The structures are constructed utilizing standard low technology building methods. They require a minimum of mechanical and electrical services or equipment, and basic civil works infrastructure;

- 2) **"Medium complexity projects"** means buildings or groups of buildings in a relatively uncomplicated grouping with a medium impact on its environs:

These are structures with medium performance requirements. The structures are of average character and design or detail. The structures require non-complex structural and civil works and an average level of mechanical or electrical equipment as could normally be handled by design- supply specialist contractors;

- 3) **"High complexity projects"** means a building or buildings in a large or complicated grouping with a significant impact on its environs:

These are structures with high performance requirements and demanding a sophisticated level of design and detail content to respond to specialized requirements. Complex buildings will usually incorporate comparatively large or specialised mechanical, electrical and other specialist installations, or be of complex structural or civil design;

METHOD 1: Project Cost Based Fee

Draft Framework for guidelines professional fees in respect of architectural services rendered by the registered architectural professionals issued for consultation with Voluntary Associations in terms section 34 (2) of the Architectural Profession Act 44 of 2000.

1. Introduction

- a) In terms of section 34 (2) of the Architectural Profession Act 44 of 2000, the South African Council for the Architectural Profession, hereafter referred to as SACAP, must annually, after consultation with the Voluntary Associations, determine guideline professional fees and publish those fees in the *Gazette*.
- b) The Guideline professional fees shall be in line with the principles referred to in section 4(k)(v) of the Council for the Built Environment Act 43 of 2000 which stipulate that “the principles upon which Council must base guideline professional fees should be in accordance with any legislation relating to the promotion of competition”.
- c) The guideline professional fees are published annually in the Government Gazette as a guideline only and does not amount to direct or indirect price fixing. The guideline professional fees are deemed as a guide to provide a fair and reasonable remuneration to the architectural professional in order to provide for an appropriate level and quality of service in terms of the Standard of Service.

2. Purpose

- a) The Council of the Built Environment (CBE) **Policy Framework on determination and review of guideline professional fees for built environment professions** stipulates that the guideline professional fees are determined and published as a guide only and not as prescribed fees which registered professionals are entitled to charge.
- b) Guideline professional fees are, for the purpose of guidance required to promote market efficiency and redress consumers and the public information deficit, relative to the professional’s knowledge and expertise. The guideline professional fees are not prescribed or set as maximum or minimum mandatory fees to be charged for professional services rendered, but serve as guideline.

3. Principles

- a) The guideline professional fees are based on cost of works as per fee survey undertaken by SACAP and Voluntary Associations in May 2021. As per the **CBE Policy Framework on determination and review of guideline professional fees for built environment professions**, the guideline professional fees take into consideration reasonable rate of return on investment, intellectual capital, effort and, most importantly, risk.
- b) The guideline professional fees tables have been split into 3 complexities to align with the Identification of Work.
- c) The guideline professionals fee tables represent the fees for a full service by a hypothetical average sized architectural practice, practising in a responsible and sustainable manner. This means that the tables are not meant to fit any one specific project perfectly and, in almost all cases, should be adjusted up or down in relation to specific project conditions.
- d) Unless otherwise agreed, in writing, by the architectural professional, the information produced in relation to a single project is authorised for use only on that project and may not be used for another project, in whole or in part.
- e) The guideline professional fees are expressly not suitable for use in a basket of professional fees calculation, where all professional fees are reduced to fit a required overall fee basket. Reduction of fees in this manner, without due regard to a concurrent agreed reduction of service, is strongly discouraged because the quality of service will be impacted negatively to the detriment of a client.

4. General provisions

The guideline professional fees published under Gazette No. 43591 board notice 91 of 2020 is hereby repealed. The provisions of previous board notice shall only apply in respect of existing projects. The new board notice shall apply to all new projects.

Furthermore, services additional to the standard service may be included, and these non-exhaustive additional services may be included as the parties may deem appropriate.

8. Fees description

The calculation of fees based on a percentage of project cost is the standard basis for determining professional fees and represents the accepted basis by the Built Environment Professions for remuneration of professional services. Such fees are referred to as project cost-based fees. An alternative to project cost-based fee can be negotiated; for example, time-based fees or cost per building area fees.

9. Project cost-based fee

9.1 A project cost-based fee is appropriate when there is a well-defined scope of service for the architectural professional. Such fee is based on a budget for the works for fee calculation purposes, and shall be adjusted on the final cost of the works.

9.2 The project cost-based fee results in a sliding scale, which arises from the series of percentages related to the value of the works and its complexity – low, medium or high – as defined in guideline profession fees board notice. The primary fee is stated as an appropriate value to smooth the sliding scale.

9.3 The adjustment provided for in the guidelines professional fee is based on the reduced aggregate of the value of the works and/or project from which the budget for the works for fee purposes is derived. This arises from the provision that fees for architectural services are calculated on the total value of the works and represent an average over all elements of the works and/or project.

9.4 Where a fee is calculated as a project cost-based fee, the fee consists of a primary fee (Column C) plus a secondary fee. The secondary fee is calculated as a percentage (Column D) of the value of the works per cost bracket indicated in Column E. *Refer to guideline professional fees Board Notice.*

9.5 The formula and examples thereof are in the guidelines professional fee.

9.6 Where an architectural professional has undertaken work, to change the agreed design and the fee is not covered by an increase in fees relative to the construction cost, a time-based fee may be agreed for this change.

10. Time-based fee

10.1 Where the scope of service is not clearly defined, or the service relates to small scale projects, or the service is of an unusual or specialised nature, a time-based fee is recommended to be used as the basis of remuneration. Where fees for architectural professional services are time based, such fees may be based on an hourly rate as set out in the guidelines professional fee board notice.

10.2 Where an architectural professional has undertaken work to change the agreed design and the fee is not covered by the agreed time-based fee, additional fees may be agreed upon.

10.3 Where the Architectural Professional is required to redo or alter work already completed in order to give effect to a cost saving, there shall be an additional fee for this work calculated on a time charge basis. This additional fee shall be agreed prior to the carrying out of the work.
