## HIGH ALERT: SCAM WARNING!!!

### TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works (GPW)*.

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

[PROCUREMENT@GPW-GOV.ORG](mailto:PROCUREMENT@GPW-GOV.ORG)

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

*GPW* has an official email with the domain as [@gpw.gov.za](mailto:@gpw.gov.za)

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

*GPW* will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

*Government Printing Works* gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

## Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

### How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at [www.gpwonline.co.za](http://www.gpwonline.co.za)
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

## DEPARTMENT OF EMPLOYMENT AND LABOUR

NO. 4403

23 February 2024

**NOTICE IN TERMS OF SECTION 62 (7) OF THE LABOUR RELATIONS ACT 66 OF 1995 (AS AMENDED)**

PLEASE TAKE NOTICE THAT:-

Truworths Ltd is a company operating primarily in the wholesale and retail fashion industry. As at 21 December 2022 it operated some 766 retail stores throughout South Africa, mostly selling clothing, and it employs some 10 500 employees.

During 2022 the company acquired two new businesses as going concerns, viz. K2020 (Pty) Ltd trading as Barrie Cline Clothing, and Bonwit (Pty) Ltd. In terms of section 197 of the Labour Relations Act No. 66 of 1995 as amended, the employees of these businesses were transferred to Truworths on the same conditions of employment as applied prior to the transfer. Both of the companies, prior to the transfer, were registered with the National Bargaining Council for the Clothing Manufacturing Industry (NBCCMI).

Truworths has applied to the Commission for Conciliation, Mediation and Arbitration ("the CCMA") in terms section 62(1) of the Labour Relations Act for a demarcation order to the effect that the former employees of the two acquired businesses no longer fall under the jurisdiction of the NBCCMI, as the employees are now employed to perform a support function to the company's main business enterprise, being retail. Truworths also claims that the functions performed by the employees in relation to design and the manufacturing of samples do not fall within the registered industry definition of the NBCCMI. The application is opposed by the NBCCMI, as well as by the Southern African Clothing and Textile Union (SACTWU).

The CCMA believes that the questions raised by this demarcation dispute are potentially of wider application in that there may be other parties who have an interest in this dispute, and those parties may well be affected by the outcome of this application. Such entities should have the right to make representations to the CCMA. The CCMA therefore invites written representations in relation to the issue in dispute by any interested party.

Written representations may be made within 21 calendar days of the date of publication of this notice, and should be clearly marked with reference number **WECT1194-23** and directed to:-

Agrément Certificate 2014/463 (Amended March 2022)

**Subject:** Sterling Building System

**Certificate holder:** Sanjo Fabtech Sterling (Pty) Ltd

**Description:** The Sterling Building System is for double- and multi-storey structures. Foundations are the conventional raft foundation. They are always the responsibility of a professional registered competent engineer.

External wall panels are 162 mm or 229 mm thick load bearing and comprise two skins of 6 mm Fibre cement boards which are separated by 150 mm x 100 mm x 100 mm or 217 mm x 100 mm x 100 mm recycled plastic spacers creating a cavity. The cavity is filled with concrete with a compressive strength of at least 10 MPa.

Internal wall panels are 112 mm thick non-load bearing and comprise two skins of 6 mm Fibre cement boards which are separated by 100 mm x 100 mm x 100 mm recycled plastic spacers and are similar to external wall panels.

Alternatively, the external wall panels can be 162 mm or 229 mm thick non-load bearing comprising two skins of 6 mm fibre cement boards which are separated by 150 mm x 100 mm x 100 mm or 217 mm x 100 mm x 100 mm recycled plastic spacers creating a 150 mm/217 mm thick cavity. The cavity is filled with light weight concrete of dry density of 1200 kg/m<sup>3</sup>.

The dividing walls between the buildings comprise either a 162 mm or 229 mm wall depending on structural requirements.

The roof structure consists of timber or steel trusses with heavy- or light-weight cladding. A professional registered competent engineer must always design the roof to provide support to the gable wall as well as any additional bracing between trusses as required.

Agrément Certificate 2023/646

**Subject:** Waterreserve Tank

**Certificate holder:** WR Tanks (Pty) Ltd

**Description:** The Waterreserve Tank is a tank produced using the rotational moulding process. The tank is manufactured from Linear Low-Density Polyethylene (LLDPE) polymer material. The tanks are currently available in grey colour only. The LLDPE tank has a total volume of 80 litres. The 80 litres are the tank's total volume inside and allow for an air gap of approximately 10 litres above the water level. i.e the usable capacity is approximately 70 litres.

The Waterreserve Tank is mounted to a wall, using a steel mounting bracket. The water storage tank is attached to a mild steel powder-coated frame with six (6) screws with sizes of 10 mm  $\varnothing$  x 80 mm long and Fischer Duo power plugs. The tank is mounted internally and has three (3) points of contact with the frame, to ensure that water does not push the tank off the frame. The minimum wall thickness of approximately 4 mm Linear Low-Density Polyethylene (LLDPE) tank has two (2) inlets at the bottom of the tank, the connections are connected to the tank using the spin wells process. The two (2) inlets connect the Waterreserve Tank to the mains. Therefore, water flows in and out through the flexible pipes to keep the

water cycling. The Waterreserve Tank also has a tap for channelling and accessing the water.

**NB:** The fixing of the frame as the structural integrity of the wall is the responsibility of a competent person.

The Agrément certificate contains detailed information on the product and can be accessed at <http://www.agrement.co.za>.

**REASONS FOR THE APPLICATION:**

The applicant stated the following as reasons for the application:

- Historically, Defy sourced the cooker hoods from a local manufacturer, however, the company has since discontinued the manufacture of cooker hoods, leaving Defy with no option but to import the product; and

## DEPARTMENT OF TRADE, INDUSTRY AND COMPETITION

## NOTICE 2333 OF 2024

**INTERNATIONAL TRADE ADMINISTRATION COMMISSION****NOTICE OF AN INITIATION OF THE INVESTIGATION FOR REMEDIAL ACTION IN THE FORM OF SAFEGUARD MEASURE AGAINST THE INCREASED IMPORTS OF CERTAIN FLAT-ROLLED PRODUCTS OF IRON, NON-ALLOY STEEL OR OTHER ALLOY STEEL (NOT INCLUDING STAINLESS STEEL), WHETHER OR NOT IN COILS (INCLUDING PRODUCTS CUT-TO-LENGTH AND 'NARROW STRIP'), NOT FURTHER WORKED THAN HOT-ROLLED (HOT-ROLLED FLAT), NOT CLAD, PLATED OR COATED, EXCLUDING GRAIN-ORIENTED SILICON ELECTRICAL STEEL.**

The International Trade Administration Commission of South Africa ("the Commission") decided to proceed with an investigation for remedial action in the form of a safeguard measure against the increased imports of certain flat-rolled products of iron, non-alloy steel or other alloy steel (not including stainless steel), whether or not in coils (including products cut-to-length and 'narrow strip'), not further worked than hot-rolled (hot-rolled flat), not clad, plated or coated, excluding grain-oriented silicon electrical steel, hereinafter referred to as ("hot-rolled steel products").

Based on the information submitted, the Commission decided that the applicant submitted *prima facie* evidence to indicate:

- The events cited can be regarded as unforeseen developments and these unforeseen developments and the effect of the obligations incurred under the GATT 1994 led to the increased volume of imports in absolute and relative terms;
- The surge in the volume of imports is recent, sharp, significant, and sudden enough;
- The SACU industry is experiencing serious injury; and

- This is causally linked to the surge in imports.

## THE APPLICANT

The South African Iron & Steel Institute ("SAISI" or the "Applicant") an industry association, applied on behalf of ArcelorMittal South Africa Limited ("AMSA"), being the major producer of the subject product in the Southern African Customs Union ("SACU").

A non-confidential version of the application is available for inspection at the Commission's offices.

## DESCRIPTION OF THE SUBJECT PRODUCT UNDER INVESTIGATION

The subject product is described as certain flat rolled products of iron, non-alloy steel, or other alloy steel (not including stainless steel), whether or not in coils (including products cut-to-length and "narrow strip"), not further worked than hot-rolled (hot rolled flat), not clad, plated or coated, excluding grain-oriented silicon electrical steel. The subject product is imported under the following tariff headings: 7208.10, 7208.25, 7208.26, 7208.27, 7208.36, 7208.37, 7208.38, 7208.39, 7208.40, 7208.51, 7208.52, 7208.53, 7208.54, 7208.90, 7211.14, 7225.30, 7225.40, 7225.99, 7226.99.

The Applicant stated that an analysis of the import statistics and the tariff subheadings used to import the subject product indicates that importers are also using the tariff subheadings 7211.13, 7211.19, and 7226.91 as loopholes to import hot-rolled products into the SACU. The Applicant therefore requests the Commission to include these tariff subheadings when imposing the safeguard measures.

The Commission decided that should the safeguard measures be imposed on hot-rolled steel products classifiable under tariff headings 7208.10, 7208.25, 7208.26, 7208.27, 7208.36, 7208.37, 7208.38, 7208.39, 7208.40, 7208.51, 7208.52, 7208.53, 7208.54, 7208.90, 7211.14, 7225.30, 7225.40, 7225.99, 7226.99, they will also be

imposed on hot-rolled steel products classifiable under tariff subheadings 7211.13, 7211.19, and 7226.91, to prevent any potential loopholes.

### **DESCRIPTION OF THE LIKE OR DIRECTLY COMPETITIVE SACU PRODUCT**

The SACU product is described as certain flat rolled products of iron, non-alloy steel, or other alloy steel (not including stainless steel), whether or not in coils (including products cut-to-length and “narrow strip”), not further worked than hot-rolled (hot rolled flat), not clad, plated or coated, excluding grain-oriented silicon electrical steel.

### **ALLEGATION OF SERIOUS INJURY AND CAUSAL LINK**

The period of investigation for data evaluation for the purposes of determining the allegation of serious injury is from 01 July 2020 to 30 June 2023. Furthermore, this application contains information with regard to increased quantities of imports and serious injury for the period 01 July 2020 to 30 June 2023.

The injury analysis relates to information submitted by AMSA being the major producer of the subject product in the SACU.

The Applicant alleged and submitted *prima facie* evidence indicating that it is experiencing a serious injury in the form of a decline in output, net profit, market share, capacity utilisation, and employment, during the period of surge from 01 July 2021 to 30 June 2023.

Furthermore, an analysis for the period of investigation from 2020 July to June 2023, indicates that the Applicant has experienced a serious injury in the form of a decline in sales, output, net profit, market share, capacity utilisation, and employment.

On this basis, the Commission found that *prima facie* evidence was submitted to indicate that the SACU industry was experiencing serious injury which could be causally linked to the recent, sudden, serious, and significant surge in imports of the subject products.

## UNFORESEEN DEVELOPMENTS

The Applicant stated that a confluence of events forms the basis of the unforeseen development that supports this application, which is, ultimately the considerable oversupply of steel, and specifically the hot-rolled steel products, in the world today causing a surge in the volume of imports into the SACU.

The Applicant stated that during the Uruguay Round negotiations in 1986-1994, South Africa did not foresee the following events:

- Studies show that China did not become a fully-fledged market economy as it assured World Trade Organisation Members it would during negotiations;
- The unprecedented steep rate of increase in crude steel and hot rolled steel production capacity after the Uruguay Round of negotiations. This mainly took place to support growing construction, automotive, and manufacturing activity, as well as to help build infrastructure, particularly in emerging economies. This growth in global capacity was mainly fueled by the growth of the Chinese and Asian steel markets;
- Chinese economic activity has consistently declined since 1994 and large steel producers follow aggressive export strategies, fuelled by an oversupply of steel products; China's extraordinary economic growth is slowing down dramatically, and the Chinese domestic market for steel is retracting;
- The significant downturn of the steel market as a result of the slowdown of

economic growth in China contributed to the imbalance between capacity and demand, that is the global oversupply of steel. This led to a significant increase in export volumes by countries with excess capacity;

- As a result of all of these factors, Chinese producers have to increase their exports further, at reduced prices, to rid themselves of excess stocks;
- Worldwide, countries are taking urgent action to raise tariffs and impose trade remedies to protect their domestic steel industries; and it is expected that the surge in imports that the SACU has been experiencing will be augmented by the recent economic slowdown in China and by the fact that China's export markets are contracting rapidly; and
- An increase in trade remedy actions is being taken on steel products, including hot rolled steel, by several countries, notably the European Union, the United Kingdom, the United States of America, and Vietnam, which are significant export markets for these products. Given the fact that hot-rolled steel is a commodity product, excess capacity in one region can, with relative ease, displace production in other regions, thus harming producers in those regions.

The Commission decided that the Applicant submitted *prima facie* information indicating that events cited by the Applicant are regarded as unforeseen developments which, with the effects of the obligations incurred under GATT 1994, led to the alleged surge of imports of the subject product, as per the provisions of Article XIX of GATT 1994.

## LEGAL FRAMEWORK

This investigation will be conducted in accordance with the International Trade Administration Act, 2002 ("ITA Act") and the International Trade Administration Commission Safeguard Regulations ("SGR") read with the World Trade Organization

Agreement on Safeguards (“the Safeguard Agreement”).

This rule applies to all parties and to all correspondence with and submissions to the Commission, which unless indicated to be confidential and filed together with a non-confidential version, will be placed on the public file and be made available to other interested parties.
