Authority conveyed by operating licence

56. An operating licence granted and issued in terms of this Act –

- (b) does not exempt the holder from the obligation to comply with any requirement or condition imposed by or in terms of any law or licence issued by any other competent authority.

Persons who may hold operating licences

57. An operating licence may only be issued to and held by the person registered, in terms of the National Road Traffic Act, as the owner or operator of the vehicle, as defined in that Act, and specified in the operating licence, except where the operating licence relates to the operation of a service in terms of a commercial service contract or a subsidised service contract, and the operator party to the contract has sub-contracted another operator to operate part of that service on behalf of the first-mentioned operator and in such a case –

- (a) the sub-contracted operator must be the so registered owner or operator of the vehicle used by the latter for operating that service on behalf of the operator party to the commercial service contract or subsidised service contract; and
- (b) that vehicle must be specified in the operating licence as the vehicle to be so used for operating that service.

Rules applicable with regard to various operating licences

- (c) where applicable, the likelihood that, in future, the service may no longer be required in terms of any relevant transport plans; and
- (d) the likelihood that the service may become the subject of a commercial service contract or a subsidised service contract.

(2) In the case of operating licences for long-distance services, the Board when determining the picking up and setting down points must impose the condition that passengers may not be picked up or set down en route, unless the operator has reached agreement in this regard with the respective transport authorities and municipalities.

(3) In the case of an application for the granting, renewal or amendment of an operating licence relating to a long-distance service, due regard must be given to the provisions of any transport plans prepared by the relevant planning authority and, subject to this paragraph –

(b) The planning authority may not grant the consent referred to in paragraph (a) where the operation of the long-distance service will or is likely to be detrimental to the operation, by means of that vehicle, of the public transport services provided for in that transport plan.

(2) A vehicle specified in an operating licence to provide a long-distance service may not also be specified in the operating licence as being the vehicle by means of which a public transport service provided for in a transport plan is to be operated, unless the planning authority has consented thereto.

(2) The authorised official of the Board must allow the replacement and issue an amended operating licence to the holder, if satisfied that –

- (a) the replacing vehicle has the same passenger capacity as the replaced vehicle, or less, or such capacity is less than twenty percent greater than that of the replaced vehicle, and is of the same nature as the replaced vehicle, and that the quality and standard of the service which is authorised by the operating licence will not be affected by the replacement;
- (b) the replacing vehicle is otherwise suitable for the operation of the public transport service authorised by that operating licence, has been certified as roadworthy and is properly licensed in compliance with road traffic laws; and

 - (b) operates the service to which such an operating licence relates, in compliance with the terms of, and conditions attached to, the operating licence.
