INTERNATIONAL TRADE ADMINISTRATION COMMISSION
OF SOUTH AFRICA
CUSTOMS AND EXCISE TARIFF APPLICATIONS
LIST 8/2004

The following application concerning the Customs and Excise Tariff has been received by The International Trade Administration Commission of South Africa. (ITAC) Any objection to or comment on this representation should be submitted to the Chief Commissioner, ITAC, Private Bag X753, Pretoria, 0001, within six weeks of the date of this notice. Attention is drawn to the fact that the rate of duty mentioned in the application is that requested by the applicant and that the Commission may, depending on its findings, recommend a lower or higher rate of duty.

CONFIDENTIAL INFORMATION

Please note that if any information is considered to be confidential then a non-confidential version of the information must be submitted, simultaneously with the confidential version. In submitting a non-confidential version the following rules are strictly applicable and parties must indicate:

- ☐ *Where confidential information has been omitted and the nature of such information;*
- ☐ *A summary of the confidential information which permits a reasonable understanding of the substance of the confidential information; and*
- ☐ *In exceptional cases, where information is not susceptible to summary, reasons must be submitted to this effect.*

This rule applies to all parties and to all correspondence with and submissions to the Commission, which unless indicated to be confidential and filed together with a non-confidential version, will be made available to other interested parties.

If a party considers that any document of another party, on which that party is submitting representations, does not comply with the above rules and that such deficiency affects that party's ability to make meaningful representations, the details of the deficiency and the reasons why that party's rights are so affected must be submitted to the commission in writing forthwith (and at e latest 14 days prior to the date on which that party's submission is due). Failure to do so timeously will seriously hamper the proper administration of the investigation, and such party will not be able to subsequently claim an inability to make meaningful representations on the basis of the failure of such other party to meet the requirements.

REDUCTION OF DUTY ON :

"Used pneumatic tyres, classifiable under tariff subheading 4012.20.90 from 25 per cent ad valorem to free of duty.

In support of the application the applicant submitted the following reason:

- ❑ The volumes of used pneumatic tyres from the SACU industry are not sufficient to meet the demand of the retread tyre market.
- ❑ There is no need for 25 per cent ad valorem duty on tariff subheading 4012.20.90 given that there is an import control measure in place, which allows importation of used tyres by bona fide retreaders only.

Please note that Volume 1 Chapter 6 and Volume 4 Chapter 10 are included only for use with the South African Road Traffic Signs Manual Volume 3. They have NOT been approved by SATCC TU/SADC yet.

Concerns:

Volume 1

of the Manual contains detailed signing policy and design principles. The text covering each sign, marking and signal starts with a statement regarding the meaning, or significance, of the device. These statements are essentially the same as those given in the harmonized model road traffic sign regulations, prepared at the same time as Volume 1. The content of Volume 1 provides an in depth description of the road traffic sign system and working detail on the use of each individual component of the system.

Volume 2

deals with the collective application of signs, markings, and signals for specific subject areas such as traffic accommodation at roadworks, tourism signing, public transport signing and signing for the control of heavy vehicles.

Volume 3

provides in depth detail on the selection, installation, operation and control methods for traffic signals.

Volume 4

gives complete dimensional details, together with accurate scalable drawings, of all signs, markings and signals, including details of all letter types used on direction signs.
