THE DEPARTMENT OF WATER AFFAIRS AND FORESTRY**THE NATIONAL FIRE DANGER RATING SYSTEM IN TERMS OF THE
NATIONAL VELD AND FOREST FIRE ACT, 1998(ACT NO 101 OF 1998)**

I, **Tshepo Malatji**, in my capacity as Director: Forestry Regulation and acting in terms of section 9(1) of the National Veld and Forest Fire Act, read with the delegations of powers and duties made in terms of the National Veld and Forest Fire Act, hereby make and publish for general information the National Veld and Forest Fire Act, as set out in the Schedule hereto.

Tshepo Malatji
DIRECTOR : FORESTRY REGULATION

DATE: 17/06/05

Schedule

The National Fire Danger Rating System applies to the entire country and consists of the following components

1. The structure and formula

The structure and formula as contained in Appendix 1, is used to calculate the indicator values required to rate the fire danger rating in each region for an appropriate period or periods.

2. The fire danger rating

Appendix 2 shows the fire danger rating, which indicates, in a clear format, the fire prevention and preparedness measure to be taken for each rating.

3. The fire danger regions and threshold values

The entire country has been divided into separate regions, each region being one in which the fire danger is sufficiently uniform to allow for a single rating, which is meaningful for the entire region. Appendix 3 shows the 41 fire danger regions of the entire country.

The threshold value for each fire danger region is as set out in Appendix 4.

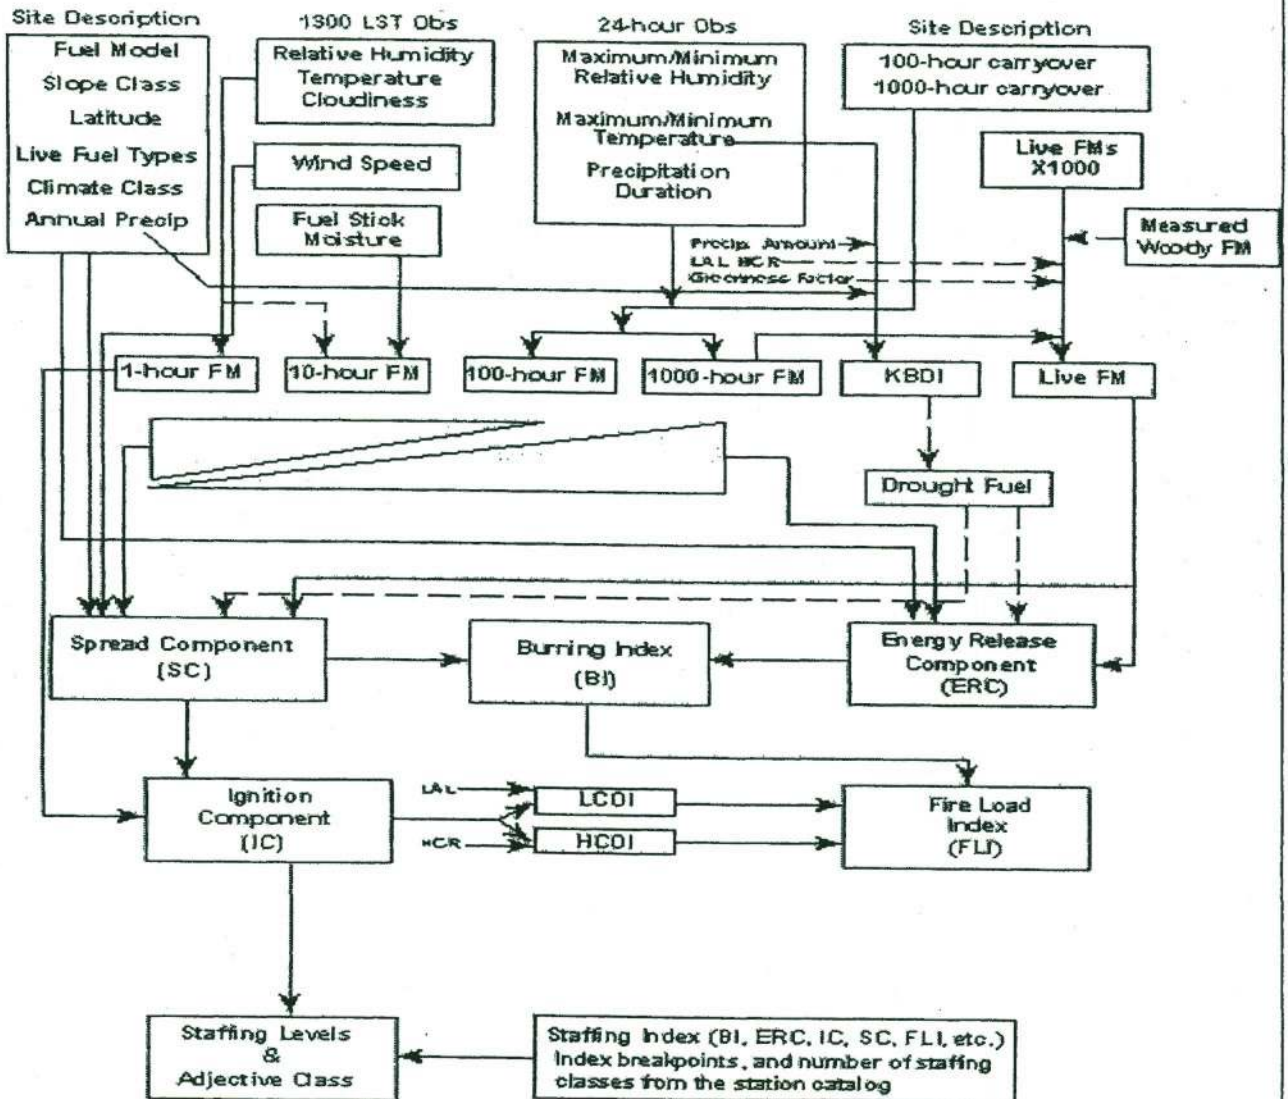

Appendix 5 is a list of municipalities for each fire danger region.

4. Communication

The Minister of Water Affairs and Forestry has delegated his duty to communicate the fire danger rating for each region to the South African Weather Services in terms of section 11 of the National Veld and Forest Fire Act, 1998 (Act No 101 of 1998).

APPENDIX 1

U.S. NFDRS Structure

The shaded wedges show the contribution of dead fuel moisture to Spread Component (SC) and the Energy Release Component (ERC). Based on either the 1978 or the 1988 fuel model, the dashed lines show optional paths through the NFDRS system.

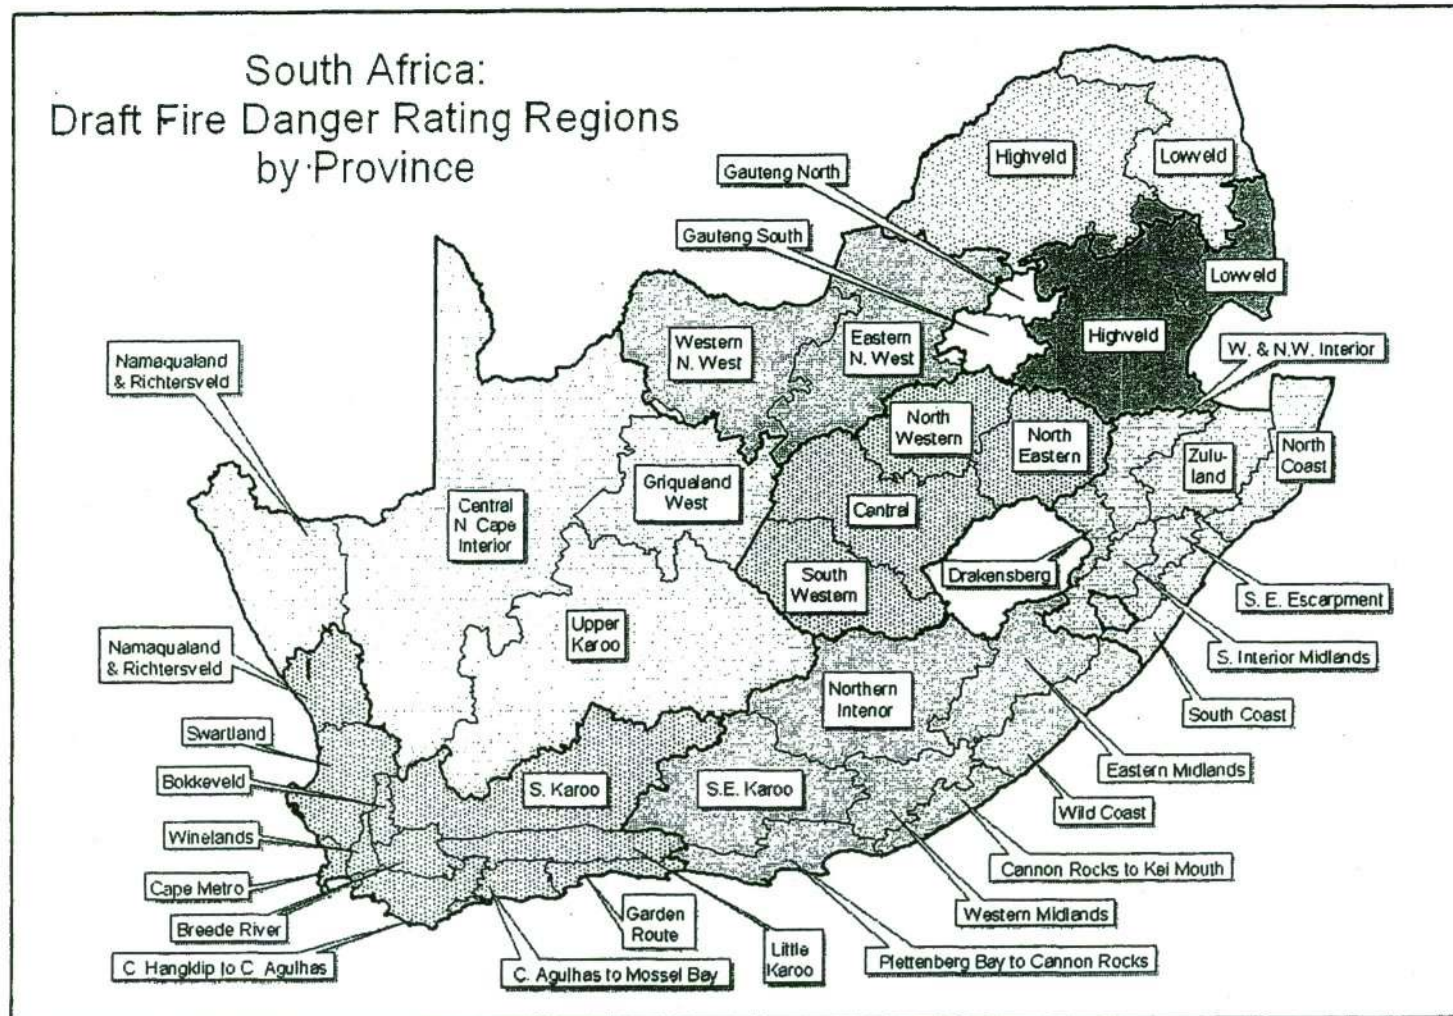

APPENDIX 2

FIRE DANGER RATING

INDICATIVE COLOUR	BLUE	GREEN	YELLOW	ORANGE	RED
DANGER RATING	Insignificant	Low	Moderate	High	High - Extreme
FIRE PREVENTION AND PREPAREDNESS MEASURES	No precaution is needed	Fires including prescribed burns may be lit, used or maintained in the open air on the condition that persons making fires take reasonable precautions against the fires' spreading.	No fires may be allowed in the open air except those that are authorised by the Fire Protection Officer where a Fire Protection Association exists, or elsewhere, the Chief Fire Officer of the local fire service, or fires in designated fireplaces.	No fires may be allowed under any circumstances in the open air.	No fires may be allowed under any circumstances in the open air and Fire Protection Associations and municipal Disaster Management Centres must invoke contingency fire emergency and disaster management plans including extraordinary readiness and response plans. All operations likely to ignite fires halted. Householders placed on alert.
APPLICATION OF THE ACT			Above precautionary measure to be prescribed and made applicable nationally on days rated moderate.	Section 10(1)(b) applies: no person may light, use or maintain a fire in the open air.	Section 10(1)(b) applies: no person may light, use or maintain a fire in the open air.
RELATIONSHIP WITH DISASTER MANAGEMENT				The threat of disastrous wildfires exists at municipal level under these conditions. Municipal Disaster Management Centres must invoke contingency plans and inform National and Provincial Disaster Management Centres. (Section 49 of the Disaster Management Bill).	The threat of disastrous wildfires at provincial level exists under these conditions. Municipal Disaster Management Centres must invoke contingency plans and inform National and Provincial Disaster Management Centres. (Section 49 of the Disaster Management Bill).

INDICATIVE COLOUR	BLUE	GREEN	YELLOW	ORANGE	RED
FIRE BEHAVIOUR	<p>Fires are not likely to ignite. If they do, they are likely to go out without suppression action. There is little flaming combustion.</p> <p>Flame lengths in grassland and plantation forest litter lower than 0.5 m and rates of forward spread less than 0.15 kilometres per hour.</p>	<p>Fires likely to ignite readily but spread slowly.</p> <p>Flame lengths in grassland and plantation forest litter lower than 1.0 m and rates of forward spread less than 0.3 kilometres per hour.</p>	<p>Fires ignite readily and spread rapidly, burning in the surface layers below trees.</p> <p>Flame lengths in grasslands and plantation forests between 1 and 2m, and rates of forward spread between 0.3 and 1.5 kilometres per hour.</p>	<p>Fires ignited readily and spread very rapidly, with local crowning and short-range spotting. Flame lengths between 2 and 5 m, and rates of forward spread between 1.5 and 2.0 kilometres per hour.</p>	<p>Conflagrations are likely in plantation forests, stands of alien invasive trees and shrubs, sugar cane plantations, and fynbos. Long range fire spotting is likely in these fuel types.</p> <p>Rates of forward spread of head fires can exceed 4.0 kilometres per hour and flame lengths will be in the order of 5 – 15 m or more.</p>
FIRE SUPPRESSION DIFFICULTY	<p>Direct attack feasible: one or a few field crew with basic fire fighting tools easily suppresses any fire that may occur.</p>	<p>Direct attack feasible: fires safely approached on foot. Suppression is readily achieved by direct manual attack methods.</p>	<p>Direct attack constrained: fires not safe to approach on foot for more than very short periods. Best forms of control should combine water tankers and back burning from fire control lines.</p>	<p>Direct attack not feasible: fires cannot be approached at all and back burning, combined with aerial support are the only effective means to combat fires. Equipment such as water tankers should concentrate efforts on the protection of houses.</p>	<p>Any form of fire control is likely to be precluded until the weather changes. Back burning dangerous and best avoided.</p>

NOTICE 1097 OF 2005
INTERNATIONAL TRADE ADMINISTRATION COMMISSION OF
SOUTH AFRICA

TERMINATION OF THE INVESTIGATION INTO THE ALLEGED DUMPING OF
CHEDDAR CHEESE ORIGINATING IN OR IMPORTED FROM IRELAND

On 25 June 2004, the International Trade Administration Commission of South Africa (the Commission) formally initiated an investigation into the alleged dumping of cheddar cheese originating in or imported from the Republic of Ireland (hereafter referred to as Ireland). Notice of the initiation of the investigation was published in Notice No.1157 of *Government Gazette* No.26477 dated 25 June 2004.

The application was lodged on behalf of the Southern African Customs Union (SACU) industry by Milk SA (the Applicant), being the representative body of the majority of producers of the subject product in SACU, which claimed that dumped imports were causing it material injury.

The investigation was initiated after the Commission considered that there was *prima facie* evidence to show that the subject product was being imported at dumped prices, causing material injury to the SACU industry.

On initiation of the investigation, the known exporter of the subject product in Ireland was sent a foreign manufacturer/exporter questionnaire to complete. Importers of the subject product were also sent questionnaires to complete.

After considering all parties' comments, the Commission made a preliminary determination that the subject product was being dumped on the SACU market causing material injury to the SACU industry.

As the Commission considered that the SACU industry would continue to suffer material injury during the course of the investigation if provisional payments were not imposed, it decided to request the Commissioner for South African Revenue Service to impose provisional payments for a period of twenty-six weeks.

The Commission's detailed reasons for its decision were set out in Commission Report No. 95 (preliminary report).

Interested parties were invited to comment on the Commission's preliminary report.

Based on the details as contained in the Commission's preliminary report and the comments received on this report, the Commission made a final decision that it was considering to confirm its preliminary determination that the subject product is being dumped on the SACU market and that the SACU industry is suffering material injury. However, the Commission further indicated that it was considering to decide that factors other than dumping, sufficiently detracted from the causal link between the dumping and the material injury.

The Commission therefore indicated that it is considering making a final determination to recommend to the Minister of Trade and Industry that the investigation be terminated.

On 25 April 2005, the Commission sent out letters to all interested parties, informing them in terms of Section 37 of the International Trade Administration Anti-Dumping Regulations and Article 6.9 of the Anti-Dumping Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade of the "essential facts" which are being considered by the Commission. The Commission invited comments from interested parties on these "essential facts" being considered by the Commission.

On 1 June 2005, the Commission, after considering all parties' comments, made a

final determination that the subject product was being dumped on the SACU market and that the SACU industry was suffering material injury.

The Commission, however, made a final determination that factors other than dumping was causing injury to the industry and this sufficiently detracted from the causal link between the dumping and the material injury.

The Commission therefore recommended to the Minister of Trade and Industry that the investigation into the alleged dumping of cheddar cheese originating in or imported from Ireland, be terminated.

Enquiries may be directed to the investigating officers, Ms Mandie Wagner at telephone (012) 394 3593 and Mr Jeffrey Maphagela at (012) 394 3639, or at fax (012) 395 0518.

NOTICE 1098 OF 2005
INTERNATIONAL TRADE ADMINISTRATION COMMISSION
OF SOUTH AFRICA

**REVIEW OF THE POLICY ON DAIRY PRODUCTS IMPORTED IN TERMS OF
REBATE ITEM 470.03**

The International Trade Administration Commission of South Africa (ITAC) has a policy not to issue duty rebate permits in terms of the provisions of item 470.03 on dairy products. The policy was implemented on the basis of strong evidence that imports in terms of item 470.03 were utilized in a way which disrupted the interaction of supply and demand on the domestic market and due to problems experienced with respect to the control of permits.

Exporters can claim a drawback of the duty on dairy products imported for use in the manufacture, processing, finishing, equipment or packing of products exported.

Woodlands Dairy, Humansdorp, has applied for the withdrawal of this policy, which will allow 470.03 rebate permits to be issued in respect of applications for dairy products. The applicant indicated that the system is long winded, generates cash flow problems, major currency risk which only makes SA dairy products less competitive in the export market and can only be seen as discriminatory when compared to other industries.

Comments should be submitted to the Chief Commissioner, ITAC, Private Bag X753, Pretoria, 0001, within six weeks of the date of this notice.

This rule applies to all parties and to all correspondence with and submissions to the Commission, which unless indicated to be confidential and filed together with a non-confidential version, will be made available to other interested parties.

If a party considers that any document of another party, on which that party is submitting representations, does not comply with the above rules and that such deficiency affects that party's ability to make meaningful representations, the details of the deficiency and the reasons why that party's rights are so affected must be submitted to the commission in writing forthwith (and at the latest 14 days prior to the date on which that party's submission is due). Failure to do so timeously will seriously hamper the proper administration of the investigation, and such party will not be able to subsequently claim an inability to make meaningful representations on the basis of the failure of such other party to meet the requirements.

NOTICE 1099 OF 2005**INTERNATIONAL TRADE ADMINISTRATION COMMISSION****NOTICE OF INITIATION OF AN INVESTIGATION INTO THE ALLEGED DUMPING OF
DETONATING FUSES AND DELAY DETONATORS (COMMONLY KNOWN AS
SHOCKTUBES), ORIGINATING IN OR IMPORTED FROM THE PEOPLE'S REPUBLIC
OF CHINA.**

The International Trade Administration Commission of South Africa (the Commission) received an application alleging that detonating fuses and delay detonators (commonly known as shocktubes) originating in or imported from the People's Republic of China (PRC), is being dumped on the Southern African Customs Union (SACU) market, causing material injury (and/or a threat of material injury) to the SACU industry concerned.

THE APPLICANT

The Application was lodged by African Explosives Limited (AEL) being the domestic manufacturer of the product under investigation in the SACU. The Applicant alleges that it cannot compete with the low prices charged by the importers and that the allegedly dumped products are causing it material injury and /or a threat of material injury. The Applicant submitted sufficient evidence and established a *prima facie* case to enable the Commission to arrive at a reasonable conclusion that an investigation should be initiated on the basis of dumping, material injury, threat of material injury and causality.

THE PRODUCT

The product allegedly being dumped is, detonating fuses consisting of a plastic tube, internally lined with a mixture of pyrotechnic powders (commonly known as shocktubes),

and delay detonators with a length exceeding 50 mm, whether or not presented together, classifiable under tariff subheading 3603.00, originating in or imported from the People's Republic of China

THE ALLEGATION OF DUMPING

The allegation of dumping is based on the comparison between the normal value and the export price. The applicant nominated Ghana as a surrogate country for the PRC for the purpose of calculating the normal value. The normal values were determined based on a quote provided by the producer in Ghana. The export prices were calculated from the selling price to the first independent buyer in the SACU based on successful tender prices to a mine.

On this basis, the Commission found that there was *prima facie* proof of dumping.

THE ALLEGATION OF MATERIAL INJURY AND/OR THREAT OF MATERIAL INJURY

The Applicant alleges and submitted sufficient evidence to show that there is price undercutting and that the imports in question are suppressing its selling prices. The Applicant's information indicated a decline in sales, profits, output, market share and capacity utilisation. It further indicated that there is a negative effect on cash flow, return on investment and employment. It was also evident that the decrease in market share has been at the expense of a corresponding increase in the market share of the allegedly dumped goods. On this basis the Commission found that there was *prima facie* proof of material injury and causal link.

The Applicant alleges and submitted sufficient evidence to show that there has been a substantial increase in the volume of alleged dumped imports at prices which will have a suppressing effect on domestic prices. It further submitted evidence that one exporter has been prohibited from exporting to the USA, which was the biggest export market for the

PRC, and that the industry in the PRC has significant freely disposable capacity.

On this basis the Commission found that there was *prima facie* proof of threat of material injury in that the producers in the PRC will be looking for alternative markets for the subject product which could be exported at dumped prices, which will cause material injury.

PERIOD OF INVESTIGATION

The period of investigation for purposes of determining the dumping margins in the exporting country of origin will be from 1 January 2004 to 31 December 2004. The period of investigation for purposes of determining injury will be from 1 January 2002 to 31 December 2004. If there are subsequent events that are relevant to injury the Commission may later request and consider further, more recent information.

PROCEDURAL FRAMEWORK

Having decided that there is sufficient evidence and a *prima facie* case to justify the initiation of an investigation, the Commission has begun an investigation in terms of section 16 of the International Trade Administration Act, 2002 (the ITA Act). The Commission will conduct its investigation in accordance with the relevant sections of the ITA Act, the World Trade Organisation Agreement on Implementation of Article VI of the GATT 1994 (the Anti-Dumping Agreement) and the Anti-Dumping Regulations of the International Trade Administration Commission of South Africa (ADR). Both the ITA Act and the ADR are available on the Commission's website (www.itac.org.za) or from the Trade Remedies section, on request.

In order to obtain the information it deems necessary for its investigation, the Commission will send non-confidential versions of the application, and questionnaires to all known importers and exporters, and known representative associations. The trade representative of the exporting country has also been notified. Importers and other interested parties are invited to contact the Commission as soon as possible in order to determine whether they

have been listed and were furnished with the relevant documentation. If not, they should immediately ensure that they are sent copies. The questionnaire has to be completed and any other representations must be made within the time limit set out below.

CONFIDENTIAL INFORMATION

Please note that if any information is considered to be confidential then a non-confidential version of the information must be submitted for the public file, simultaneously with the confidential version. In submitting a non-confidential version the following rules are strictly applicable and parties must indicate:

- where confidential information has been omitted and the nature of such information;
- reasons for such confidentiality;
- a summary of the confidential information which permits a reasonable understanding of the substance of the confidential information; and
- in exceptional cases, where information is not susceptible to summary, reasons must be submitted to this effect.

This rule applies to all parties and to all correspondence with and submissions to the Commission, which unless indicated to be confidential and filed together with a non-confidential version, will be placed on the public file and be made available to other interested parties.

If a party considers that any document of another party, on which that party is submitting representations, does not comply with the above rules and that such deficiency affects that party's ability to make meaningful representations, the details of the deficiency and the reasons why that party's rights are so affected must be submitted to the Commission in writing forthwith (and at the latest 14 days prior to the date on which that party's submission is due). Failure to do so timeously, will seriously hamper the proper

administration of the investigation, and such party will not be able to subsequently claim an inability to make meaningful representations on the basis of the failure of such other party to meet the requirements.

Subsection 33(1) of the ITA Act provides that any person claiming confidentiality of information should identify whether such information is *confidential by nature* or is *otherwise confidential* and, any such claims must be supported by a written statement, in each case, setting out how the information satisfies the requirements of the claim to confidentiality. In the alternative, a sworn statement should be made setting out reasons why it is impossible to comply with these requirements.

Section 2.3 of the ADR provides as follows:

"The following list indicates "information that is by nature confidential" as per section 33(1)(a) of the Main Act, read with section 36 of the Promotion of Access to Information Act (Act 2 of 2000):

- (a) management accounts;*
- (b) financial accounts of a private company;*
- (c) actual and individual sales prices;*
- (d) actual costs, including cost of production and importation cost;*
- (e) actual sales volumes;*
- (f) individual sales prices;*
- (g) information, the release of which could have serious consequences for the person that provided such information; and*
- (h) information that would be of significant competitive advantage to a competitor;*

Provided that a party submitting such information indicates it to be confidential."

PROCEDURES AND TIME LIMITS

All responses, including non-confidential copies of the responses, should be received by the Director: Trade Remedies not later than 30 days from the date hereof, or from the date on which the letter accompanying the abovementioned questionnaire was received. The said letter shall be deemed to have been received seven days after the day of its dispatch.

Late submissions will not be accepted except with the prior written consent of the Commission. The Commission will give due consideration to written requests for an extension of not more than 14 days on good cause shown (properly motivated and substantiated), if received prior to the expiry of the original 30-day period. Merely citing insufficient time is not an acceptable reason for extension. Please note that the Commission will not consider requests for extension by the Embassy on behalf of exporters.

The information submitted by any party may need to be verified by the Investigating Officers in order for the Commission to take such information into consideration. The Commission may verify the information at the premises of the party submitting the information, within a short period after the submission of the information to the Commission. Parties should therefore ensure that the information submitted will subsequently be available for verification. It is planned to do the verification of the information submitted by the exporters within three to five weeks subsequent to submission of the information. This period will only be extended if it is not feasible for the Commission to do it within this time period or upon good cause shown, and with the prior written consent of the Commission, which should be requested at the time of the submission. It should be noted that unavailability of, or inconvenience to consultants will not be considered to be good cause. Parties should also ensure when they engage consultants that they will be available at the requisite times, to ensure compliance with the above time frames. Parties should also ensure that all the information requested in the applicable questionnaire is provided in the specified detail and format. The questionnaires are designed to ensure that the Commission is provided with all the information required to make a determination in accordance with the rules of Anti-Dumping Agreement. The Commission may therefore refuse to verify information that is incomplete or does not comply with the format in the questionnaire, unless the Commission has agreed in writing to a deviation from the required format. A failure to submit an adequate non-confidential version of the response that complies with the rules set out above under the heading Confidential Information will be regarded as an incomplete submission.

Parties who experience difficulty in furnishing the information required, or submitting in the format required, are therefore urged to make written applications to the Commission at an early stage for permission to deviate from the questionnaire or provide the information in an alternative format that can satisfy the Commission's requirements. The Commission will give due consideration to such a request on good cause shown.

Any interested party may request an oral hearing at any stage of the investigation in accordance with Section 5 of the ADR, provided that the party indicates reasons for not relying on written submission only. The Commission may refuse an oral hearing if granting such hearing will unduly delay the finalisation of a determination. Parties requesting an oral hearing shall provide the Commission with a detailed agenda for, and a detailed version, including a non-confidential version, of the information to be discussed at the oral hearing at the time of the request. Oral representations will be limited to one hour for SACU manufacturers and exporters and thirty minutes for importers.

If the required information and arguments are not received in a satisfactory form within the time limit specified above, or if verification of the information cannot take place, the Commission may disregard the information submitted and make a finding on the basis of the facts available to it.

Enquiries may be directed to the investigating officers, Mr J Böning at telephone (012) 394 3638 and Mr A Strydom at (012) 394 3597, or at fax (012) 394 0518.
