Home-based care

Home based care refers to services offered at the homes of the people with mental disorders, providing psychosocial support in the areas of living, learning, socialising and working.

These services can be provided by ward based community outreach teams or by current day care service providers, and would generally require 1:1 care. Care may include, monitoring compliance to medication, assisting with feeding, bathing and dressing, collecting medication, etc.

Funds for this services is mainly for transportation costs and salaries for community health workers.

Supported independent /assisted living

This refers to the ongoing support in the form of individual or group supervision and instruction in basic skills of everyday living, which mentally ill persons receive in the community.

Supported or assisted living is a housing option providing social development programmes in order to encourage the independent functioning of people with disabilities and to facilitate deinstitutionalisation. This option could be community based or attached to a residential facility.

This could be where a mental health care user has access to a social worker, or care worker for assistance with some decision making, problem solving, etc. This could be that the user could live in a facility with minimal support and supervision, but within a protective environment.

Protective workshops

Protective workshops provides a protected environment outside of the open labour market, offering vocational services, e.g. vocational guidance, vocational training and selective placement, designed to secure and maintain suitable employment for mentally ill persons who cannot be integrated into the open labour market.

These services are currently funded by the Department of Social Development

Support groups

Support groups provides invaluable emotional, spiritual, physical and psychological support to individuals and families. Benefits include having contact with others who are experiencing similar challenges in their lives, obtaining useful information and developing different ways of dealing with the demands of mental illness.

Support groups are useful for providing information and guidance regarding illness, gaining insight into one's self, networking and to access referral systems.

The support group provides a sense of belonging and enables the expression and sharing of feelings, as well as concerns. Most importantly, it provides and encourages a sense of hope and positive living. In follow up care, the support group may promotes adherence to treatment.

Groups that meet to provide ongoing regular support for people with mental disorders. Through these groups persons with mental disabilities are enabled to increase their functioning so that they can be successful and satisfied with living, working, socialising and learning environments of their choice with the least amount of professional intervention.

These groups are not only for group discussions, but can also be used as activity or social and recreation groups. It could also include advocacy and peer led or self-help groups.

Support groups require initial and ongoing training of facilitators and as well as funding for venue, refreshments and transport. The services should be supervised by the multi-disciplinary team from the district.

Residential Services: Facilities that offer accommodation, housing or support in homes or facilities like board and care homes to persons with mental disabilities.

DEPARTMENT OF TRADE AND INDUSTRY**NOTICE 461 OF 2017****INTERNATIONAL TRADE ADMINISTRATION COMMISSION****CUSTOMS TARIFF APPLICATIONS****LIST 05/2017**

The International Trade Administration Commission (herein after referred to as ITAC or the Commission) has received the following application concerning the Customs Tariff. Any objection to or comments on this representation should be submitted to the Chief Commissioner, ITAC, Private Bag X753, Pretoria, 0001. Attention is drawn to the fact that the rate of duty mentioned in this application is that requested by the applicant and that the Commission may, depending on its findings, recommend a lower or higher rate of duty.

CONFIDENTIAL INFORMATION

The submission of confidential information to the Commission in connection with customs tariff applications is governed by section 3 of the Tariff Investigations Regulations, which regulations can be found on ITAC's website at <http://www.itac.org.za/documents/R.397.pdf>. These regulations require that if any information is considered to be confidential, then a non-confidential version of the information must be submitted, simultaneously with the confidential version. In submitting a non-confidential version the regulations are strictly applicable and require parties to indicate:

- ☐ *Each instance where confidential information has been omitted and the reasons for confidentiality;*
- ☐ *A summary of the confidential information which permits other interested parties a reasonable understanding of the substance of the confidential information; and*
- ☐ *In exceptional cases, where information is not susceptible to summary, reasons must be submitted to this effect.*

This rule applies to all parties and to all correspondence with and submissions to the Commission, which unless clearly indicated to be confidential, will be made available to other interested parties.

The Commission will disregard any information indicated to be confidential that is not accompanied by a proper non-confidential summary or the aforementioned reasons. If a party considers that any document of another party, on which that party is submitting representations, does not comply with the above rules and that such deficiency affects that party's ability to make meaningful representations, the details of the deficiency and the reasons why that party's rights are so affected must be submitted to the commission in writing forthwith (and at the latest 14 days prior to the date on which that party's submission is due).

Failure to do so timeously will seriously hamper the proper administration of the investigation, and such party will not be able to subsequently claim an inability to make meaningful representations on the basis of the failure of such other party to meet the requirements.
